The Great Northwest:

The Great Northwest Oscar Osburn Winther, 1948

The Conquest of the Great Northwest Agnes C. Laut, 1908

The Conquest of the Great Northwest (Complete) Agnes Christina Laut, 2020-09-28 Practical men scorn the dreamer especially the mad souled dreamer who wrecks life trying to prove his dream a reality Yet the mad souled dreamer the Poet of Action whose poem has been his life the Hunter who has chased the Idea down the Long Trail where all tracks point one way and never return has been a herald of light for humanity Of no one is this truer than the English pilot Henry Hudson Hudson did not set out to find the great inland waters that bear his name Hudson River and Hudson Bay He set out to chase that rainbow myth the Pole or rather the passage across the Pole To him as to all Arctic explorers the call had become a sort of obsession It was a demon driving him in spite of himself It was a siren whom he could not resist luring him to wreck which he knew was certain It was a belief in something which reason couldn't prove but time has justified It was like a scent taken up by a hound on a strange trail He could not know where it would lead but because of Something in him and Something on the Trail he was compelled to follow Like the discoverer in science he could not wait till his faith was gilt edged with profit before risking his all on the venture Call it demon or destiny At its voice he rose from his place and followed to his death Not a dozen boats had sailed beyond the Sixtieth degree of north latitude From Sixty to the Pole was an area as great as Africa This region was absolutely unknown What did it hide Was it another new world or a world of waters giving access across the Pole from Europe to Asia The Muscovy Company of England the East India Company of Holland both knew the Greenland of the Danes and sent their ships to fish at Spitzbergen east of Greenland But was Greenland an island or a great continent Were Spitzbergen and Greenland parts of a vast Polar land Did the mountains wreathed there in eternal mists conceal the wealth of a second Peru Below the endless swamps of ice would men find gold sands And when one followed up the long coast of the east shore as long as from Florida to Maine where the Danish colonies had perished of cold centuries ago what beyond A continent or the Pole or the mystic realm of frost peopled by the monsters of Saga myth where the Goddess of Death held pitiless sway and the shores were lined with the dead who had dared to invade her realm Why these questions should have pierced the peace of Henry Hudson the English pilot and possessed him can no more be explained than the Something on the Trail that compels Something in the hound Like other dreamers Hudson had to put his dreams in harness hitch his Idea to every day uses The Muscovy Company trading to Russia wanted to find a short way across the Pole to China Hudson had worked up from sailor to pilot and pilot to master on the Dutch traders and was commissioned to seek the passage The Company furnished him with a crew of eleven including his own boy John It would be ridiculous if it were not so pathetic these simple sailors undertaking a venture that has baffled every great navigator since time began Led by Hudson with the fire of a great faith in his eyes the men solemnly marched to Saint Ethelburge Church off Bishopgate Street London to partake of Holy Communion and ask God's aid Back to the muddy water front opposite the Tower a gold coin for last

drinks a hearty God speed from the gentlemen of the Muscovy Company pompous in self importance and lace ruffles and the little crew steps into a clumsy river boat with brick red sails One gentleman opines with a pinch of snuff that it may be this many a day before Master Hudson returns Riffraff loafers crane necks to see to the last Cursing watermen clear the course by thumping other rivermen out of the way The boat slips under the bridge down the wide flood of the yeasty Thames through a forest of masts and sails of as many colors as Joseph s coat It is like a great sewer of humanity this river tide with its city s traffic of a thousand years Farmers rafting down loads of hay market women punting themselves along with boat loads of vegetables fishing schooners breasting the tide with full blown sails high hulled galleons from Spain flat bottomed rickety tubs from the Zee gay little craft barges with bunting wherries with lovers rowboats with nothing more substantial than silk awnings for a sail jostle and throng and bump each other as Hudson s crew shoots down with the tide Not a man of the crew but wonders is he seeing it all for the last time Bemidji the Acknowledged "hub" of the Great Northwest ,1909

Politics of Urban Runoff Andrew Karvonen, 2011-08-19 A study of urban stormwater runoff that explores the relationships among nature technology and society in cities When rain falls on the city it creates urban runoff that cause flooding erosion and water pollution Municipal engineers manage a complex network of technical and natural systems to treat and remove these temporary water flows from cities as quickly as possible Urban runoff is frequently discussed in terms of technical expertise and environmental management but it encompasses a multitude of such nontechnical issues as land use quality of life governance aesthetics and community identity and is central to the larger debates on creating more sustainable and livable cities In this book Andrew Karvonen uses urban runoff as a lens to view the relationships among nature technology and society Offering theoretical insights from urban environmental history human geography landscape and ecological planning and science and technology studies as well as empirical evidence from case studies Karvonen proposes a new relational politics of urban nature After describing the evolution of urban runoff practices Karvonen analyzes the urban runoff activities in Austin and Seattle two cities known for their highly contested public debates over runoff issues and exemplary storm water management practices The Austin case study highlights the tensions among urban development property rights land use planning and citizen activism the Seattle case study explores the city's long standing reputation for being in harmony with nature Drawing on these accounts Karvonen suggests a new relational politics of urban nature that is situated inclusive and action oriented to address the tensions among nature technology and society
