

This car runs only on solar power and wind turbines. On top of the hood are the solar panels which connect to batteries and the motor for power. Under the hood of the car are vents which are angled to take the air that rushes off the bottom of the car. The air then spins two small turbines which also connect to the batteries that power the engine. It can only carry two people and has enough trunk space for an average load of groceries. Your mileage is almost unlimited. As long as the batteries are charged you are free.
