Southern Literature and Literary Theory Jefferson Humphries,1992-07-01 In this stimulating collection of essays twenty scholars apply new theoretical approaches to the fiction and poetry of southern writers ranging from Poe to Dickey from Faulkner to Hurston Departing from earlier traditions of southern literary scholarship this book seeks not to create a new orthodoxy but to suggest the diversity of critical tools that can now be used to explore the literature and culture of the South Including essays based on deconstructionist feminist and Marxist theory the book features contributions from such critics as Henry Louis Gates Harold Bloom Fred Chappell and Joan DeJean Yet for all their variety the essayists share the same central concern We have in common writes Jefferson Humphries one thing that sets us apart from our elders in our conception of the South and our approach to southern literature the basic assumption that the meaning and significance of literature is not in the immanence of the literary object or in history but in the complex ways in which the literary the historical and all the human sciences that study both are interrelated Instead of simply taking the South for granted the contributors to this volume see it as a text and an idea as something whose ideological underpinnings complexities and contradictions must be subjected to close reading and questioning Southern Literature and Literary Theory represents a major effort to redefine the relationship of southern writing and the South itself to the larger world

The Intellectual in Twentieth-Century Southern Literature Tara Powell,2012-01-09 Never in its long history has the South provided an entirely comfortable home for the intellectual In this thought provoking contribution to the field of southern studies Tara Powell considers the evolving ways that major post World War II southern writers have portrayed intellectuals from Flannery O Connor s ironic view of interlockchuls to Gail Godwin s southerners striving to feel at home in the academic world Although Walker Percy like his fellow Catholic writer O Connor explicitly rejected the intellectual label for himself he nonetheless introduced the modern novel of ideas to southern letters Powell shows by placing sympathetic non caricatured intellectuals at the center of his influential works North Carolinians Doris Betts and her student Tim McLaurin made their living teaching literature and creative writing in academia and Betts s fiction often includes dislocated academics while McLaurin s superb memoirs often funny frequently point up the limitations of the mind as opposed to the heart and the spirit Examining works by Ernest Gaines Alice Walker and Randall Kenan Powell traces the evolution of the black American literacy narrative from a stress on the post Emancipation conviction which saw formal education as an essential means of resisting oppression to the growing suspicion in the post civil rights era of literacy acts that may estrange educated blacks from the larger black community Powell concludes with Godwin who embraces university life in her fiction as she explores what it means to be a southern female intellectual in the modern world a world in which all those markers inscribe isolation

The Evolution of Southern Culture Numan V. Bartley,1988 The American South has long been a subject of endless scholarly fascination

Historians and social scientists have endeavored to decipher the enigma of the region and to identify the formative factors that have molded the southern experience. They have searched for a central theme that would explain southern behavior and have debated the extent to which the region was distinctive from the rest of the nation. More recently, historical scholarship has shown a growing interest in the evolution of southern culture and the forces that shaped it. The southern enigma is yet to be fully deciphered, but *The Evolution of Southern Culture* addresses questions crucial to an understanding of the region's history. The book brings together original searching essays by nine of the nation's most distinguished scholars: Immanuel Wallerstein, Eugene D. Genovese, Elizabeth Fox-Genovese, Eric Foner, Nell Irvin Painter, George M. Fredrickson, Joel Williamson, Bertram Wyatt Brown.

A History of the Literature of the U.S. South: Volume 1 Harilaos Stecopoulos, 2021-05-20. *A History of the Literature of the U.S. South* provides scholars with a dynamic and heterogeneous examination of southern writing from John Smith to Natasha Trethewey. Eschewing a master narrative limited to predictable authors and titles, the anthology adopts a variegated approach that emphasizes the cultural and political tensions crucial to the making of this regional literature. Certain chapters focus on major white writers, e.g., Thomas Jefferson, William Faulkner, the Agrarians, Cormac McCarthy, but a substantial portion of the work foregrounds the achievements of African American writers like Frederick Douglass, Zora Neale Hurston, and Sarah Wright to address the multiracial and transnational dimensions of this literary formation. Theoretically informed and historically aware, the volume's contributors collectively demonstrate how southern literature constitutes an aesthetic, cultural, and political field that richly repays examination from a variety of critical perspectives.

