Political Misinformation in the Digital Age During a Pandemic: Partisanship, Propaganda, and Democratic Decision-Making Andrea De Angelis,Christina E. Farhart,Eric Merkley,Dominik A. Stecula,2022-06-29 *Misinformation Matters* Uyiosa Omoregie,Kirsti Ryall,2023-04-19 What is misinformation Why does it matter How does it spread on the internet especially on social media platforms What can we do to counteract the worst of its effects Can we counteract its effects now that it is ubiquitous These are the questions we answer in this book We are living in an information age specifically an algorithmic age which prioritizes information quantity over quality Social media has brought billions of people from across the world together online and the impact of diverse platforms such as Facebook WeChat Reddit LinkedIn Signal WhatsApp Gab Instagram Telegram and Snapchat has been transformational The internet was created with the best of intentions as an online space where written content could be created consumed and diffused without any real intermediary This empowering aspect of the web is still mostly a force for good People on the whole are better informed and online discussion is more inclusive because barriers to participation are reduced As activity online has grown however an expanding catalogue of research reveals a darker side to social media and the internet generally Namely misinformation s ability to negatively influence our behaviour both online and offline The solution we provide to this growing dilemma is informed by Ludwig Wittgenstein s *Tractatus Logico Philosophicus* which examines the relationship between language and reality from a philosophical perspective and complements Claude

Shannon's Information Quantity Theory which addresses the quantification storage and communication of digital information from a mathematical perspective The book ends by setting out a model designed by us a Wittgensteinian approach to information quality It defines content published online by clarifying the propositions and claims made within it Our model's online information quality check allows users to effectively analyse the quality of trending online content This approach to misinformation analysis and prevention has been designed to be both easy to use and pragmatic It upholds freedom of speech online while using the harm principle to categorise problematic content *Navigating Fake News, Alternative Facts, and Misinformation in a Post-Truth World* Dalkir, Kimiz, Katz, Rebecca, 2020-02-28 In the current day and age objective facts have less influence on opinions and decisions than personal emotions and beliefs Many individuals rely on their social networks to gather information thanks to social media's ability to share information rapidly and over a much greater geographic range However this creates an overall false balance as people tend to seek out information that is compatible with their existing views and values They deliberately seek out facts and data that specifically support their conclusions and classify any information that contradicts their beliefs as false news *Navigating Fake News Alternative Facts and Misinformation in a Post Truth World* is a collection of innovative research on human and automated methods to deter the spread of misinformation online such as legal or policy changes information literacy workshops and algorithms that can detect fake news dissemination patterns in social media While highlighting topics including source credibility share culture and media literacy this book is ideally designed for social media managers technology and software developers IT specialists educators columnists writers editors journalists broadcasters newscasters researchers policymakers and students [Dive into Misinformation Detection](#) Asif Ekbal, Rina Kumari, 2024-05-27 This book delivers a brief introduction to misinformation and various novel approaches for solving misinformation detection problems It considers all kinds of false information as fake news or misinformation and uses the terms fake news and misinformation interchangeably in text images audio and video The primary purpose is to provide a foundation for the problems of misinformation or false content detection including various challenges and approaches to solve them The book starts with an overall description of misinformation It briefly introduces the history various issues or challenges reasons for creating and spreading misinformation and its impact on individuals and society The second chapter discusses prior works on misinformation detection and explores various datasets recent advancements and state of the art mechanisms Chapter three demonstrates that the presence of surprising content in a story draws instant attention and appeals to strong emotional stimuli and subsequently explores the application of novelty and emotion in the misinformation detection domain Next chapter four first introduces multitasking and discusses its advantages before developing a framework for joint learning of interrelated tasks such as emotion recognition novelty detection and misinformation detection The fifth chapter explores various datasets and mechanisms leveraging multimodal information and eventually explains the fusion mechanisms of text and image modalities to obtain an efficient multimodal feature that

ultimately helps to classify multimedia fake news Chapter six discusses how novelty and emotion can be helpful in multimodal misinformation detection It shows that detecting misleading information is difficult without earlier knowledge about that particular news and explores the possible solutions to tackle this problem Eventually chapter seven introduces the concept of multilingualism and implements an effective neural model to detect fabricated multilingual information which overcomes the research and development gap in misinformation detection for regional languages The final chapter eight briefly summarizes the presented results This book is mainly written for researchers and graduate students specializing in fake news search and detection as well as for industry professionals who need to explore various dimensions of misinformation detection regardless of their past knowledge and experience *Amazing... But False!* David Diefendorf, 2007
