The Dynamics Of The Breakthrough In Eastern Europe The Pol:

The Dynamics of the Breakthrough in Eastern Europe Jadwiga Staniszkis, 2023-11-15 Understanding the dramatic political social and economic changes that have taken place in Poland in the mid 1980s is one key to predicting the future of the communist bloc Jadwiga Staniszkis an influential internationally known expert on contemporary trends in Eastern Europe provides an insider's analysis that deserves the attention of all scholars interested in the region Staniszkis presents the breakthrough of 1989 as a consequence not only of systemic contradictions within socialism but also of a series of chance events These events include unique historical circumstances such as the emergence of the globalist faction in Moscow with its new world system perception of crisis and the discovery of the round table technique as a productive ritual of communication imitated all over Eastern Europe After describing the development collapse and reorganization of a new center in Poland in 1989-1990 she discusses the first attempt at privatizing the economy Her analysis of the dilemmas accompanying breakthrough and transition is an invaluable guide to the challenges that face both capitalism and democracy in Eastern Europe Understanding the dramatic political social and economic changes that have taken place in Poland in the mid 1980s is one key to predicting the future of the communist bloc Jadwiga Staniszkis an influential internationally known expert on contemporary

Out of the Red Mitchell Alexander Orenstein, 2001 A comprehensive parallel study of two critical East Central European transition economies **Between Utopia and Disillusionment** Henri Vogt, 2005 Scholarly interpretations of the collapse of communism and developments thereafter have tended to be primarily concerned with people's need to rid themselves of the communist system of their past The expectations dreams and hopes that ordinary Eastern Europeans had when they took to the streets in 1989 and have had ever since have therefore been overlooked and our understanding of the changes in post communist Europe has remained incomplete Focusing primarily on five key areas such as the heritage of 1989 revolutions ambivalence disillusionment individualism and collective identities this book explores the expectations and goals that ordinary Eastern Europeans had during the 1989 revolutions and the decade thereafter and also the problems and disappointments they encountered in the course of the transformation The analysis is based on extensive interviews with university students and young intellectuals in the Czech Republic Eastern Germany and Estonia in the 1990s which in themselves have considerable value as historical documents The Danwei Xiaobo

Lü, Elizabeth J. Perry, 2015-02-24 The danwei or work unit occupies a central place in Chinese society To understand Chinese politics demands a better understanding of this system This volume provides a systematic study of the danwei system and addresses a variety of questions from historical and comparative perspectives *Cultural Formations of Post-Communism* Michael D. Kennedy, 2002 *Poland* George Sanford, 2012-12-06 Poland pioneered the collapse of communism in Eastern Europe Domestic reformism and the negotiated abdication of ruling elites in 1989 have structured the country's politics in the 1990s But the division between the communist and Solidarity camps continues to cause problems for a potential reform

coalition aiming to complete modernisation through the restructuring required for EU membership. Secular Catholic and rural urban conflicts and well as the growing regional split between the north west and south east have fragmented political life and the party system. Nevertheless Poland has made remarkable steps in the consolidation of democracy and the development of her political system whilst maintaining social stability she is also successfully transcending her historical security dilemma of open western and eastern frontiers and stronger aggressive neighbours by embedding herself in Europe through membership of NATO and the EU. Poland is overcoming her historical problems.

A Handbook of Work and Organizational Psychology De Charles, P J D Drenth, THIERRY HENK, 2013-05-24. Organizational processes and the organization environment interaction are discussed in this volume of the Handbook of Work and Organizational Psychology. Both organizational and environmental characteristics affect the behaviour of individuals and groups but such characteristics are in turn also influenced by behavioural features. This volume on organizational psychology covers subject areas such as organization theory, organizational culture and change, leadership, decision making and participation, motivation and satisfaction, payment systems, effective communication and social organizational aspects of automation. The final chapter describes the impact upon behaviour and attitudes of the transition of a socialist led society to a market economy.

Continuities in Poland's Permanent Transition H. Wydra, 2001-02-02. This book examines change in post 1989 Poland by linking it analytically to the continuity of Poland's past. It argues that the first reality of objective institutional change is underpinned by the continuity of second realities. Based on an interdisciplinary analysis of the Polish case, this study proposes a new conceptual framework for the study of transitional societies and revises standard assumptions in transitology and democratization studies.

Global Ethnography Michael Burawoy, 2000-10. At last world com meets ethnography. Eudora. This book shows how ethnography can have a global reach and a global relevance. Its humanistic and direct methods actually made more not less relevant by recent developments in global culture and economy. Globalisation is not a singular unilinear process fatalistically unfolding towards inevitable ends. It entails gaps, contradictions, counter tendencies and marked unevenness. And just as capital flows more freely around the globe so do human ideas and imaginings. Glimpses of other possible futures. These elements all interact in really existing sites, situations and localities, not in outer space or near earth orbit. Unprefigurally they are taken up into all kinds of local meanings, makings by active humans struggling and creating with conditions on the ground so producing new kinds of meanings and identities themselves up for export on the world market. This book conceptually rich, empirically concrete shows how global neo liberalism spawns a grounded globalisation ethnographically observable out of which is emerging the mosaic of a new kind of global civil society. As this book so richly shows tracing the lineaments of these possibilities and changes is the special province of ethnography. Paul Willis, author of *Learning to Labor* and editor of the journal *Ethnography*. The authors of *Global Ethnography* bring globalization down to earth and show us how it impacts the everyday lives of Kerala nurses, U S homeless recyclers, Irish software programmers.

Hungarian welfare recipients Brazilian feminists and a host of other protagonists in a global postmodern world This is superb ethnography refreshing and vivid descriptions grounded in historical and social contexts with important theoretical implications Louise Lamphere President of the American Anthropological Association The global inhabits and constitutes specific structuration of the political economic cultural and subjective How to study this is a challenge Global Ethnography makes an enormous contribution to this effort Saskia Sassen author of Globalization and Its Discontents This fascinating volume will quickly find its place in fieldwork courses but it should also be read by transnationalists and students of the political economy economic sociologists methodologists of all stripes and doubting macrosociologists Herbert J Gans Robert S Lynd Professor of Sociology Columbia University Not only matches the originality and quality of Ethnography Unbound but raises the ante by literally expanding the methodological and analytical repertory of ethnographic sociology to address the theoretical and logistical challenges of a globalized discipline and social world Judith Stacey author of In the Name of the Family Rethinking Family Values in the Postmodern Age In the best traditions of radical Berkeley scholarship Burawoy's collective recaptures the ground s of an engaged sociology embedded in the cultural politics of the global without losing the ethnographer's magic the local touch Nancy Scheper Hughes author of Death without Weeping **Uncertain Transition** Michael Burawoy, Katherine Verdery, 2000-01-01 The ethnographies collected here offer a surprising and compelling picture of change in Russia and Eastern Europe found in no other book to date Looking at the everyday processes by which individuals and groups forge new lives the authors challenge the idea that we can understand this transformation by the predictable models whether capitalism post socialism modernity or postmodernity The collection brings together a wide ranging group of authors from sociology anthropology and political science to reveal the complex relationships that still exist between the former socialist world and the world today Through evocative ethnographic research and writing they bring to light the unintended consequences of change and show how the slates of the past enter the present not as legacies but as novel adaptations Often what appear as restorations of patterns familiar from socialism are something quite different direct responses to the new market initiatives By showing the unexpected ways in which these new patterns are emerging this book charts a new and important course for the study of post socialist transition
