Miller, 2006 Stuart S Miller addresses a number of issues in the history of talmudic Palestine that are at the center of contemporary scholarly debate about the role rabbis played in society In sharp contrast to recent claims that the rabbis were a relatively small and insular group with little influence this book demonstrates that their movement was both more expansive and diffuse than a mere counting of named rabbis suggests It also underscores some of the dynamics that allowed rabbinic circles to spread their teachings and to ultimately consolidate into an effective and productive movement Many overlooked terms and passages in which rabbis and the members of their circles appear in the Talmud Yerushalmi are investigated and special attention is given to the identity of persons who are collectively referred to after their places of residence Tiberians Sephoreans Southerners etc While the results confirm the insular nature of the

interests of the rabbis they also point to the definition and coherence that this insularity provided their movement Therein lies the secret of the success of rabbinic Judaism which never depended upon sheer numbers but rather on the internal strength and sense of purpose of rabbinic circles Subjects that are considered include rabbinic households the identity of the ammei ha arez and their relationship to the rabbis village sages and their connection to urban rabbis and the venue of rabbinic teachings instructions expositions pronouncements and stories **Empire of the Romans** John

Migration and Migrant Identities in the Near East from Antiquity to the Middle Ages Justin Yoo, Andrea Zerbini, Caroline Barron, 2018-10-29 This book brings together recent developments in modern migration theory a wide range of sources new and old tools revisited from GIS to epigraphic studies from stable isotope analysis to the study of literary sources and case studies from the ancient eastern Mediterranean that illustrate how new theories and techniques are helping to give a better understanding of migratory flows and diaspora communities in the ancient Near East A geographical gap has emerged in studies of historical migration as recent works have focused on migration and mobility in the western part of the Roman Empire and thus fail to bring a significant contribution to the study of diaspora communities in the eastern Mediterranean Bridging this gap represents a major scholarly desideratum and by drawing upon the experiences of previously neglected migrant and diaspora communities in the eastern Mediterranean from the Hellenistic period to the early mediaeval world this collection of essays approaches migration studies with new perspectives and methodologies shedding light not only on the study of migrants in the ancient world but also on broader issues concerning the rationale for mobility and the creation and features of diaspora identities

Pearl of the Desert Rubina Raja, 2022 Palmyra has long attracted the attention of the world Even before its rediscovery in the eighteenth century it had gained legendary status because of its third century CE Queen Zenobia who had rebelled against the Romans and expanded Palmyra s territory into that of an Empire stretching from what is modern eastern Turkey into Egypt The city and its queen featured in European art and literature already in the century Zenobia s Palmyra already existed as a mirage in the minds of the educated Europeans Even though Zenobia s reign and extensive power was a fairly short interlude and the Romans struck hard against

the Palmyrenes devastating the city this path to imperial power was one which tells us an immense amount about Palmyrene identity in the period before the devastation While Zenobia has gained renewed interest among both scholars and the press and while she has served as a political symbol for Syria's president Assad a statue of her was recently erected in Damascus the time leading up to her reign still remains underexplored With the current situation in Syria a researched based narrative is urgently needed to communicate the importance of this site to the general public Palmyra has over the last years been used as a symbol of the resistance of the rebels the power of ISIS over the region as well as the supremacy of the Syrian state UNESCO and the Russians have together with the Syrian state taken a particular interest in Palmyra and in monopolizing the potential rebuilding of the site after the destruction and looting of the past several years have subsided We are so to speak standing at yet another turning point in Palmyra's long history where history is being reinvented actively by several parties There can be no doubt that the time is ripe for a book on the archaeology and history of Palmyra as well as an analysis of the current situation including the destruction and illicit trafficking of material remains from Palmyra These three main topics will together highlight the ways in which this fascinating site has again and again captured the world's focus Organized in nine chapters this compact book will set out to provide an introduction for students and general readers Following two overview chapters the next six will give a chronological narrative of Palmyra from the late Hellenistic period through to Rome's destruction in 273 CE and its survival in the Byzantine and medieval Islamic periods The book ends with a shorter conclusion chapter which will summarize the most important findings and conclusions of the chapters of the book and will set out a number of lines of enquiry which could be taken up in research and cultural heritage management over the coming years The result will be the best and most up to date account of Palmyra in English

The Archaeology of Imperial Landscapes Bleda S. Düring, Tessa D. Stek, 2018-03-29 The Archaeology of Imperial Landscapes examines the transformation of rural landscapes and societies that formed the backbone of ancient empires in the Near East and Mediterranean Through a comparative approach to archaeological data it analyses the patterns of transformation in widely differing imperial contexts in the ancient world Bringing together a range of studies by an international team of scholars the volume shows that empires were dynamic diverse and experimental polities and that their success or failure was determined by a combination of forceful interventions as well as the new possibilities for those dominated by empires to collaborate and profit from doing so By highlighting the processes that occur in rural and peripheral landscapes the volume demonstrates that the archaeology of these non urban
