**Soil Fertility Evaluation and Control** Charles A. Black,1993-04-27 Soil Fertility Evaluation and Control presents the theoretical background for practical applications of scientific work on soil fertility The book emphasizes the use of response curves as the basic biological standard for both evaluation and control and it discusses soil testing and plant analysis as secondary standards The principal applications covered include fertilizer requirements fertilizer evaluation residual effects fertilizer placement liming and economics of fertilization Environmental aspects of plant nutrients and soil nutrient supplies as they pertain to crop production are also addressed Most of the information in Soil Fertility Evaluation and Control is drawn from world literature which makes it a valuable reference for soil scientists agronomists agriculturalists foresters and others interested in the evaluation and control of soil fertility *Soil Fertility Evaluation and Control* Charles A.

**Soil Fertility Decline in the Tropics** Alfred E. Hartemink,2003 Wide coverage of soils and perennial cropping systems in the tropicsSynthesis of decades of researchChallenges assumptions on the benefits of plantations for soil fertilityIt is generally assumed that soil fertility decline is widespread in the tropics and that this is largely associated with annual cropping and subsistence farming In contrast perennial plant cover as in plantation agriculture provides better protection for the soil This book reviews these concepts focusing on soil chemical changes under different land use systems in the tropics These include perennial crops annual crops and forest plantations Two case studies on sisal plantations in Tanzania and sugar cane in Papua New Guinea are presented for detailed analysis The author demonstrates that soil fertility decline is also a problem on plantations
