Summer 1994 Vol58 No2:

Community Renewal through Municipal Investment Roger L. Kemp, 2015-08-13 Local officials are making investment decisions to enhance the quality of life in their communities and to improve economic development conditions. These new programs are not municipal give aways or as some call them corporate welfare programs but efforts to invest wisely in downtown areas and neighborhoods with the goal of revitalizing them with the hope that business and commerce will follow. This work presents case studies from Atlanta, Baltimore, Baton Rouge, Berkeley, Boulder, Cambridge, Charleston, Chattanooga, Chesterfield County, Chicago, Cleveland, Denver, DuPont, Grand Forks, Hampton, Hartford, Hayward, Houston, Kansas City, Lake Worth, Little Rock, Madison, Minneapolis, Nashville, New Bedford, Newark, Oakland, Orlando, Petaluma, Portland, Saint Paul, Santa Monica, Seattle, Toronto, and Washington D C. The case study topics include streetscapes, public plazas, museums, libraries, cultural parks, walkways, and greenways, major infrastructure improvements, transit, and transportation enhancements and other works. *Social Security Bulletin*, 1996

Mexico Is Not Colombia Christopher Paul, Colin P. Clarke, Chad C. Serena, 2014-06-25 Drug related violence has become a very serious problem in Mexico. Of particular concern to U S policymakers, violent drug trafficking organizations produce transship and deliver tens of billions of dollars worth of narcotics into the United States annually. The activities of these organizations are not confined to drug trafficking; they extend to such criminal enterprises as human trafficking, weapon trafficking, kidnapping, money laundering, extortion, bribery, and racketeering. Then there is the violence. Recent incidents have included assassinations of politicians and judges, attacks against rival organizations, associated civilians, and the police and other security forces, and seemingly random violence against innocent bystanders. Despite the scope of the threat to Mexico's security, these groups are not well understood and optimal strategies to combat them have not been identified. Comparison between Mexico and Colombia is a tempting and frequently made analogy and source for policy recommendations. A series of historical case studies offers a foundation for a more thorough comparative assessment. Regions around the world have faced similar challenges and may hold lessons for Mexico. One point is clear, however: Mexico is not Colombia. As the historical record shows, Mexico is not particularly like any other case characterized by warlordism, resource insurgency, ungoverned spaces, and organized crime. Despite the lack of a perfectly analogous case, Mexico stands to benefit from historical lessons and efforts that were correlated with the greatest improvements in countries facing similar challenges. A companion volume, *Mexico Is Not Colombia: Alternative Historical Analogies for Responding to the Challenge of Violent Drug Trafficking Organizations*, describes the study's approach to assessing each historical case and presents findings from the overall analyses.

The Criminal-Terror Nexus in Chechnya Jeff Meyers, 2017-04-12 The line between criminal and terrorist groups is often blurred, and Chechen groups are an excellent example of this new phenomenon. As the Soviet Union collapsed, groups began to fill the cracks, offering services that the state could not. The Chechens were one group that outvalued many groups and

they soon became synonymous throughout the Russian Federation with criminal This work looks into the historical social and religious reasons behind the rise of militant Islam in the region From there it will discuss the historical difference between organized crime and terror how the two have coalesced into the crime terror nexus and how the Chechens compare to two other groups that have gone through the same evolution The Sicilian mafia and the militant Islamic Movement of Uzbekistan or IMU Though neither group are exactly the same there are links that can help the reader understand the domestic and foreign problems that twenty first century nation states deal with throughout the world Nominations to the Department of Commerce and the Consumer Product Safety Commission United States. Ramet a veteran observer of the Yugoslav scene traces the steady deterioration of Yugoslavia's political and social fabric in the years since 1980 arguing that while the federal system and multiethnic fabric laid down fault lines the final crisis was sown in the failure to resolve the legitimacy question triggered by economic deterioration and pushed forward toward war by Serbian politicians bent on power either within a centralized Yugoslavia or within an ethnically cleansed Greater Serbia With her detailed knowledge of the area and extensive fieldwork Ramet paints a strikingly original picture of Yugoslavia's demise and the emergence of the Yugoslav successor states

Let the People Rule Geoffrey Cowan, 2015-12-31 The best new discussion of the primary system Jill Lepore author of *These Truths* In 1912 Theodore Roosevelt came out of retirement to challenge William Howard Taft for the Republican nomination TR seized on the campaign theme Let the People Rule a cry echoed in today's elections and through the course of his run helped create thirteen new primaries Though he won most of the primaries party bosses proved too powerful and Roosevelt walked out of the convention to create his own Bull Moose Party only to make the shocking political calculation to ban black delegates from his new coalition In *Let the People Rule* Geoffrey Cowan takes readers inside the dramatic campaign that changed American politics forever

Planning Theory for Practitioners Michael Brooks, 2019-07-09 This book is recommended reading for planners preparing to take the AICP exam In this new book the author bridges the gap between theory and practice The author describes an original approach Feedback Strategy that builds on the strengths of previous planning theories with one big difference it not only acknowledges but welcomes politics the bogeyman of real world planning Don't hold your nose or look the other way the author advises planners but use politics to your own advantage The author admits that most of the time planning theory doesn't have much to do with planning practice These ideas rooted in the planner's real world are different This strategy employs everyday political processes to advance planning trusts planners personal values and professional ethics and depends on their ability to help clients articulate a vision This volume will encourage not only veteran planners searching for a fresh approach but also students and recent graduates dismayed by the gap between academic theory and actual practice

The Problem with Survey Research George Beam, 2017-09-08 The Problem with Survey Research makes a case against survey research as a primary source of reliable information George Beam argues that all survey research instruments all types of asking including polls face to face interviews and focus groups produce unreliable and potentially inaccurate results Because those who rely on survey research only see answers to questions it is impossible for them or anyone else to evaluate the results They cannot know if the answers correspond to respondents actual behaviors objective phenomena or to their true beliefs and opinions subjective phenomena Reliable information can only be acquired by observation experimentation multiple sources of data formal model building and testing document analysis and comparison In fifteen chapters divided into six parts Ubiquity of Survey Research The Problem Asking Instruments Asking Settings Askers and Proper Methods and Research Designs The Problem with Survey Research demonstrates how asking instruments settings in which asking and answering

take place and survey researchers themselves skew results and thereby make answers unreliable The last two chapters and appendices examine observation other methods of data collection and research designs that may produce accurate or correct information and shows how reliance on survey research can be overcome and must be
