The Great Nuclear Power Debate:

The Great Nuclear Power Debate Gail Kay Haines, 1985 Designed to help young people understand the nuclear power debate this critical study explains why some consider nuclear power a safe and needed form of energy while others call it a useless and deadly danger

Three Mile Island: a Nuclear Crisis in Historical Perspective J. Samuel Walker, 2017-03-10 The author presents a bit of history about nuclear power that began in 1954 when the U S Congress signed the Atomic Energy Act a law that made the development of nuclear power possible by allowing basic information about atomic energy for civilian applications to be available in hopes it would building an industry that could provide a new source of electrical power The author explores the initial political business construction reactor safety and environmental elements with the debates to build nuclear plants within the United States as a source of energy then leads into regulation of nuclear power This scholarly text coupled with some black and white illustrations provides some insights to other nuclear plants that were build within the United States and some reactor faults prior to Three Mile Island s accident Majority of this book centers around Three Mile Island s accident evacuation of employees causes political crisis aftermath at State and Federal levels NRC US Nuclear Regulatory Commission and business community response and the growing public concerns are covered Related products Permissible Dose ISBN 9780160949432 The Road to Yacca Mountain ISBN 9780160949425 Other products produced by the US Nuclear Regulatory Commission USNRC can be found here <https://bookstore.gpo.gov/agency/nuclear-regulatory-commission/nrc>

Nuclear Debates in Asia Mike Mochizuki, Deepa M. Ollapally, 2016-07-21 This important book analyzes nuclear weapon and energy policies in Asia a region at risk for high stakes military competition conflict and terrorism The contributors explore the trajectory of debates over nuclear energy security and nonproliferation in key countries China India Japan Pakistan South Korea Taiwan Vietnam and other states in the Association of Southeast Asian Nations ASEAN Arguing against conventional wisdom the contributors make a convincing case that domestic variables are far more powerful than external factors in shaping nuclear decision making The book explores what drives debates and how decisions are framed the interplay between domestic dynamics and geopolitical calculations in the discourse where the center of gravity of debates lies in each country and what this means for regional cooperation or competition and U S nuclear energy and nonproliferation policy in Asia

The National Politics of Nuclear Power Benjamin K. Sovacool, Scott Victor Valentine, 2012-05-16 This book offers a comprehensive assessment of the dynamics driving and constraining nuclear power development in Asia Europe and North America providing detailed comparative analysis The book formulates a theory of nuclear socio political economy which highlights six factors necessary for embarking on nuclear power programs 1 national security and secrecy 2 technocratic ideology 3 economic interventionism 4 a centrally coordinated energy stakeholder network 5 subordination of opposition to political authority and 6 social peripheralization The book validates this theory by confirming the presence of these six drivers during the initial nuclear power developmental periods in eight countries the

United States France Japan Russia the former Soviet Union South Korea Canada China and India The authors then apply this framework as a predictive tool to evaluate contemporary nuclear power trends They discuss what this theory means for developed and developing countries which exhibit the potential for nuclear development on a major scale and examine how the new renaissance of nuclear power may affect the promotion of renewable energy global energy security and development policy as a whole The volume also assesses the influence of climate change and the recent nuclear accident in Fukushima Japan on the nuclear power industry's trajectory This book will be of interest to students of energy policy and security nuclear proliferation international security global governance and IR in general *Three Mile Island* J. Samuel Walker, 2004 On March 28 1979 the worst accident in the history of commercial nuclear power in the United States occurred at Three Mile Island For five days the citizens of central Pennsylvania and the entire world amid growing alarm followed the efforts of authorities to prevent the crippled plant from spewing dangerous quantities of radiation into the environment This book is the first comprehensive moment by moment account of the causes context and consequences of the Three Mile Island crisis Walker captures the high human drama surrounding the accident sets it in the context of the heated debate over nuclear power in the seventies and analyzes the social technical and political issues it raised He also looks at the aftermath of the accident on the surrounding area including studies of its long term health effects on the population From publisher description *Politics and Nuclear Power* Michael T. Hatch, 2021-12-15 With the dramatic changes OPEC precipitated in the structure of world energy markets during the 1970s energy became a central concern to policymakers throughout the industrialized West This book examines the responses of public officials in three leading European nations the Federal Republic of Germany France and the Netherlands to the energy crisis As the study shows the proposed energy programs in the three countries shared remarkable similarities yet the policy outcomes were very different To explain why Michael T. Hatch goes beyond the specific content of government energy policy to include an analysis of the policymaking process itself At the heart of the study is an exploration of the various dimensions of nuclear policy in West Germany The political consensus on nuclear power that prevailed in the initial years following the energy crisis disintegrated as antinuclear citizens initiatives the courts and trade unions as well as the traditional political parties entered the policymaking process Subsequent government efforts to resolve the political stalemate over nuclear power foundered in a morass of domestic electoral politics and an international debate over nuclear proliferation Extending the analysis to comparisons with French and Dutch nuclear strategies Hatch argues that the critical factor in determining nuclear policy was the manner in which the political system structured the nuclear debate In contrast to West Germany where the electoral and parliamentary systems enhanced the influence of the antinuclear Greens the electoral system and constellation of political parties in France served to dissipate the influence of the antinuclear forces Thus in France the nuclear program encountered few impediments In the Netherlands as in West Germany government policy was paralyzed in the face of antinuclear sentiment across a broad

spectrum of Dutch society Hatch has provided here not only a useful examination of the development of energy policy in western Europe but also a case study of the close interplay between policy and politics *Parliamentary Debates* New Zealand. Parliament,1967 Official Report of Debates Volume III Council of Europe, *Green Issues and Debates* Howard S. Schiffman,2011-05-03 *Green Issues and Debates* explores the multitude of threats to sustainable life on earth and the myriad of controversies surrounding potential solutions The grayer shades of green are deeply examined including such heady questions as Is ethanol production from corn a recipe for famine Does offshore drilling pose more of a risk to the environment than the problem it solves Is clean coal a viable option or is it simply polluting the energy dilemma Are genetically modified foods helpful or harmful Well respected scholars present more than 150 articles presented in A to Z format focusing on issues brought to the forefront by the green movement with carefully balanced pro and con viewpoints A valuable tool for students of all facets of ecology the environment and sustainable development the volume fully engages the reader inspiring further debate within the classroom Vivid photographs searchable hyperlinks numerous cross references an extensive resource guide and a clear accessible writing style make the *Green Society* volumes ideal for the classroom as well as for research *Nuclear Safety* ,1976 Official report of debates volume III Council of Europe, *Handbook of Energy Governance in Europe* Michèle Knodt,Jörg Kemmerzell,2022-09-21 This Handbook provides the most comprehensive account of energy governance in Europe examining both energy governance at the European level and the development of energy policy in 30 European countries Authored by leading scholars the first part of the book offers a broad overview of the topics of energy research including theories of energy transitions strategies and norms of energy policy governance instruments in the field and challenges of energy governance In the second part it examines the internal and external dimensions of energy governance in the European Union The third part presents in depth country studies which investigate national trajectories of energy policy including an analysis of the policy instruments and coordination mechanisms for energy transitions It closes with a comparative analysis of national energy governance This book is a definitive resource for scholars in energy and climate research as well as decision makers in national governments and EU institutions *Investigation of Charges Relating to Nuclear Reactor Safety* United States.
