Ibrahim A Mirsal Preface to the First Edition

Whoever has enjoyed following the legendary duel between the Egyptian Pharaoh and his magicians Alchemists on one side and Moses and his brother Aaron on the other as is vividly narrated in the Bible must have realised that people at least those living at or near the eternal battlefields of the Middle East have always had knowledge about the terrible consequences of soil pollution by chemicals This knowledge must have existed long before Moses and his Pharaoh Nobody knows when people became aware of this yet it must have been born in very early times reaching back to the dawn of human conscious

Relating the South African soil taxonomy to the World Reference Base for soil resources CW van Huyssteen,2020-12-20

The South African Taxonomic soil classification system SAT is well established and utilised in South Africa However it is not internationally well known and therefore the need arose to provide a tool by which South African soil taxonomists can convert South African soil classifications and profile descriptions to the international classifications of the World Reference Base WRB for soil resources The diagnostics and tacit knowledge presented in this publication are therefore based on the SAT and the WRB When necessary further substantiation was derived from the Land Type Survey of South Africa The adopted procedure is effective in providing a reasonable classification based on the South African soil forms and families while excluding certain WRB soil groups and qualifiers because these are irrelevant to South African taxonomy Lastly this publication also highlights some peculiarities omissions and inconsistencies observed between the SAT and WRB
