Conspiracies Andy Thomas, 2012-01-01 At any time in our history you will find significant and seemingly indisputable events occurring the kind that can change the course of our lives the assassination of President John F Kennedy the terrorist attacks of 9 11 Yet for every one of them somebody somewhere will loudly dispute the official account doubting that the truth has been told In today's environment with trust in authorities at an all time low conspiracy theories have found a new currency and websites and social networking ensure they receive a wider and more rapid spread than ever before But how do we separate truth from imagination Was Princess Diana murdered as many people think despite all the official denials Did NASA really go to the Moon when anomalies in the photographic record suggest otherwise Could 9 11 really have been set up by agencies within the USA itself The author opens the conspiracy casebook by examining the mindset of those who believe in conspiracies and considers whether the dismissive attitude towards them has been fair Part Two looks into history to establish that conspiracies do occur credibility should therefore be given to belief in

some of the alleged plots and cover ups of today This leads into a well argued examination of some of the most popular conspiracies of our times including theories over assassinations UFO cover ups and widely voiced concerns over 9 11 and the New World Order Part Three draws the conclusion that while not all conspiracy theories can be proven they do at least draw attention to paths not to take and can be valuable in helping to create a better world where new trust and hope can be forged Are we living in a world of control of oppression of habitual deception Is this really how things are or simply human nature massively distorted through a dark lens The truth probably lies somewhere in the middle
