Socrates Ancestors An Essay On Architectural Beginnings:

Socrates' Ancestor Indra Kagis McEwen, 1993 *Socrates Ancestor* is a rich and poetic exploration of architectural beginnings and the dawn of Western philosophy in preclassical Greece. Architecture precedes philosophy, McEwen argues, and it was here in the archaic Greek polis that Western architecture became the cradle of Western thought. McEwen's appreciation of the early Greek understanding of the indissolubility of craft and community yields new insight into such issues as orthogonal planning and the appearance of the encompassing colonnade, the pteron or wings that made Greek temples Greek. Who was Socrates' ancestor? Socrates claims it was Daedalus, the mythical first architect. Socrates' ancestors were also the first Western philosophers, the pre-Socratic thinkers of archaic Greece, where the Greek city-state with its monumental temples first came to light. McEwen brilliantly draws out the connections between Daedalus and the earliest Greek thinkers between architecture and the advent of speculative thought. She argues that Greek thought and Greek architecture share a common ground in the amazing fabrications of the legendary Daedalus statues so animated with divine life that they had to be bound in chains in the Labyrinth where Theseus slew the Minotaur, Ariadne's dancing floor in Knossos. *Socrates Ancestor* is an exploration as remarkable for its clarity as for its avoidance of reductionism. Drawing as much on the power of myth and metaphor as on philosophical, philological, and historical considerations, McEwen first reaches backward from Socrates to the earliest written record of Western philosophy in the Anaximander B1 fragment and its physical expression in Anaximander's built work, a cosmic model that consisted of a celestial sphere, a map of the world, and the first Greek sun clock. From daedalean artifacts she draws out the centrality of early Greek craftsmanship and its role in the making of the Greek city-state. The investigation then moves forward to a discussion of the polis and the first great peripteral temples that anchored for the meaning of city. Indra Kagis McEwen teaches architecture at the National Theatre School of Canada and at Université du Québec à Montréal.

Urban Ethic Eamonn Canniffe, 2006-06-01 Although contemporary practice in urbanism has many sources of design guidelines, it lacks theory to provide a flexible approach to the complexities of most urban situations. The author provides that theoretical framework, looking beyond the style obsession of urban makeovers to the fundamental elements of city making. The scope of this book takes in illuminating historical analysis and significant theoretical coherence while recent case studies link the physical environment to the citizens within it, ultimately offering a new methodology for the analysis and design of urban spaces which encourages a balance between diversity and community.

The Greek Concept of Nature Gerard Naddaf, 2012-02-01 In *The Greek Concept of Nature*, Gerard Naddaf utilizes historical, mythological, and linguistic perspectives to reconstruct the origin and evolution of the Greek concept of *physis*. Usually translated as nature, *physis* has been decisive both for the early history of philosophy and for its subsequent development. However, there is a considerable amount of controversy on what the earliest philosophers—Anaximander, Xenophanes, Pythagoras, Heraclitus, Parmenides, Empedocles, Anaxagoras, Leucippus, and Democritus—actually

had in mind when they spoke of physis or nature Naddaf demonstrates that the fundamental and etymological meaning of the word refers to the whole process of birth to maturity He argues that the use of physis in the famous expression Peri phuseos or historia peri phuseos refers to the origin and the growth of the universe from beginning to end Naddaf's bold and original theory for the genesis of Greek philosophy demonstrates that archaic and mythological schemes were at the origin of the philosophical representations but also that cosmogony anthropogony and politogony were never totally separated in early Greek philosophy

Architecture as a Performing Art Marcia Feuerstein, Gray Read, 2016-04-15 How do buildings act with people and among people in the performances of life This collection of essays reveals a deep alliance between architecture and the performing arts uncovering its roots in ancient stories and tracing a continuous tradition of thought that emerges in contemporary practice With fresh insight the authors ask how buildings perform with people as partners rather than how they look as formal compositions They focus on actions the door that offers the possibility of making a dramatic entrance the window that frames a scene and the city street that is transformed in carnival The essays also consider the design process as a performance improvised among many players and

offer examples of recent practice that integrates theater and dance This collection advances architectural theory history and criticism by proposing the lens of performance as a way to engage the multiple roles that buildings can play without reducing them to functional categories By casting architecture as spatial action rather than as static form these essays open a promising avenue for future investigation For architects the essays propose integrating performance into design through playful explorations that can reveal intense relationships between people and place and among people in place Such practices develop an architectural imagination that intuitively asks How might people play out their stories in this place and How might this place spark new stories Questions such as these reside in the heart of all of the essays presented here Together they open a position in the intersection between everyday life and staged performance to rethink the role of architectural design

