Handbook of Research on Form and Morphogenesis in Modern Architectural Contexts D'Uva,

Domenico,2018-02-23 As architectural designs continue to push boundaries there is more exploration into the bound shape of architecture within the limits of spaces made for human usability and interaction The Handbook of Research on Form and Morphogenesis in Modern Architectural Contexts provides emerging research on the process of architectural form finding as an effort to balance perceptive efficiency with functionality While highlighting topics such as architectural geometry reverse modeling and digital fabrication this book details the geometric process that forms the shape of a building This publication is a vital resource for scholars IT professionals engineers architects and business managers seeking current research on the development and creation of architectural design

Structure and Form in Design Michael Hann,2014-02-13 This book provides a critical examination of structure and form in design covering a range of topics of great value to students and practitioners engaged in any of the specialist decorative arts and design disciplines The complexities of two dimensional phenomena are explained and illustrated in detail while various three dimensional forms are also discussed In the context of the decorative arts and design structure is the underlying framework and form the resultant visible two or three dimensional outcome of the creative process Whether hidden or visually detectable in the final design structure invariably determines whether or not a design is successful in terms of both its aesthetics and its practical performance Hann successfully identifies various geometric concepts and presents and discusses a number of simple guidelines to assist the creative endeavours of both accomplished and student practitioners teachers and researchers

Getty Research Journal No. 2

Thomas W. Gaehtgens,Katja Zelljadt,2010-04-05 The Getty Research Journal showcases the remarkable original research underway at the Getty Articles explore the rich collections of the J Paul Getty Museum and Research Institute as well as the Research Institute s research projects and annual theme of its scholar program Shorter texts highlight new acquisitions and discoveries in the collections and focus on the diverse tools for scholarship being developed at the Research Institute

The Art of Building at the Dawn of Human Civilization Marta Tobolczyk,2020-09-18 This book offers a new unconventional outlook on architecture presenting some aspects of its evolution It demonstrates how prehistoric people developed the art of building when trying to solve increasingly complicated spatial and structural problems The book shows the activity of building to be in synergy with the parallel advancement of the human ability to think in symbolic and abstract terms The anthropological approach of this book will allow scientists to formulate the general principles and regularities of the development of architecture within a new field of studies named the Ontogenesis of Architecture

Free Form Structural Design Martijn Veltkamp,2007 Annotation Ever since architects dreamt of freely formed buildings engineers have experienced difficulties in making these buildings structurally viable The complexity lies in the relatively low tech approach

of the building industry seeking to exploit proven technologies prior to introducing new ones paired with an everlasting wish to minimize cost in an environment where simple planar frames have long been dominant This book presents principles and solutions Jacket The Topkapi Scroll Gülru Necipoğlu, 1996-03-01 Since precious few architectural drawings and no theoretical treatises on architecture remain from the premodern Islamic world the Timurid pattern scroll in the collection of the Topkapi Palace Museum Library is an exceedingly rich and valuable source of information In the course of her in depth analysis of this scroll dating from the late fifteenth or early sixteenth century Gülru Necipoğlu throws new light on the conceptualization recording and transmission of architectural design in the Islamic world between the tenth and sixteenth centuries Her text has particularly far reaching implications for recent discussions on vision subjectivity and the semiotics of abstract representation She also compares the Islamic understanding of geometry with that found in medieval Western art making this book particularly valuable for all historians and critics of architecture The scroll with its 114 individual geometric patterns for wall surfaces and vaulting is reproduced entirely in color in this elegant large format volume An extensive catalogue includes illustrations showing the underlying geometries in the form of incised line drawings from which the individual patterns are generated An essay by Mohammad al Asad discusses the geometry of the muqarnas and demonstrates by means of CAD drawings how one of the scroll's patterns could be used to design a three dimensional vault

Behavioural Production Robert Stuart-Smith, 2024-07-15 Autonomous manufacturing and cyber physical systems are key enabling technologies of the Fourth Industrial Revolution IR4 which are currently being incorporated into the building design and construction industries These emerging IR4 technologies have the potential to effectively improve construction affordability and productivity address current and future building demand and reduce the environmental impact of the built environment However design approaches that make use of IR4 technologies are still relatively unexplored While automation such as mass production promotes standardised design solutions design thinking that embraces varying degrees of autonomy can lead to unique and considered approaches to design on an industrial scale Behavioural Production Semi Autonomous Approaches to Architectural Design Robotic Fabrication and Collective Robotic Construction explores design operating through the orchestration of spatiotemporal events A multi agent behaviour based approach to computation is employed in architectural design and extended to individual and swarm based robotic methods for additive manufacturing Behavioural Production seeks to expand our capacity to engage with the world at large through varying degrees of autonomy In an industrialised world where traditional craftsmanship has been marginalised and cannot scale to meet societal needs this book speculates a means to bring scalable forms of creativity into the act of making This is explored through the use of materials generative algorithms computer vision machine learning and robot systems as active agents in design conception and realisation The book presents a collection of ideas projects and methods developed in the author's design practices and research labs in the fields of architecture and computer science This body of work demonstrates that engaging with semi

autonomous processes does not diminish authorship but rather expands it into new forms of design agency that seamlessly integrate with emerging manufacturing and construction technologies whilst authoring distinctive design character

