Solution Three:

Solution Three Naomi Mitchison, 1995 A A A As a fast paced novel about a future shaped by feminist ideals of sexual and racial equality solution three at first seems to be a peaceful answer to the world's problems Homosexuality as an international norm and reproduction by cloning have minimized aggression and overpopulation The sexes have equal rights and status racial tension has been eliminated through genetic intermixing and scientists work closely with the governing body the Council to keep an eye on the food supply and to heal the earth of prior environmental terrorism A A A Except in a few outlying areas things seem to be going smoothly But even in the privileged center two women are quietly rebelling Miryam a geneticist is secretly married and rearing her own children Lilac a surrogate mother chosen to carry a clone baby tries to evade releasing him as customary for social conditioning A A A When a mysterious virus appears in distant wheat crops when deviant sects kill a Council member and a Clone when even the Clones exhibit unexpected sexual behaviour Mutumba the strong and wise leader of the Council ponders whether the principle of diversity essential to the food supply might also hold for people What is the cost to women of this new model for reproducing life With Mutumba and others one wonders is it time for a new solution a solution four A A A Originally published in 1975 Mitchison's visionary science fiction presents a world created by both women and men that is far ahead of our own Like Herland Solution Three imagines a society in which women have used reproductive control to shape a more equitable life for all eradicating aggression and providing social support for motherhood Solution Three presents a new more positive vision of science as a realm in which women could indeed make a difference and shape the course of knowledge From the Afterword by Susan M Squier **Exact Solutions in Three-Dimensional Gravity** Alberto A. Design of Heuristic Algorithms for Hard Optimization Éric D. Taillard, 2022-10-29 This open access book demonstrates all the steps required to design heuristic algorithms for difficult optimization The classic problem of the travelling salesman is used as a common thread to illustrate all the techniques discussed This problem is ideal for introducing readers to the subject because it is very intuitive and its solutions can be graphically represented The book features a wealth of illustrations that allow the concepts to be understood at a glance The book approaches the main metaheuristics from a new angle deconstructing them into a few key concepts presented in separate chapters construction improvement decomposition randomization and learning methods Each metaheuristic can then be presented in simplified form as a combination of these concepts This approach avoids giving the impression that metaheuristics is a non formal discipline a kind of cloud sculpture Moreover it provides concrete applications of the travelling salesman problem which illustrate in just a few lines of code how to design a new heuristic and remove all ambiguities left by a general framework Two chapters reviewing the basics of combinatorial optimization and complexity theory make the book self contained As such even readers with a very limited background in the field will be able to follow all the content