Building Theories Franca Trubiano, 2022-11-25 Building Theories speaks to the value of words in architecture It addresses the author's fascination with the voices of architects engineers builders and craftspeople whose ideas about building have been captured in text It discusses the content of treatises essays articles and letters by those who have been throughout history committed to the art of building In this Building Theories argues for the return of a practice of architectural theory that is set amongst building buildings and builders This journey of close reading reinterprets the words of Vitruvius Alberti de L Orme Le Camus de Mézières Boullée Laugier Rondelet Semper Viollet le Duc Hebsch Brtticher Berlage Muthesius Wagner Behrendt Gropius and Arup With chapters dedicated to texts from antiquity the Renaissance and the nineteenth century and with a critical eye on architectural theory popularized in the Anglo Saxon world post 1968 readers are introduced to a wider more inclusive definition of architectural ideas Building Theories considers how contemporary scholarship has steered away from the topic of building in its reluctance to admit that both design and construction are central to its concerns In response it argues for a realignment of architecture with the concept of techn with a dual commitment to fabrica e ratio with a productive return to l'art de bien bastir with the accurate translation of the term Baukunst and with an appeal to the architect's composite mind Students practitioners and educators will identify in Building Theories ways of thinking that strive for the integration of design with construction reject the supposed primacy of the former over the latter recognize how aesthetics are an

insufficient scaffold for subtending the subject of architectural ethics and accept without reservation that material transformations have always been at the origins of built form

Phenomenology, Architecture and the Built World

James Dodd, 2017-01-05 Phenomenology Architecture and the Built World is an introduction to the methods and basic concepts of phenomenological philosophy through an analysis of the phenomenon of the built world The conception of the built world that emerges is of space and time fashioned in accordance with a living understanding of what it is for human beings to exist in the world Human building and making is thus no mere supplementary instrument in the pursuit of the ends of life but a fundamental embodiment of the self understanding of human beings Phenomenological description is uniquely capable of bringing into view the physiognomy of this understanding its texture and complexity thereby providing an important basis for a critique of what constitutes its essence and its conditions of possibility

The Palgrave Handbook of Literature and the City

Jeremy Tambling, 2017-02-17 This book is about the impact of literature upon cities world wide and cities upon literature It examines why the city matters so much to contemporary critical theory and why it has inspired so many forms of writing which have attempted to deal with its challenges to think about it and to represent it Gathering together 40 contributors who look at different modes of writing and film making in throughout the world this handbook asks how the modern city has engendered so much theoretical consideration and looks at cities and their literature from China to Peru from New York to Paris from London to Kinshasa It looks at some of the ways in which modern cities whether capitals shanty towns industrial or rust belt have forced themselves on people s ways of thinking and writing

On Surface and Place Peta Carlin, 2018-03-21 On Surface and Place is a rich and poetic exploration of surfaces which foregrounds their significance in our understanding and experience of place Adopting weaving as its overarching metaphor it departs from Gottfried Semper s discussion of correspondences between architecture and textiles and emerges from the reading of photographs a swatch of Harris Tweed and curtain wall fa ade juxtaposed In juxtaposing the fabric of the city with the weave of Harris Tweed the book charts an original course across a range of connected ideas and questions combining many different themes writers and disciplines It presents integrated and innovative rethinkings on a number of fundamental relationships including correlations between body and building word and image and between the rural and the metropolitan and the hand crafted and the mass reproduced In doing so it seeks to foreground the very interrelationship of surface and place as it makes a claim for the relational nature of the world in which we live

Architecture, Liberty and Civic Order Carroll William Westfall, 2016-03-09 This book brings to light central topics that are neglected in current histories and theories of architecture and urbanism These include the role of imitation in earlier centuries and its potential role in present practice the necessary relationship between architecture urbanism and the rural districts and their counterpart in the civil order that builds and uses what is built The narrative traces two models for

the practice of architecture One follows the ancient model in which the architect renders his service to serve the interests of others it survives and is dominant in modernism The other first formulated in the fifteenth century by Leon Battista Alberti has the architect use his talent in coordination with others to contribute to the common good of a republican civil order that seeks to protect its own liberty and that of its citizens Palladio practiced this way and so did Thomas Jefferson when he founded a uniquely American architecture the counterpart to the nation s founding This narrative gives particular emphasis to the contrasting developments in architecture on the opposite sides of the English Channel The book presents the value for clients and architects today and in the future of drawing on history and tradition It stresses the importance indeed the urgency of restoring traditional practices so that we can build just beautiful and sustainable cities and rural districts that will once again assist citizens in living not only abundantly but also well as they pursue their happiness **Chora 5** Alberto
