Soil Nutrient Availability Y. K. Soon, 1985 Soil chemistry in relation to inorganic nutrition of plants Factors affecting availability of inorganic nutrients in soils with special reference to micronutrient metals The soil model and its application to plant nutrition Role of the organic cycle in fluctuations of crop yield Nutrient pools and their equilibria Organic matter and nutrient supply Radio isotopic and chemical methods of measuring plant available nutrients Physico chemical approach of determining nutrient availability Soil nutrient mobility and transport processes Modifying influence at the soil root interface root physiology and rhizosphere microorganisms **Chemical Bioavailability in Terrestrial Environments**, 2011-08-31 This book begins with an overview of current thinking on bioavailability its definition cutting edge research in speciation and advancement in tools for assessing chemical bioavailability in the terrestrial environment The second section of the book focuses on the role of chemical speciation in bioavailability Section three addresses bioavailability and ecotoxicity of contaminants and leads into the next section on bioavailability of nutrients and agrichemicals Subsequent sections provide an overview of tools currently being used and new cutting edge techniques to assess contaminant bioavailability The last section of the book builds on previous sections in relating bioavailability to risk assessment and how this could be used for managing risks associated with contaminated land Provides the latest information on developing concepts and definitions of bioavailability Includes a discussion of bioavailability and ecotoxicity of contaminants and bioavailability of nutrients and agrichemicals for applications in agriculture Analyzes tools for assessing bioavailability and the role of bioavailability in risk assessment and remediation Practical Handbook of Soil, Vadose Zone, and Ground-Water Contamination J.
