Improving the Social Security Disability Decision Process Institute of Medicine, Board on Military and Veterans Health, Committee on Improving the Disability Decision Process: SSA's Listing of Impairments and Agency Access to Medical Expertise, 2007-06-14 The Social Security Administration SSA provides Social Security Disability Insurance SSDI benefits to disabled persons of less than full retirement age and to their dependents

SSA also provides Supplemental Security Income SSI payments to disabled persons who are under age 65 For both programs disability is defined as a medically determinable physical or mental impairment that prevents an individual from engaging in any substantial gainful activity and is expected to last at least 12 months or result in death Assuming that an applicant meets the nonmedical requirements for eligibility e g quarters of covered employment for SSDI income and asset limits for SSI the file is sent to the Disability Determination Services DDS agency operated by the state in which he or she lives for a determination of medical eligibility SSA reimburses the states for the full costs of the DDSs The DDSs apply a sequential decision process specified by SSA to make an initial decision whether a claim should be allowed or denied If the claim is denied the decision can be appealed through several levels of administrative and judicial review On average the DDSs allow 37 percent of the claims they adjudicate through the five step process A third of those denied decide to appeal and three quarters of the appeals result in allowances Nearly 30 percent of the allowances made each year are made during the appeals process after an initial denial In 2003 the Commissioner of Social Security announced her intent to develop a new approach to disability determination In late 2004 SSA asked the Institute of Medicine IOM to help in two areas related to its initiatives to improve the disability decision process 1 Improvements in the criteria for determining the severity of impairments and 2 Improvements in the use of medical expertise in the disability decision process This interim report provides preliminary recommendations addressing the three tasks that relate to medical expertise issues with a special focus on the appropriate qualifications of medical and psychological experts involved in disability decision making After further information gathering and analyses of the effectiveness of the disability decision process in identifying those who qualify for benefits and those who do not the committee may refine its recommendations concerning medical and psychological expertise in the final report The final report will address a number of issues with potential implications for the qualifications of the medical experts involved in the disability decision process

Improving the Social Security Disability Decision Process Committee on Improving the Disability Decision Process: SSA's Listing of Impairments and Agency Access to Medical Expertise, 2005-12-21 The Institute of Medicine IOM Committee on Improving the Disability Decision Process has been working since it first met in January 2005 to develop recommendations to the Social Security Administration SSA on how to improve the medical aspects of its disability determination process By law Social Security can only pay benefits to those unable to engage in substantial gainful activity because of a medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months emphasis added Medical and psychological expertise is critical both in developing the criteria for measuring the severity and functional impact of an impairment or impairments on an applicant's ability to work and in applying the criteria to individual cases where the medical evidence does not clearly meet the criteria in the eyes of a nonmedical disability examiner

Functional Assessment for Adults with Disabilities National Academies of Sciences, Engineering, and

Medicine, Health and Medicine Division, Board on Health Care Services, Committee on Functional Assessment for Adults with Disabilities, 2019-07-31 The U S Social Security Administration SSA provides disability benefits through the Social Security Disability Insurance SSDI and Supplemental Security Income SSI programs To receive SSDI or SSI disability benefits an individual must meet the statutory definition of disability which is the inability to engage in any substantial gainful activity SGA by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months SSA uses a five step sequential process to determine whether an adult applicant meets this definition Functional Assessment for Adults with Disabilities examines ways to collect information about an individual's physical and mental cognitive and noncognitive functional abilities relevant to work requirements This report discusses the types of information that support findings of limitations in functional abilities relevant to work requirements and provides findings and conclusions regarding the collection of information and assessment of functional abilities relevant to work requirements

Improving the Measurement of Late-Life Disability in Population Surveys National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Population, Committee on National Statistics, 2009-11-29 Improving the Measurement of Late Life Disability in Population Surveys summarizes a workshop organized to draw upon recent advances to improve the measurement of physical and cognitive disability in population surveys of the elderly population The book questions whether or not the measures of activities of daily living and instrumental activities of daily living used in many population surveys are sufficient as the primary survey based indicators of late life disability If not should they be refined or should they be supplemented by other measures of disability in surveys If yes in what ways should disability measures be changed or modified to produce population estimates of late life disability and to monitor trends The book also discusses what further research is needed to advance this effort

Disability Through the Life Course Tamar Heller, Sarah Parker Harris, 2012 The SAGE Reference Series on Disability is a cross disciplinary and issues based series incorporating links from varied fields that make up Disability Studies This volume tackles issues relating to disability through the life course

Clinical Guide to Mental Disability Evaluations Liza Gold, Donna L. Vanderpool, 2013-01-11 Disability evaluations are the most common clinical mental health evaluations conducted for nontreatment purposes They place mental health professionals in the role of communicating information that is typically confidential to administrative and legal systems Unfortunately mental health professionals receive little to no training in conducting assessments that focus on disability and disability management and often do not understand the implications and risks of providing this information especially without conducting what are often specialized evaluations Clinical Guide to Mental Health Disability Evaluations is geared for general mental health practitioners providing them with the basic information needed to competently provide the various types of disability evaluations It also provides enough information to inform forensic mental health providers in conducting more specialized
