Soils of the North Yorkshire Moors D.M. Carroll,V.C. Bendelow,1981-01-01      **Moorland & Vale-land Farming in North-east Yorkshire** Bryan Waites,1967      **Soil and Water Conservation Policies and Programs** Ted L. Napier,Silvana M. Napier,Jiri Tvrdon,2024-11-01 For as far into the future as we can see governments will probably topple power will continue to exchange hands the climate will undergo continuous change and the global economy will ebb and flow like the oceans But for the world s many diverse countries whether they be highly industrialized or third world one thing will always remain constant the need to solve the planet s pressing soil and water conservation problems as well as implement effective policies But why do some policy initiatives succeed while others fail Soil and Water Conservation Policies and Programs Successes and Failures addresses this very question Based on an international conference held in Prague this book debates the strengths and weaknesses of soil and water conservation initiatives implemented in North America Europe and Australia Soil and water conservation policies in the United States Canada Germany Austria Yugoslavia and other countries are examined through the eyes of technical and soil scientists And the book also addresses specialized topics such as agricultural pollution abatement in Poland and private farmers and contemporary conservation subsidy programs in the Czech Republic With its thorough treatment of the subject matter Soil and Water Conservation Policies and Programs Successes and Failures contributes to resolving one of the world s most pressing conservation issues      Ecology and Management of Forest Soils Dan Binkley,Richard F. Fisher,2012-11-05 Forest soils are the foundation of the entire forest ecosystem and complex long term interactions between trees soil animals and the microbial community shape soils in was that are very distinct from agricultural soils The composition structure and processes in forest soils at any given time reflect current conditions as well as the legacies of decades and even millennia of interactions that shape each forest soil Reciprocal interactions are fundamental vegetation alters soil physical properties which influence soil biology and chemistry which in turn influence the growth and success of plants These dynamic systems may be strongly influenced by intentional and unintentional management ranging from fire to fertilization Sustaining the long term fertility of forest soils depends on insights about a diverse array of soil features and changes over space and time Since the third edition of this successful book many new interests in forest soils and their management have arisen including the role of forest soils in sequestering carbon and how management influences rates of carbon accumulation This edition also expands the consideration of how soils are sampled and characterized and how tree species differ in their influence on soil development Clearly structured throughout the book opens with the origins of forest soil science and ends with the application of soil science principles to land management This new edition provides A completely revised and updated Fourth Edition of this classic textbook in the field A coherent overview of the major issues surrounding the ecology and management of forest soils Global in scope with coverage of soil types ranging from the tropical rainforest soils of Latin America to the boreal forest soils of Siberia New chapters on

Management Carbon sequestration Evidence based approaches and applications of geostatistics GIS and taxonomies A clear overview of each topic informative examples case studies and an overall context for helping readers think clearly about forest soils An introduction to the literature of forest soil science and to the philosophy of forest soil science research This coherent overview of the major issues surrounding the ecology and management of forest soils will be particularly useful to students taking courses in soil science forestry agronomy ecology natural resource management environmental management and conservation as well as professionals in forestry dealing with the productivity of forests and functioning of watersheds
