The Dwarf Novae:

The Dwarf Novae John Stephen Glasby, 1970 **Novae and Related Stars** Yozo Yokota, 2012-12-06 Michael Friedjung
Though known since antiquity novae are still poorly understood and present many problems. There has tended to be a lack of communication between theoreticians and observers and between different schools of thought in spite of the advances of recent years in certain directions. Observations of ordinary novae at minimum and of dwarf novae theory of the causes of the explosion etc. The meeting whose proceedings are contained in this volume was organized to stimulate a confrontation between the different ideas and results. The subject has changed a lot since 1963 when the previous international meeting was held. There were 61 participants at the conference from 17 countries so very many groups doing research in the field of novae were represented. The reader will see that the subject has become more physical. We know for instance that the binary nature of novae is essential but much work remains to be done. There is still a large gulf between theory and observation. May he find here many new ideas for future research. I would like to thank the French Centre National de la Recherche Scientifique for providing financial help. I must also thank the other members of the scientific committee: Profs and Drs Bath, Mustel, Payne, Gaposchkin, Sparks and Warner and of the local committee: Audouze, Mrs Steinberg, Vauclair. Cataclysmic Variables and Low-Mass X-Ray Binaries D.Q. Lamb, J. Patterson, 2012-12-06
Since 1976 a meeting devoted to recent research on cataclysmic variables (CV) workshop has been held annually somewhere in North America. Many of the meetings have been held following a custom older than anyone reading this book in locations with well known recreational potential: e.g. Santa Cruz, CA; Boulder, CO. We thought hard about this custom while contemplating the possibility of organizing a meeting in Massachusetts in the middle of winter. Nobody wants their meeting to go down in history as the smallest and dullest and it surely be the coldest. But on occasion meeting organizers have defied custom and scheduled meetings for less than trendy places and gotten away with it. Urbana, IL and Rochester, NY must be reckoned as examples of this. Encouraged by the spatial and temporal proximity of the American Astronomical Society meeting Boston January 9-12 we thought we might get away with it again and so came to organize a meeting for January 12-15 1983 in Cambridge, MA. There was another reason for a meeting at this time and place we loftily proclaimed in early mailings. No one doubts that the CVs are closely related to the low mass X-ray binaries (LMXBs) in which the accreting star is usually or perhaps always more compact than a white dwarf. Many of the general characteristics of LMXBs sound pretty familiar to any student of CVs: orbital periods in the range 0

Images of the Universe Carole Stott, 1991-11-21
Images of the Universe is a special collection of essays written to celebrate astronomy and the centenary of the British Astronomical Association. Colin Ronan opens the book with a fascinating account of the developments over the last hundred years. For the first time in history astronomers can detect radiation emanating from the Universe across the entire electromagnetic spectrum. Space probes have visited the planets and various missions have beamed back to Earth historically and scientifically important images many of which appear in this book.

Astronomy is a science where the amateur and the professional interact constructively This book is a testament to this relationship The work of amateurs is presented alongside that of the professional and in each chapter the future discoveries are anticipated Each planet is explored and beautifully illustrated The stars birth place of the elements are examined Paul Murdin gives an account of the brightest supernova to be seen from earth since 1604 Iain Nicolson explores G2 the single dwarf called the Sun Heather Couper and Nigel Henbest look at the Milky Way the hazy band of light that is the edge on view of our galaxy Malcolm Longair looks beyond our own galaxy into the deep sky Paul Davies gives an account of the first one second of the existence of our expanding Universe How did it all happen Martin Rees the cosmologist speculates on the origin of the Universe

Cataclysmic Variables and Related Objects A. Evans, Janet H. Wood, 2012-12-06 In 1993 we began to consider the possibility of holding a conference on Cataclysmic Variables CVs at Keele University There have been several meetings in the area of CVs recently e g Eilat Abano Padova Capetown However as preparations for the Keele meeting progressed we realized that while there had been a number of IAU meetings devoted to related and to peripheral topics such as IAU Colloquium 122 on Classical Novae in 1989 IAU Colloquium 129 on Accretion Disks in 1990 there had been no IAU sponsored conferences in the area of cataclysmic variables CVs for a number of years We felt therefore that the time was ripe to have an IAU meeting devoted to an overview of CVs and related objects and the SOC organized the conference such that there was an emphasis on invited reviews of the most recent advances in the field The conference covered both CVs and LMXBs and the inter relations between them The meeting was held at a time when powerful satellite observatories and rapid improvements in ground based instrumentation had led to many advances in both CV and LMXB research The conference provided a forum to review observations from ASCA EUVE ROSAT Ginga and the recently refurbished HST Photometric spectroscopic and polarimetric observations of CVs and LMXBs have thrown new light on the distribution of matter and the nature of the stellar components in these systems

Literature 1977, Part 2 Siegfried Böhme, Ute Esser, Walter Fricke, Inge Heinrich, Dietlinde Krahn, Lutz D. Schmadel, Gert Zech, 2013-03-14 Astronomy and Astrophysics Abstracts which has appeared in semi annual volumes since 1969 is devoted to the recording summarizing and indexing of astronomical publications throughout the world It is prepared under the auspices of the International Astronomical Union according to a resolution adopted at the 14th General Assembly in 1970 Astronomy and Astrophysics Abstracts aims to present a comprehensive documentation of literature in all fields of astronomy and astrophysics Every effort will be made to ensure that the average time interval between the date of receipt of the original literature and publication of the abstracts will not exceed eight months This time interval is near to that achieved by monthly abstracting journals compared to which our system of accumulating abstracts for about six months offers the advantage of greater convenience for the user Volume 20 contains literature published in 1977 and received before February 20 1978 some older literature which was received late and which is not recorded in earlier volumes is also included We acknowledge with thanks contributions to this volume by Dr J Bouška