Ecocriticism and the Future of Southern Studies Zackary Vernon, 2019-08-14. As the planet faces ever-worsening disruptions to global ecosystems—carbon and chemical emissions, depletions of the ozone layer, the loss of biodiversity, rising sea levels, air toxification, and worsening floods and droughts—scholars across academia must examine the cultural effects of this increasingly postnatural world. That task proves especially vital for southern studies, given how often the U.S. South serves as a site for large-scale damming initiatives like the TVA, disasters on the scale of Hurricane Katrina and the Deepwater Horizon spill, and the extraction of coal, oil, and natural gas. *Ecocriticism and the Future of Southern Studies* is the first book-length collection of scholarship that applies interdisciplinary environmental humanities research to cultural analyses of the U.S. South. Sixteen essays examine novels, nature writing, films, television, and music that address a broad range of ecological topics related to the region, including climate change, manmade and natural environments, the petroleum industry, food cultures, waterways, natural and human-induced disasters, waste management, and the Anthropocene. Edited by Zackary Vernon, this volume demonstrates how the greening of southern studies, in tandem with the southernization of environmental studies, can catalyze alternative ways of understanding the connections between regional and global cultures and landscapes. By addressing ecological issues central to life throughout the South, *Ecocriticism and the Future of Southern Studies* considers the confluence between region and environment while also illustrating the growing

need to see environmental issues as matters of social justice *Henry Adams & the Southern Question* Michael O'Brien, 2007 Strictly the Southerner had no mind he had temperament He was not a scholar he had no intellectual training he could not analyze an idea and he could not even conceive of admitting two This judgment rendered in *The Education of Henry Adams* may be the most quoted of Adams's writings on the South However it is far from the only one of his beliefs that helped to shape a national outlook on the region from the late antebellum period to the present Thinking about the South says Michael O'Brien was part of being an Adams In this book O'Brien shows how Adams grandson of President John Quincy Adams and great grandson of President John Adams looked at the region during various phases of his life O'Brien explores the cultural and familial impulses behind those views and locates them in American intellectual history He begins with the young Henry Adams who served as his father's secretary in the House of Representatives during the secession crises of 1860 1861 and in the American embassy in London during and after the Civil War until 1868 O'Brien then covers a number of topics relevant to Adams's outlook on the South including his residency in that deceptively southern city Washington D C his journalism on the Reconstruction era South his biographical or historical works on the Virginians John Randolph Thomas Jefferson and James Madison and his two novels especially *Democracy* Finally O'Brien ponders the vein of southern self criticism exemplified by Wilbur J. Cash's *Mind of the South* that embraces the notorious slur so often quoted from *The Education of Henry Adams*

Law and Letters in American Culture Robert A. Ferguson, 1984 The role of religion in early American literature has been endlessly studied the role of the law has been virtually ignored Robert A. Ferguson's book seeks to correct this imbalance With the Revolution Ferguson demonstrates the lawyer replaced the clergyman as the dominant intellectual force in the new nation Lawyers wrote the first important plays novels and poems as gentlemen of letters they controlled many of the journals and literary societies and their education in the law led to a controlling aesthetic that shaped both the civic and the imaginative literature of the early republic An awareness of this aesthetic enables us to see works as diverse as Jefferson's *Notes on the State of Virginia* and Irving's burlesque *History of New York* as unified texts products of the legal mind of the time The Declaration of Independence the Constitution and the great political orations were written by lawyers and so too were the literary works of Trumbull Tyler Brackenridge Charles Brockden Brown William Cullen Bryant Richard Henry Dana Jr and a dozen other important writers To recover the original meaning and context of these writings is to gain new understanding of a whole era of American culture The nexus of law and letters persisted for more than a half century Ferguson explores a range of factors that contributed to its gradual dissolution the yielding of neoclassicism to romanticism the changing role of the writer the shift in the lawyer's stance from generalist to specialist and from ideological spokesman to tactician of compromise the onslaught of Jacksonian democracy and the problems of a country torn by sectional strife At the same time he demonstrates continuities with the American Renaissance And in Abraham Lincoln he sees a memorable late flowering of the earlier tradition *Gardenland* Jennifer Wren Atkinson, 2018-08-01 Garden writing is

not just a place to find advice about roses and rutabagas it also contains hidden histories of desire hope and frustration and tells a story about how Americans have invested grand fantasies in the common soil of everyday life Gardenland chronicles the development of this genre across key moments in American literature and history from nineteenth century industrialization and urbanization to the twentieth century rise of factory farming and environmental advocacy to contemporary debates about public space and social justice even to the consideration of the future of humanity's place on earth In exploring the hidden landscape of desire in American gardens Gardenland examines literary fiction horticultural publications and environmental writing including works by Charles Dudley Warner Henry David Thoreau Willa Cather Jamaica Kincaid John McPhee and Leslie Marmon Silko Ultimately Gardenland asks what the past century and a half of garden writing might tell us about our current social and ecological moment and it offers surprising insight into our changing views about the natural world along with realms that may otherwise seem remote from the world of leeks and hollyhocks