Structures and Architecture Paulo J. Cruz, 2016-10-14 Although the disciplines of architecture and structural engineering have both experienced their own historical development their interaction has resulted in many fascinating and delightful structures To take this interaction to a higher level there is a need to stimulate the inventive and creative design of architectural structures and to persuade architects and structural engineers to further collaborate in this process exploiting together new concepts applications and challenges This set of book of abstracts and full paper searchable CD ROM presents selected papers presented at the 3rd International Conference on Structures and Architecture Conference ICSA2016 organized by the School of Architecture of the University of Minho Guimar es Portugal July 2016 to promote the synergy in the collaboration between the disciplines of architecture and structural engineering *Structures and Architecture - Bridging the Gap and Crossing Borders* Paulo J.S. Cruz, 2019-07-08 Structures and Architecture Bridging the Gap and Crossing Borders contains the lectures and papers presented at the Fourth International Conference on Structures and Architecture ICSA2019 that was held in Lisbon Portugal in July 2019 It also contains a multimedia device with the full texts of the lectures presented at the conference including the 5 keynote lectures and almost 150 selected contributions The contributions on creative and scientific aspects in the conception and construction of structures on advanced technologies and on complex architectural and structural applications represent a fine blend of scientific technical and practical novelties in both fields ICSA2019 covered all major aspects of structures and architecture including building envelopes fa ades comprehension of complex forms computer and experimental methods futuristic structures concrete and masonry structures educating architects and structural engineers emerging technologies glass structures innovative architectural and structural design lightweight and membrane structures special structures steel and composite structures structural design challenges tall buildings the borderline between architecture and structural engineering the history of the relationship between architects and structural engineers the tectonic of architectural solutions the use of new materials timber structures among others This set of book and multimedia device is intended for a global readership of researchers and practitioners including architects structural and construction engineers builders and building consultants constructors material suppliers and product manufacturers and other professionals involved in the design and realization of architectural structural and infrastructural projects **Innovating Strategies and Solutions for Urban Performance and Regeneration** Cristina Piselli, Haşim Altan, Osman Balaban, Peleg Kremer, 2022-07-01 This book focuses on enhancing urban regeneration performance and strategies that pave the way toward sustainable urban development models and solutions The book at hand thoroughly examines the latest studies on the regeneration of urban areas and attempts at alleviating the negative impacts associated with high population density and urban heat effects It gathers contributions that combine theoretical reflections

and international case studies on urban regeneration and transformation with the single goal of tackling existing social and economic imbalances and developing new solutions The primary audience of this book will be from the field of architecture and urban planning offering new insights on how to address the myriad of problems that our cities are facing

The Contradiction Between Form and Function in Architecture John Shannon Hendrix, 2013 Continuing the themes that have been addressed in *The Humanities in Architectural Design* and *The Cultural Role of Architecture* this book illustrates the important role that a contradiction between form and function plays in compositional strategies in architecture The contradiction between form and function is seen as a device for poetic expression for the expression of ideas in architecture The book contributes to the project of re-establishing architecture as a humanistic discipline to re-establish an emphasis on the expression of ideas and on the ethical role of architecture to engage the intellect of the observer and to represent human identity

Carbon-Neutral Architectural Design Pablo M. La Roche, 2024-05-31 The energy used to build and operate buildings is a significant source of greenhouse gas emissions While it is possible to reduce emissions through low carbon design many architects are not trained to do this Filling an urgent need for a design reference in this emerging field this

book describes how to reduce building related greenhouse gas emissions through appropriate design techniques It presents strategies to achieve CO2 reductions with an emphasis on control of energy flows through the building envelope and passive cooling and heating strategies This new revised edition is updated throughout and includes a new section on embodied carbon and new chapters on daylighting and nature based cooling Features Adds new chapters on daylighting and nature based cooling with numerous updates throughout the rest of the chapters Presents strategies illustrated with examples for new construction and existing buildings to reduce energy consumption and reduce emissions Explains the origins of CO2 emissions associated with the operation and fabrication of buildings supplying water disposing of waste from the building and proposes strategies to reduce them Covers carbon calculations thermal comfort indigenous technology climate responsive design passive cooling and heating solar design air flow analysis daylighting building simulation and microclimate design with abundant examples Examines siting location to design buildings that adapt and mitigate their effect on climate change

Advances in Civil, Architectural, Structural and Constructional Engineering Dong-Keon Kim, Jongwon Jung, Junwon Seo, 2016-04-05 The ICCASCE 2015 conference covers a wide range of fields in science and engineering innovation and aims to bring together engineering technology expertise Scientists scholars engineers and students from universities research institutes and industries all around the world gathered to present on going research activities This proceedings volume

Paradigm Islands: Manhattan and Venice Teresa Stoppani, 2012-12-06 Concerning architecture and the city built imagined and narrated this book focuses on Manhattan and Venice but considers architecture as an intellectual and spatial process rather than a product A critical look at the making of Manhattan and Venice provides a background to addressing the dynamic redefinition and making of space today The gradual processes of adjustment the making of a constantly changing dense space the emphasis on forming rather than on figure the incorporation of new forms and languages through their adaptation and transformation make both Manhattan and Venice in different ways the ideal places to contextualize and address the issue of an architecture of the dynamic

Computer-Aided Architectural Design: The Next City - New Technologies and the Future of the Built Environment Gabriela Celani, David Moreno Sperling, Juarez Moara Santos Franco, 2015-06-15 This book constitutes the refereed proceedings of the 16th International Conference on Computer Aided Architectural Design Futures CAAD Futures 2015 held in S o Paulo Brazil in July 2015 The 33 revised full papers presented were carefully reviewed and selected from 200 submissions The papers are organized in topical sections on modeling analyzing and simulating the city sustainability and performance of the built space automated and parametric design building information modelling BIM fabrication and materiality shape studies
