The Sociology of Post-Colonial Societies J. E. Goldthorpe, 1996-08-13 An analysis of the disparity between rich and poor countries and a discussion of the problems of the poor countries

**The Sociology of Post-Colonial Societies** J. E. Goldthorpe, 1996-08-13 This is the completely revised and updated version of the immensely successful *Sociology of the Third World*. This book is about the division of the world into rich and poor countries and the disparities between rich and poor people especially in poor countries. It analyzes economic conditions and living standards in poor countries. It discusses droughts, famines, and environmental concerns, questions about limits to growth and sustainable development, and reviews theoretical perspectives on development and underdevelopment. Later chapters describe the effect and psychology of modernization.

*Quality of Life and the Millennium Challenge* Valerie Møller, Denis Hirsch, 2008-11-30 The new millennium is widely considered to be the age of globalisation, democratisation, and human rights. We live in a knowledge society and in a time of risk and uncertainty. World society is rapidly urbanising and ageing and exhausting its natural resources. It is the interplay of such key trends of the era that calls for a fresh approach to measuring quality of life. This collection of papers presents an innovative approach to evaluating living standards and wellbeing under the new circumstances facing individuals and societies in the twenty-first century. Contributions cover a wide range of issues that impact positively and negatively on wellbeing in our age. While stability, trust, equal access to resources, and the social integration of disadvantaged members of society enhance wellbeing, poverty, social exclusion, congestion in cities, HIV/AIDS, and global warming pose threats to both modern and traditional lifestyles. Methodological refinements of conventional measurement tools are presented that take into consideration the rich diversity of lifestyles and values among different populations and regions of the world. This book will be essential reading for social scientists and ordinary citizens who are concerned about the future of human wellbeing on our planet.

**Urban Appropriation and Transformation: Bicycle Taxi and Handcart Operators** Operators Bicycle, 2008-11-15 This book is about emerging informal responses to unemployment in Malawi. To the bicycle taxi and handcart operators who are at the centre of the book, informality is a means for negotiating newer experiences and challenges associated with urbanisation. Jimu richly documents how informal economy activities continue to represent grassroots responses to widespread poverty, unavailability of meaningful employment opportunities, and the failure of the state as well as the private and the non-state sectors to respond to escalating demand for formal sector jobs. Multiplicity of activities and straddling urban and rural opportunities are strategies employed to deal with opportunity impermanence and maximize returns from various low-paying tasks and jobs. While these activities have grown without state support, state involvement is necessary to regulate and promote the welfare of the workers in the sector as well as that of the users of their service and the general public. This will require constructive engagement among the operators, users of their services, local government, and various state agencies.

**Re-presenting the Johannine Community** Yak-hwee Tan, 2008

Re Presenting the Johannine Community A Postcolonial Perspective explores the characterization of the Johannine community in the Farewell Discourse of the Fourth Gospel from a postcolonial perspective The community is scrutinized with the lens of an integrated literary rhetorical and ideological postcolonial approach The disciples emerge as both the Self insofar as they resist an imperial reality represented by the world and the Other with respect to Jesus and the Father As such far from immutable and bland the Johannine community is portrayed as chameleonic and engaged in an emerging strategy of resistance Book Jacket

*Law in Transition* Ruth Buchanan, Peer Zumbansen, 2014-12-01

Law has become the vehicle by which countries in the developing world including post conflict states or states undergoing constitutional transformation must steer the course of social and economic legal and political change Legal mechanisms in particular the instruments as well as concepts of human rights play an increasingly central role in the discourses and practices of both development and transitional justice These developments can be seen as part of a tendency towards convergence within the wider set of discourses and practices in global governance While this process of convergence of formerly distinct normative and conceptual fields of theory and practice has been both celebrated and critiqued at the level of theory the present collection provides through a series of studies drawn from a variety of contexts in which human rights advocacy and transitional justice initiatives are colliding with development projects programmes and objectives a more nuanced and critical account of contemporary developments The book includes essays by many of the leading experts writing at the intersection of development rights and transitional justice studies Notwithstanding the theoretical and practical challenges presented by the complex interaction of these fields the premise of the book is that it is only through engagement and dialogue among hitherto distinct fields of scholarship and practice that a better understanding of the institutional and normative issues arising in contemporary law and development and transitional justice contexts will be possible The book is designed for research and teaching at both undergraduate and graduate levels
