The Great American Blow Up Puffery In Advertising And Selling By:

The Great American Blow-Up Ivan L. Preston, 1996-08-01 How does advertising really work This thoroughly revised edition of Ivan Preston's popular classic *The Great American Blow Up* provides new examples of puffery and deceit in advertising Preston examines in detail the role of laws and the Federal Trade Commission in ensuring fair representation of goods and services to consumers In a new concluding chapter Preston describes and assesses developments in the field of advertising from the mid 1970s to the present

Deceptive Advertising Jef Richards, 2013-12-16 This is the first book designed to assist behavioral scientists in the preparation of scholarly or applied research regarding deceptive advertising which will ultimately affect public policy in this area Because there was an inadequate foundation upon which to build a program of research for this topic a three part solution has been devised 1 a review of how deception is viewed and regulated 2 a theory of how consumers process deceptive information 3 a sensitive and consistent means of measuring deceptiveness This text provides detailed discussions regarding the intersection of law and behavioral science and its application to deceptive advertising In so doing it offers a solid foundation upon which to base expanded behavioral research into how consumers are deceived by advertising claims and what cognitive processes are involved in that deception Law, Pragmatism, and Democracy

Richard A. Posner, 2009-07-01 Posner argues for a conception of the liberal state based on pragmatic theories of government He emphasizes the institutional and material rather than moral and deliberative factors in democratic decision making Posner argues that democracy is best viewed as a competition for power by means of regular elections

Adventures in Misplaced Marketing Herbert Rotfeld, 2001-09-30 The modern marketing concept with its focus on creating consumer satisfaction makes marketing seem beyond reproach Instead of its successes and failures Rotfeld focuses on the uses and frequent abuses of marketing analysis His book a collection of clearly observed and forceful case studies drawn from his personal research and study deals with the pragmatic realities of marketing and its limitations He argues that marketing can only serve consumer predispositions It cannot guarantee satisfaction When marketers lose sight of this they actually ignore their market Rotfeld takes the unusual approach of providing a fundamental view of the relationship between marketing and its customers He shows what can happen when that relationship is misperceived or its implications are mistaken Marketing gets misplaced For marketing practitioners and academics his book is a unique study of how marketing and consumers interact As Rotfeld explains *Misplaced Marketing* is a term I coined using marketing to refer to the marketing analysis of consumers and misplaced to mean either lost or ignored Many firms misplace marketing in the sense of losing track of what it is and what it can do many not for profit organizations do not use marketing in a way that could improve the results of their efforts Just because marketing is satisfying consumers does not mean it is above reproach since Al Capone satisfied many consumers too Moreover there are critics who fear marketing power and feel that any service to consumers is a problem for society This is misplaced marketing in the sense that it is misused abused or tied to products that

do not serve society's interests Just because marketing perspectives are misplaced does not mean a product or service will fail nor does it mean it should be banned My book gives a perspective to understand the view of business critics and ways to improve business decision making The book also provides an unusual examination of the entire relationship of business to its customers

Lying and Deception Thomas L. Carson, 2010-04-29 Thomas Carson offers the most comprehensive and up to date investigation of moral and conceptual questions about lying and deception Part I addresses conceptual questions and offers definitions of lying deception and related concepts such as withholding information keeping someone in the dark and half truths Part II deals with questions in ethical theory Carson argues that standard debates about lying and deception between act utilitarians and their critics are inconclusive because they rest on appeals to disputed moral intuitions He defends a version of the golden rule and a theory of moral reasoning His theory implies that there is a moral presumption against lying and deception that causes harm a presumption at least as strong as that endorsed by act utilitarianism He uses this theory to justify his claims about the issues he addresses in Part III deception and withholding information in sales deception in advertising bluffing in negotiations the duties of professionals to inform clients lying and deception by leaders as a pretext for fighting wars and lying and deception about history with special attention to the Holocaust and cases of distorting the historical record by telling half truths The book concludes with a qualified defence of the view that honesty is a virtue
