

than is seen in the bulk of current medical and anthropological literature.

John Gabbay's reconstruction of the evolution of the concept of asthma as a disease is first, and conveys how even the most "objective" accounts of disease inevitably embrace their authors' subjective cultural views, which in turn reflect and influence the commitments of the societies in which they live. Intriguing too are Edward Yoku's demonstration of how medical knowledge of genetic disease is socially constructed

and David Armstrong's treatment of the language of noncompliance in doctor-patient relationships. The socioeconomic of medical knowledge is well covered in articles by Howard Becker and Karl Higley, though the latter's review of miners' myasthenia is wretched.

Although medical anthropologists will be best served, there is something for everyone in this volume: for physicians, physiologists, sociologists, social and clinical psychologists, and historians. Joan Carroll is the lone anthropologist.

## Linguistics

*A Grammar of Kiowa.* Laurel J. Matthews. *Studies in the Anthropology of North American Indians.* Lincoln: University of Nebraska Press, 1984. xvi + 288 pp. \$19.95 (cloth).

Marianne Miesau  
State University of New York, Albany

This description of Kiowa, a language of the southern Plains, is an outstanding work. The introduction locates the Kiowa people in time and space, from their first appearance in the historical record, at the head of the Missouri River in 1700, to their present home in southwestern Oklahoma. It then surveys past scholarship on the language and its genetic relationships within and beyond the Kiowa-Tanoan family. Finally, it sketches the backgrounds and special skills of the speakers who contributed to the volume, in particular, collaborator Parker McKenzie.

The second chapter contains an intricate but highly readable description of Kiowa phonology. The phonemic inventory and phonotactics are presented, the syllable, vowel length, tone, and stress are described in detail, and then an elaborate repertoire of phonological rules is laid out with remarkable clarity. General and casual speech are contrasted throughout, as are forms within breath groups and in isolation. The author obviously understands the workings of this language in depth and documents the discussion with facts from a wide variety of sources: instrumental observation, comments of the speakers themselves, dialectal variation, internal reconstruction, and diachronic insights resulting from an impressive knowledge of related languages. The exemplification is rich but not redundant.

The third chapter is a description of the intricate morphology of Kiowa. Here, as throughout the work, all statements are carefully and convincingly motivated. As elsewhere, the author's awareness of current theoretical concerns enriches the description but never limits it. The discussion of the complex prepositional prefix system, for example, incorporates considerations not only of syntactic case, but also agency, animateness, control, and transitivity. An important characteristic of this chapter is the author's sensitivity to the function of each construction and to the nature of productivity. Noting that the noun classification system is still productive, for example, she describes the classification of English borrowings: "Animates, e.g., *toth*, are assigned to class I, inanimates but tangible objects, e.g., *spooncraft*, *jeff*, *defense*, are assigned to class II. Abstract inanimates, e.g., *zero*, *biology*, *adverb*, are assigned to IVc" (p. 98). The language is described in its own terms, but the description goes beyond a mere catalog of high points. Where Kiowa lacks a construction found in more familiar languages, the author discusses alternative means of accomplishing the associated function. Kiowa lacks negative expressions with inanimate agents, for example, such as "the ice broke it". To communicate a similar idea, Kiowa speakers can use coordinate clauses, such as "the ice was heavy and that's why it broke" (pp. 111-112).

The fourth chapter deals with syntax. Simple sentence structure is described: the order of major constituents, the structure of noun phrases, types of adverbials, questions, negation, passives, then incorporation, and finally, complex sentences (relative clauses, complement clauses,

*The Articulatory Basis of Locality in Phonology* Adamantios I. Gafos, 2014-04-08 This work elucidates the nature of the notion of Locality in phonology describing the minimal conditions under which sounds assimilate to one another The central thesis is that a sound can assimilate to another sound only if gestural contiguity is established between these two sounds The argument supporting the central thesis of this book is unique in bringing evidence from articulatory dynamics electromyography and cross linguistic sound patterns to converge on the same notion of locality in phonology This book will be of particular interest to researchers in phonetics phonology and morphology as well as to cognitive scientists interested in

 Auderset,Hiroto Uchihara,2024-08-05 This volume brings together studies on morphosyntactic and phonological constituency  
 from a host of languages across the Americas The study expands on previous multivariate typological work on phonological  
 domains by simultaneously coding the results of morphosyntactic constituency tests The descriptions are geared towards  
 developing a typology of constituency and linguistic levels in both morphosyntactic and phonological domains The  
 multivariate approach adopted in this volume deconstructs constituency tests and phonological domains into cross  
 linguistically comparable variables applying and extending autotypology method to the domain of constituent structure  
 Current methodologies for establishing constituents have been criticized for containing an in built selection bias where the  
 results and interpretation of tests are chosen or sampled in such a fashion that specific analyses are prejudged to be correct  
 or false in a non rigorous fashion The papers of this volume develop novel methodology for reporting and coding constituency  
 variables for language description and comparison that seeks to reign in selection bias allowing theories concerning the

relationship between morphosyntactic and phonological constituent structure to be more severely tested      *Mirrors and Microparameters* David Adger, Daniel Harbour, Laurel J.
