points of view from such different disciplines with a view to an active approach a contemporary intervention or conservation The book presents case studies from several European countries Romania Germany Austria Italy Portugal mostly for large landscape in the outskirts of the cities and in the parks **Interdisciplinary Advances in Sustainable Development** Tijana Tufek-Memišević, Maja Arslanagić-Kalajdžić, Naida Ademović, 2022-10-15 This book presents interdisciplinary research and scientific outcomes in sustainable development acquired from the BHAAAS International Conference on Sustainable Development ICSD2022 as part of the 13th Days of Bosnian Herzegovinian American Academy of Arts and Sciences held in Sarajevo June 23 26 2022 The main event enabled researchers and experts from 25 countries to exchange their knowledge ideas and experiences The general scope of the book includes topics presented at three specialized symposia The Quadruple Helix Approach Sustainable Urban Development and Sustainable Civil Engineering with research topics ranging from SDGs sustainable development education environmental and social responsibility and consumption to sustainable retrofit strategies urban heritage conservation urban mobility Space Syntax analysis watercourse recovery railway corridors and more The book is recommended for fellow researchers professionals and students in the fields of economy politics architecture urban planning civil engineering and related fields **Low Carbon Transition** Valter Silva, Matthew Hall, Ines Azevedo, 2018-10-03 Most leaders of developed nations recognize the importance of following policies and strategies to achieve a low carbon economy based on new and innovative technologies that are able to reduce greenhouse gas emissions and create new employment and growth In the broad spectrum of the feasible decarbonisation pathways the challenge for political and economic decision makers is to weigh uncertain impact from different technologies and to build a comprehensive evidence based framework for research business investment and policy decision making This book aims to provide the reader with a comprehensive overview of the current state of the art technology in the Low Carbon Technology and Economy field discussing a set of new technology approaches and environmental and economic implications **Slow Cinema** Tiago de Luca, 2015-12-31 Focused on a body of films bound together through a cinematic aesthetic of slowness this book is a pioneering effort to situate theorise and map out slow cinema within contemporary global film production and across world cinema history **The Costs of Climate Change Mitigation Innovations** David S-K. Ting, Jacqueline A. Stagner, 2024-04-18 The notion that humanity may be too late to alter climate change could potentially lead to fear and therefore the advocacy of implementing radical strategies and or hastening the execution of certain measures to the extreme There is evidence that extensive and intensive implementation of some climate change solutions can significantly alter the environment and ecosystems in unintended ways For example the microclimate of a field in the proximity and downstream of a closely packed array of wind turbines can be noticeably altered by the modified lower atmospheric fluxes caused by the turbines which can then negatively affect crop yields Additionally some studies have found that large scale solar fields can result in the modulation of atmospheric circulation leading to changes in regional precipitation The Costs of Climate Change

Mitigation Innovations A Pragmatic Outlook provides a forum for discussion on the long term consequences of various climate strategies It promotes our striving toward minimizing the potential negative impact of new interventions by performing objective holistic analyses The bottom line is that we do not want today s solutions to become tomorrow s problems      *Advances in Civil Engineering Materials* Elham Maghsoudi Nia,Mokhtar Awang,2024-07-05 This book showcases the latest research in civil engineering and architectural materials with a specific focus on the following key areas circularity energy retrofitting building materials structural advancements and transportation innovations The research findings and advancements presented in this book are a part of the 7th International Conference on Architecture and Civil Engineering ICACE 2023 held on 15 November 2023 at the Everly Hotel Putrajaya Malaysia This conference serves as a prominent platform for researchers professionals and industry experts to exchange knowledge and ideas in order to advance the fields of civil engineering and architecture      **Handbook of Climate Change Mitigation and Adaptation** Maximilian Lackner,Baharak Sajjadi,Wei-Yin Chen,2025-09-26 Now in its 4th extended edition this completely revised and significantly expanded handbook addresses important new research findings and the global need for action related to climate change in its two most relevant aspects mitigation and adaptation There is a growing consensus that anthropogenic activities have been driving global climate change and the consequence will be catastrophic for civilization Reducing the 37.1 billion metric tons of CO<sub>2</sub> produced annually 2017 global emissions along with other greenhouse gases particularly methane has become a leading grand challenge and the pursuit of sustainable energy environments and economies is a complex issue affecting the daily life of every citizen In this 4th edition readers will find new chapters covering the causes and impacts of global warming the climate change impacts on health biodiversity and the economy and emerging technologies for climate change mitigation Particular attention is given to topics such as wildfire threats ocean acidification coral bleaching sea level rise and permafrost thaw The latest research on sustainable aviation fuels carbon mineralization and smart cities is also covered in this new edition as well as topics like sustainable building design climate resistant building materials and sustainable agriculture The Handbook of Climate Change Mitigation and Adaptation collates information in this multi disciplinary area providing readers with a comprehensive overview of the scientific background and current and emerging technologies Intended for an interdisciplinary global audience of researchers and decision makers at universities and in industry it covers climate change models established mature and promising future technologies and ideas the impact of climate change strategies for dealing with global warming the related political frameworks and climate education      *Be a Better You: A Collection of Writings* ,      **Urban Transformational Landscapes in the City-Hinterlands of Asia** Debnath Mookherjee,George M. Pomeroy,Le Thi Thu Huong,2023-05-16 In the context of mounting challenges stemming from a rapid transformation of the urban regional landscapes in many Asian countries this book highlights a multifaceted array of issues that increasingly engage the academic and planning communities in search of viable solutions to complex problems facing us

Even though cities continue to dominate development studies urbanization of Asia is evolving toward a hybrid urban rural nexus beyond the cities This volume considers these shifting dynamics of Asian urbanization including urban spatial transformations and their ramifications in the context of sustainability and planning Through the lens of a set of empirical studies across diverse disciplines geographies and methodologies yet with an overarching concern for sustainability in varied but interconnected areas such as climate change land use planning infrastructure and urban mobility and quality of life these studies examine a range of important topics e g flooding transportation housing open space green space urban garden and such in city regional settings Together they add insights into varied transformational processes or patterns at work on the urban regional landscapes in a number of Asian countries while offering innovative approaches or alternatives The proposed volume fills a gap in urban regional studies in context of South and Southeast Asia that will be of interest to all stakeholders e g planners administrators academicians and the citizenry particularly those interested in sustainability and planning paradigms It should be a timely and valuable addition to the Asian urbanization literature
