
THE DYING CHILD

The Management of the
Child or Adolescent Who is Dying

WILLIAM M. EASSON, M.D.

*Professor and Chairman
Department of Psychiatry
Medical College of Ohio at Toledo
Toledo, Ohio*

Death — universal, inevitable, and incomprehensible — can never be fully understood by the human mind, yet the death of a child is especially difficult to comprehend and to manage. The death of a child or adolescent seems to be against the laws of nature and man. These young people are just beginning to live when life is taken from them; they are just starting to be actively productive when their activity is stilled forever. Difficulty may arise when trying to deal meaningfully with a dying child or adolescent without adding further to the burden of this young person.

Nursing Care of the General Pediatric Surgical Patient Barbara Vollenhover Wise, 2000 While managed care has reduced the length of hospital stays for pediatric as well as older patients nurses still mercifully recognize the unique needs of children undergoing surgery Following chapters on psychological preparation of the patient and their parents and other special considerations s **Handbook of Child Psychopathology** Thomas H. Ollendick, 2013-11-11 In our first edition of the Handbook in 1983 we noted that child psychopathology should no longer be viewed simply as a downward extension of adult psychopathology Rather we suggested that children must be viewed as children not as miniature adults and that a merger of clinical child psychology and developmental psychology must occur in order for this objective to be realized Now 6 years later we are sufficiently encouraged to assert that this synthesis at least on a conceptual level is well under way Yet much growth remains to be seen along practical lines The real test of the synthesis of these two fields of study will be evidenced on the battlefield that is the front line of clinical practice Just how integrated clinical child psychology and developmental psychology really are remains to be seen Nonetheless progress is well under way Careful attention to developmental and other contextual issues guided us in our efforts to solicit contributors for this second edition All the contributors are active researchers and clinicians in the area of child psychopathology and all are keenly aware of the subtle nuances and special considerations of clinical and developmental psychology as they relate to child behavior problems In

addition all the contributors are empirically minded as a result the chapters are data based and represent some of the most up to date knowledge currently available However as research based knowledge is more abundant and conclusive in some topic areas than in others the chapters vary in length and scope
