Sociology Full Circle Contemporary Readings On Society:

Sociology Full Circle William Feigelman, 1976 Sociology Full Circle William Feigelman, Contemporary Organized Crime Hans Nelen, Dina Siegel, 2021-01-04 This edited volume explores recent research and developments in the study of organized crime. It covers six key areas: drug-related issues, human trafficking and prostitution, sports and crime, procurement and corruption, and enforcement and prevention. The contributors provide timely research for understanding various aspects of organized crime as well as the responses that have been developed worldwide to prevent and contain them. These contributions were presented at seminars of the Centre for Information and Research on Organized Crime (CIROC). It will be of interest to researchers in Criminology and Criminal Justice, particularly with an interest in organized crime and criminal networks, as well as related fields such as Comparative Law and Political Science. This collection represents the most current thinking on entrenched problems of organized crime. This book is an important contribution in developing new approaches to organized crime and its control. Jay S. Albanese, Ph.D., Professor and Chair, Criminal Justice Programs, Virginia Commonwealth University. The book is very well organized and written and deals with a diversity of topics and approaches. Ernesto U. Savona, Director of Transcrime, Professor of Criminology, Università Cattolica del Sacro Cuore, Milan. *Economics as an Evolutionary Science* Anna Sachko Gandolfi, 2018-02-06 Economics is traditionally taken to be the social science concerned with the production, consumption, exchange, and distribution of wealth and commodities. Economists carefully track the comings and goings of the human household, whether written small microeconomics or large macroeconomics, and attempt to predict future patterns under different situations. However, in constructing their models of economic behavior, economists often lose sight of the actual characteristics and motivations of their human subjects. In consequence, they have found the goal of an explanatory and predictive science to be elusive. *Economics as an Evolutionary Science* reorients economics toward a more direct appreciation of human nature with an emphasis on what we have learned from recent advances in evolutionary science. The authors integrate economics and evolution to produce a social science that is rigorous, internally coherent, testable, and consistent with the natural sciences. The authors suggest an expanded definition of fitness as in Darwin's survival of the fittest, emphasizing not only the importance of reproduction and the quality of offspring but also the unique ability of humans to provide material wealth to their children. The book offers a coherent explanation for the recent decline in fertility, which is shown to be consistent with the evolutionary goal of maximizing genetic success. In addition, the authors demonstrate the relevance to economics of several core concepts derived from biologists, including the genetics of parent-offspring conflict, inclusive fitness theory, and the phenomena of R-selection and K-selection. The keystone of their presentation is a cogent critique of the traditional concept of utility. As the authors demonstrate, the concept can be modified to reflect the fundamental evolutionary principle whereby living things, including human beings, have been selected to behave in a manner that maximizes their genetic representation in future generations. Despite the extraordinary interest in

applying evolutionary biology to other disciplines Economics as an Evolutionary Science marks the first major attempt at a synthesis of biology and economics Scholarly yet accessible this volume offers unique and original perspectives on an entire discipline
