The Good Drug And The Bad Drug:

The Good Drug and the Bad Drug John S. Marr,1970 Contrasts the effects of medicinal drugs and addictive dope as they pass through the body Good Drug and the Bad Drug John S. Marr,1971-06-01 *The Drug Paradox* Tara L. Bruno,Rick Csiernik ,2018-04-26 Why are some drugs considered socially acceptable while others are demonized What makes these definitions so widespread Who benefits from these conceptualizations The Drug Paradox examines both the empirically founded and the socially constructed facets of drugs and drug use highlighting the incongruous aspects of laws policies and programming that aim to address behaviours around drugs The authors explore this paradox arguing that Canada s punitive approach to addressing drug use continues to exist alongside harm reduction strategies and that these competing approaches ultimately impede Canada s ability to deal effectively with substance misuse Using a policy oriented approach while also emphasizing the utility of a multifaceted biopsychosocial model this text provides students with a foundation in the sociology of psychoactive substances in the Canadian context It covers a broad range of issues models of addiction the history of Canada s drug laws media representation government responses to substance use and international perspectives on drug policy and addresses various research areas that are important for students to consider when trying to make sense of the competing discourses on drugs in society The Drug Paradox is ideal for use in sociology courses on drugs and drug use and will also appeal to those focusing on drug use from a criminology public health or policy perspective *Living with Drugs* Michael Gossop,2017-11-28 Now in its sixth edition Living with Drugs continues to be a well respected and indispensable reference tool Michael Gossop has updated this new edition to take account of new laws and practices that have come in to place since the previous edition published in 2000 Written in an accessible style and providing a balanced perspective the book is ideal for non specialists in training such as student nurses and social workers and for anyone with an interest in this complex ever present and emotive issue *Living With Drugs* Professor Michael Gossop,2013-04-28 Now in its seventh edition Living with Drugs continues to be a well respected and indispensable reference tool Michael Gossop has updated this new edition to take account of new laws and practices that have come in to place since the previous edition published in 2007 Written in an accessible style and providing a balanced perspective the book is ideal for non specialists in training such as student nurses and social workers and for anyone with an interest in this complex ever present and emotive issue An Introduction to Medicinal Chemistry Graham L. Patrick,2023 The market leader in medicinal chemistry clear supportive and practical It helps students to effortlessly make the link from theory to real life applications using practical and focused coverage alongside a package of supportive online resources **American Druggist and Pharmaceutical Record** ,1899 **The Control of Drugs and Drug Users** Ross Coomber,2020-07-26 Informed debate on how why or even if drugs and those that use them should be controlled needs an insight into the background of such controls how effective they have been and what reasonable alternatives there may be This book seeks to provide such an insight Reviewing important aspects

of past and current drug control policies in Britain and America the international compliment of expert contributors seek to explore the rationality of the reasoning which produced the initial controls the continuing relevance of those currently employed and provide alternative scenarios for future policy

The Harm Reduction Gap Sheila P. Vakharia, 2024-02-09

This long awaited book teaches how harm reduction can be a safety net for people with substance use disorders that our current addiction treatment rejects abandons and leaves behind Harm reduction is an approach to helping people who engage in high risk activities to develop the skills and strategies to keep them and their communities safe This can include the provision of sterile equipment low threshold and low barrier care and the acceptance of non abstinence goals in treatment In this novel guide Dr Vakharia discusses the shortcomings of the dominant Just Say No drug prevention messages and abstinence only treatment approaches introduces harm reduction strategies and technologies borne from people who use drugs themselves and suggests various policy options available as alternatives to the current policies that criminalize drugs drug using equipment and the settings in which people use drugs The final chapter calls on the reader to destigmatize drug use and support efforts to reform our drug policies By highlighting the large gap in our current approach to substance use the harm reduction gap this book is the first step for those interested in learning more about the limitations of our current approach to drug use and how to support local efforts to ensure people who use drugs and their communities can stay safe

