Smith, 2022-07-15 Excerpt Thirty hours out of Mars for Terra the Solar Queen sped along her silent invisible course No longer was she completely severed from all connection with the planets of the inner system the trick cams that controlled the beams at Venus Equilateral kept the ship centered by sheer mathematics It was a poor communications system however since it was but a one way job Any message answering would have to be done thirty hours later when the ship made

planetfall and the regular terminal office of Interplanetary Communications could be employed In spite of her thirty hours at 2 G which brought her velocity to eleven hundred miles per second the beam director cams did their job well enough It was only in extreme cases of course changing to dodge meteors that the beams lost the ship since the cams were not clairvoyant there was no way to know when the autopilot juggled the controls to miss a bit of cosmic dust The cams continued to spear the space through which the ship was supposed to pass according to the course constants *Pagan Portals - Where Fairies Meet* Daniela Simina,2023-05-26 Traditions surrounding fairies are essentially a cross generational compass that helps young and old to orient themselves into the ever changing cultural landscape As such fairy traditions allow people to position themselves on the time space continuum not only through perpetuation of values but also through connecting deeper with the subtler realms that surround and interpenetrate consensus reality Connecting to subtler realms gives access to a body of knowledge built upon the record of interaction between our world and the Other In Ireland and Romania fairy traditions are alive and evolving The study of the parallelism that exists between bodies of lore past and present from areas diametrically opposed on the map of Europe gives scholars lay people and spiritual seekers access to an everlasting repository of wisdom
