Why the Police Should be Trained by Black People Natasha C. Pratt-Harris, 2022-04-25

Why the Police Should be Trained by Black People aligns scholarly and community efforts to address how Black people are policed. It combines traditional models commonly taught in policing courses with new approaches to teaching and training about law enforcement in the U.S. all from the Black lens. Black law enforcement professionals, seasoned and retired scholars, community members, victims, and others make up the contributors to this training textbook written from the lens of the Black experience. Each chapter describes policing based on the experience of being Black in the U.S. with concern about the life and life chances for Black people. With five sections, readers will be able to: Describe the history and theory of law enforcement; policing and society in Black communities; Critically address how law enforcement and the nature of police work intertwine with race-based societal and governmental norms and within law enforcement administration and management; Understand the variation in pedagogy, recruitment, selection, and training that has impacted the experience of police officers, including Black police officers and Black people in the U.S.; Explore the role of law enforcement as crime control and crime prevention agents as it relates to policing in Black communities and for Black people; Address issues related to race and use of force; misconduct, the law, ethics, values; Assess research, contemporary issues, and the future of law enforcement and policing, especially related to policing of Black people. Why the Police Should be Trained by Black People brings pedagogical and scholarly responsibility for policing in Black communities to life, revealing that police involved violence, community violence, and relative lived experiences do not exist in a vacuum. Written with students in mind, it is essential reading for those enrolled in policing courses, including criminology, criminal justice, sociology, or social work, as well as those undertaking police academy and in-service police training.

Gun Violence Philip J. Cook, Jens Ludwig, 2000-10-26 100 billion dollars. That is the annual cost of gun violence in America, according to the authors of this landmark study, a book destined to change the way Americans view the problem of gun-related violence. Until now, researchers have assessed the burden imposed by gunshot injuries and deaths in terms of medical costs and lost productivity. Here, economists Philip Cook and Jens Ludwig widen the lens, developing a framework to calculate the full costs borne by Americans in a society where both gun violence and its ever-present threat mandate responses that touch every aspect of our lives. All of us, no matter where we reside or how we live, share the costs of gun violence. Whether waiting in line to pass through airport security or paying taxes for the protection of public officials, whether buying a transparent book bag for our children to meet their school's post-Columbine regulations or subsidizing an urban trauma center, the steps we take are many and the expenditures enormous. Cook and Ludwig reveal that investments in prevention, avoidance, and harm reduction, both public and private, constitute a far greater share of the gun violence burden than previously recognized. They also employ extensive survey data to measure the subjective costs of living in a society where there is risk of being shot or losing a loved one or neighbor to gunfire. At the same time, they demonstrate that the problem of gun violence is not intractable. Their review of the available evidence suggests that there are both

additional gun regulations and targeted law enforcement measures that will help This urgently needed book documents for the first time how gun violence diminishes the quality of life for everyone in America In doing so it will move the debate over gun violence past symbolic politics to a direct engagement with the costs and benefits of policies that hold promise for reducing gun violence and may even pay for themselves Fishers Techniques of Crime Scene Investigation First International Edition William J. Tilstone, Michael L. Hastrup, Camilla Hald, 2019-02-13 Barry Fisher s Techniques of Crime Scene Investigation has long been considered the bible of the crime solving profession drawing from the author s 40 year career in forensic science including his time spent as the crime laboratory director for the Los Angeles County Sheriff s Department Now for the first time com *The Politics of Gun Control* Robert J. Spitzer, 2025-08-28 Since its initial publication in 1995 this book has become the classic work on every important element of the tumultuous national gun debate in America This new edition brings together the latest developments and research in gun politics policy law history and criminology to provide a comprehensive and accessible source widely used by scholars journalists and in classrooms In this era of polarized politics this book provides a unique window into how and why that polarization drives our politics Among the new topics covered in this edition are the Supreme Court s new foray into applying history to evaluate modern gun laws the effects of political whipsawing between Democratic and Republican control of government and the consequences of that for gun laws violence and policy New to the Tenth Edition Analysis of the Supreme Court s *Rahimi* decision that for the first time implemented its controversial history based standard for judging the constitutionality of current gun laws Highlights the whiplash between the pro gun policy actions of the Biden administration and the second Trump administration s about face to roll back those initiatives Chronicles the rise and nearly cataclysmic implosion of the once vaunted National Rifle Association as self created problems brought it to the brink of disaster and as legal actions against the NRA finally came to an end Elucidates the scramble of other gun rights groups to replace the NRA as the nation s foremost anti gun law organization Presents new and updated statistical research on gun ownership in America gun related fatalities public opinion support of red flag laws and other gun control measures After a surge in gun violence and gun ownership both have receded to pre pandemic levels and the murder rate continues its decline after a short upsurge Includes new pedagogical features of chapter summaries and discussion questions in each chapter **Weapon of Choice** Ian Ayres, Fredrick E. Vars, 2020-10-27 How ordinary Americans frustrated by the legal and political wrangling over the Second Amendment can fight for reforms that will both respect gun owners rights and reduce gun violence Efforts to reduce gun violence in the United States face formidable political and constitutional barriers Legislation that would ban or broadly restrict firearms runs afoul of the Supreme Court s current interpretation of the Second Amendment And gun rights advocates have joined a politically savvy firearms industry in a powerful coalition that stymies reform Ian Ayres and Fredrick Vars suggest a new way forward We can decrease the number of gun deaths they argue by empowering individual citizens to choose common sense gun reforms for

themselves Rather than ask politicians to impose one size fits all rules we can harness a libertarian approach one that respects and expands individual freedom and personal choice to combat the scourge of gun violence Ayres and Vars identify ten policies that can be immediately adopted at the state level to reduce the number of gun related deaths without affecting the rights of gun owners For example Donna s Law a voluntary program whereby individuals can choose to restrict their ability to purchase or possess firearms can significantly decrease suicide rates Amending red flag statutes which allow judges to restrict access to guns when an individual has shown evidence of dangerousness can give police flexible and effective tools to keep people safe Encouraging the use of unlawful possession petitions can help communities remove guns from more than a million Americans who are legally disqualified from owning them By embracing these and other new forms of decentralized gun control the United States can move past partisan gridlock and save lives now