Judging Addicts Rebecca Tiger, 2012-12-01 The number of people incarcerated in the U S now exceeds 2 3 million due in part to the increasing criminalization of drug use over 25% of people incarcerated in jails and prisons are there for drug offenses Judging Addicts examines this increased criminalization of drugs and the medicalization of addiction in the U S by focusing on drug courts where defendants are sent to drug treatment instead of prison Rebecca Tiger explores how advocates of these courts make their case for what they call enlightened coercion detailing how they use medical theories of addiction to justify increased criminal justice oversight of defendants who through this process are defined as both sick and bad Tiger shows how these courts fuse punitive and therapeutic approaches to drug use in the name of a progressive and enlightened approach to addiction She critiques the medicalization of drug users showing how the disease designation can complement rather than contradict punitive approaches demonstrating that these courts are neither unprecedented nor unique and that they contain great potential to expand punitive control over drug users Tiger argues that the medicalization of addiction has done little to stem the punishment of drug users because of a key conceptual overlap in the medical and punitive approaches that habitual drug use is a problem that needs to be fixed through sobriety Judging Addicts presses policymakers to implement humane responses to persistent substance use that remove its control entirely from the criminal justice system and ultimately explores the nature of crime and punishment in the U S today

The Oxford Handbook of Global Drug History Paul Gootenberg, 2022 This landmark

collection of essays by thirty five historians working on a global scale brings together the latest knowledge and perspectives about the long origins and transformations of today s illicit drugs such as cannabis heroin and cocaine

Drink and drug driving law Great Britain: Parliament: House of Commons: Transport Committee,2010-12-02 18% of all drivers killed in road accidents are over the drink drive limit In 2007 based on coroners data but only approximately 3% of drivers in the UK are stopped and tested for alcohol compared to the European average of 16% This report calls for the police to be given an additional power to permit preliminary breath tests as part of any designated drink drive enforcement operation Currently the police may stop any vehicle but can only test the driver s breath if there is an element of suspicion There is concern that a reduction in the blood alcohol concentration limit would send out mixed messages but that the aimed for effectively zero limit is too great a step at present Instead concentration should be on stricter enforcement of the current limit and public education It is felt that the success of Great Britain s drink driving policy to date is largely attributable to the deterrent effect of the current 12 month mandatory disqualification penalty and the Committee supports retaining that penalty The committee also calls for the improvement of the detection of drug driving and to strengthen public perception about the likelihood of drug drivers being caught by the police The Government s commitment to install drug screening devices in every police station by 2012 is welcomed though this interim measure should not eclipse the Government s aim over the medium term to develop and type approve a drug screening device for use at the roadside drawing on relevant experience of doing this in the other parts of the world

The High North Andrew D. Hathaway,Clayton James Smith McCann,2022-05-01 The High North is a groundbreaking collection of essays that shakes up widely accepted narratives about marijuana legalization in Canada In 2018 Canada became only the second country in the world to legalize cannabis Once shunned cannabis users are now eagerly courted as customers What has cannabis legalization meant for the general public governments and the Canadian legal system The contributors cannabis scholars and practitioners activists and advocates examine public policy on cannabis analyze consumer perceptions and recount the history of the legalization movement From the first appearance of cannabis in Canada and the advent of current day dispensaries to the mental health implications of legal weed and the plight of workers in the cannabis economy The High North offers a comprehensive critique of the many aspects of legalization To quote the Grateful Dead What a Long Strange Trip It s Been

Out of Practice Frederick M. Barken,2011-04-15 Primary care medicine as we know and remember it is in crisis While policymakers government administrators and the health insurance industry pay lip service to the personal relationship between physician and patient dissatisfaction and disaffection run rampant among primary care doctors and medical students steer clear in order to pursue more lucrative specialties Patients feel helpless well aware that they are losing a valued close connection as health care steadily becomes more transactional than relational The thin margin efficiency rapid pace and high volume demanded by the new health care economics do not work for primary care an inherently slower more personal and uniquely

tailored service In *Out of Practice* Dr Frederick Barken juxtaposes his personal experience with the latest research on the transformations in the medical field He offers a cool critique of the market model of medicine while vividly illustrating how the seemingly inexorable trend toward specialization in the last few decades has shifted emphasis away from what was once the foundation of medical practice Dr Barken addresses the complexities of modern practice overuse of diagnostic studies fragmentation of care increasing reliance on an array of prescription drugs and the practice of defensive medicine He shows how changes in medicine the family and society have left physicians to deal with a wide range of geriatric issues from limited mobility to dementia that are not addressed by health care policy and are not entirely amenable to a physician s prescription Indeed Dr Barken contends the very survival of primary care is in jeopardy at a time when its practitioners are needed more than ever Illustrated with case studies gleaned from more than twenty years in private practice and data from a wide range of sources *Out of Practice* is more than a jeremiad about a broken system Throughout Dr Barken offers cogent suggestions for policymakers and practitioners alike making clear that as valuable as the latest drug or medical device may be a successful health care system depends just as much on the doctor patient relationship embodied by primary care medicine
