***The Sociology of Emotions*** Jonathan H. Turner, Jan E. Stets, 2005-03-14. All social relations involve emotional responses from the simplest face to face encounter through the mobilization of social movements to the commitments that individuals develop for culture and society. The social world is thus dependent upon the arousal of emotions and equally significant conflict and change in societies is ultimately driven by emotional arousal. Thus it is important to understand how human emotions influence and are influenced by the social world. This understanding takes us into the sociology of emotions that has emerged as a distinct area of inquiry over the last thirty years.

**Ethical Infrastructure** Dana Mesner-Andolšek, Jana Nadoh Bergoč, 2019-06-06. This book deals with the field of organization management and is based on the scientific discoveries of business ethics which introduce concepts in organization research that traditionally did not merit a place in managerial theories. These include the issue of organization ethics, ethics management and the development and implementation of ethical infrastructures within organizations. The book analyses the impact that all of the above have on the moral behaviour of managers and other members of organizations. It shows the presence and development of ethical infrastructures in organizations, the relationship between individual elements of the existing ethical infrastructures and their effect on the moral behaviour of managers in companies. The subject of ethical infrastructures is a unique and under researched area. This book will serve to diminish this gap by providing a clear overview of a variety of subjects that influence the way ethics is institutionalized in organizations and by stimulating not just knowledge but also an understanding of the concept of ethical infrastructure and the place it has within each individual organization.
