Chemical News and Journal of Industrial Science ,1774 **Chemical news and Journal of physical science** ,1866 **The Chemical News and Journal of Physical Science** ,1894 Argonne News Argonne National Laboratory. Office of Public Affairs,1986 **How to Think about Homeland Security** David H. McIntyre,2019-05-03 Volume 1 The Imperfect Intersection of National Security and Public Safety explains homeland security as a struggle to meet new national security threats with traditional public safety practitioners It offers a new solution that reaches beyond training and equipment to change practitioner culture through education This first volume represents a major new contribution to the literature by recognizing that homeland security is not based on theories of nuclear response or countering terrorism but on making bureaucracy work The next evolution in improving homeland security is to analyze and evaluate various theories of bureaucratic change against the national level catastrophic threats we are most likely to face This synthesis provides the bridge between volume 1 understanding homeland security and the next in the series understanding the risk and threats to domestic security All four volumes could be used in an introductory course at the graduate or undergraduate level Volumes 2 and 3 are most likely to be adopted in a risk management RM course which generally focus on threats vulnerabilities and consequences while volume 4 will get picked up in courses on emergency management EM **Genre and the Performance of Publics** Mary Jo Reiff,Anis Bawarshi,2016-03-01 In recent decades genre studies has focused attention on how genres mediate social activities within workplace and academic settings Genre and the Performance of Publics moves beyond institutional settings to explore public contexts that are less hierarchical broadening the theory of how genres contribute to the interconnected and dynamic performances of public life Chapters examine how genres develop within publics and how genres tend to mediate performances in public domains setting up a discussion between public sphere scholarship and rhetorical genre studies The volume extends the understanding of genres as not only social ways of organizing texts or mediating relationships within institutions but as dynamic performances themselves By exploring how genres shape the formation of publics Genre and the Performance of Publics brings rhetoric composition and public sphere studies into dialogue and enhances the understanding of public genre performances in ways that contribute to research on and teaching of public discourse **Scientific and Technical Aerospace Reports** ,1994 *Knowledge and Illustrated Scientific News* ,1908 **Knowledge & Illustrated Scientific News** ,1910 *Getting To Grips With Science: A Fresh Approach For The Curious* Andrew James Morris,2014-12-10 Science touches all of our lives every day and should be a constant source of wonder and fascination not something confined to the classroom This book is for anybody who feels curious about ideas in science but lacks a strong background in the subject Getting to Grips with Science draws on the author's twelve years of experience in leading experimental discussion groups where people from all walks of life come together to pose questions in the presence of a science teacher Bursting with testimonials from real people about their

everyday experiences of science the book acts as a gentle introduction for anyone wishing to find out more about the natural world Drawing on practical examples and discussions that range from hormones to tectonic plates it helps the reader understand any difficulties they may have encountered with science learning in the past and points to fresh ways of approaching the subject in the future Concentrating on the themes that non scientists are genuinely curious about the book illustrates how we can begin to explore scientific ideas first through our initial understanding of the world around us and then with the help of a trained tutor who explains the underlying scientific concepts For those wishing to make a start on exploring science afresh the book offers practical information about the books museums websites podcasts courses and events available to support them Wider reflection on the experience of adults engaging with science through these discussion groups offers food for thought on the nature of science education in general Andrew Morris has been running science discussion groups in informal settings in central London since 2002 Originally a science teacher in sixth form further and adult education he has also worked as a senior manager in colleges and national bodies concerned with educational research
