Seldon,2013-03-01 The chance to begin anew seldom occurs Yet the nearly complete breakdown of the world economy between 1939 and 1945 together with the dominant position of the United States at the end of the war provided just this opportunity A new international economic order was built on the ruins of the old How this happened and the role of

government in economic performance is the subject of this important and timely book. Written by political scientists, contemporary historians and economists, it includes ten country studies covering all the major industrialized nations in the West: the USA, USSR, Japan, Germany, the United Kingdom, France, Italy, Spain, Eastern Europe, and Scandinavia. In each chapter, readers will find information on the main objectives and instruments of economic policy, the institutional framework where the country started from at the end of the war, and a summary of what happened thereafter, both in terms of policies and outcomes. Each chapter also contains data on the country's economic performance, a list of selected dates of important events, and a guide to further reading. The book begins with an overview of the system of international trade and payments since the war and ends with five commentaries drawing attention to contrasts and similarities between the nations. The commentaries feature David Henderson, Head of the Economics Division of the OECD, on the overall economic performance; Charles Feinstein on the influence of different starting points; David Marquand on the effect of different political and institutional structures; and Sidney Pollard on economic policies and traditions. Learning from other countries' experience, as well as understanding how they see their own problems, is increasingly important with 1992 glasnost and the problem of international policy coordination between the USA, Japan, and Germany so high on the agenda. No other book provides such a wide-ranging account of how the industrialized world came to be where it is today.

Capital as Will and Imagination Mark D. Metzler, 2013-04-15. Joseph Schumpeter's conceptions of entrepreneurship, innovation, and creative destruction have been hugely influential. He pioneered the study of economic development and of technological paradigm shifts and was a forerunner of the emerging field of evolutionary economics. He is not thought of as a theorist of credit supercharged high-speed growth, but this is what he became in postwar Japan. As Mark Metzler shows in Capital as Will and Imagination, economists and planners in postwar Japan seized upon Schumpeter's ideas and put them directly to work. The inflationary creation of credit, as theorized by Schumpeter, was a vital but mostly unrecognized aspect of the successful stabilization of Japanese capitalism after World War II and was integral to Japan's postwar success. It also helps to explain Japan's bubble and the global bubbles that have followed it. The heterodox analysis presented in Capital as Will and Imagination goes beyond the economic history of postwar Japan; it opens up a new view of the core circuits of modern capital in general.

The Japanese Enterprise System W. Mark Fruin, 1992. This volume merges four streams of inquiry and interpretation in a study of the evolution and emergence of Japan's leading industrial firms during the twentieth century. First, it is a historical study of how the industrial institutions of modern Japan appeared and matured. Second, it is an organization study of the basic forms of social and economic interaction in Japan. Third, it is a development study of how circumstances of rapid technical and economic change have shaped the Japanese business system. It is also a strategy study of how Japanese managers have responded to and shaped these circumstances. This fourfold synthesis offers a model of institutional development under conditions of late economic development and private initiative that falls somewhere between a capitalist development state

and a free market economy Business policy rather than industrial policy is accentuated revealing asset of robust institutions and a dynamic to activate and interrelate them **Routledge Library Editions: Business and Economics in Asia**

Yoshino, Thomas B.
