Graphic Design Theory Helen Armstrong, 2012-08-10

Graphic Design Theory is organized in three sections. Creating the Field traces the evolution of graphic design over the course of the early 1900s including influential avant garde ideas of futurism, constructivism and the Bauhaus. Building on Success covers the mid to late twentieth century and considers the International Style, modernism and postmodernism. Mapping the Future opens at the end of the last century and includes current discussions on legibility, social responsibility and new media. Striking color images illustrate each of the movements discussed and demonstrate the ongoing relationship between theory and practice. A brief commentary prefaces each text providing a cultural and historical framework through which the work can be evaluated. Authors include such influential designers as Herbert Bayer, László Moholy-Nagy, Karl Gerstner, Katherine McCoy, Michael Rock, Lev Manovich, Ellen Lupton and Lorraine Wild. Additional features include a timeline, glossary and bibliography for further reading. A must have survey for graduate and undergraduate courses in design history, theory and contemporary issues.

Graphic Design Theory invites designers and interested readers of all levels to plunge into the world of design discourse.

The Graphic Artist and His Design Problems Josef Müller-Brockmann, 1968 **The Education of a Graphic Designer** Steven Heller, 2015-10-20

Revised and updated, this compelling collection of essays, interviews and course syllabi is the ideal tool to help teachers and students keep up in the rapidly changing field of graphic design. Top designers and educators talk theory, offer proposals, discuss a wide range of educational concerns such as theory versus practice, art versus commerce and classicism versus postmodernism and consider topics such as emerging markets, shifts in conventions, global impact and social innovation. Building on the foundation of the original book, the new essays address how graphic design has changed into an information presenting, data visualization and storytelling field rooted in art and technology. The forward thinking course syllabi are designed for the increasingly specialized needs of undergraduate and graduate students. Personal anecdotes from these designers about their own educations, their mentors and their students make this an entertaining and illuminating idea book. The book features writing from Lama Ajeenah Roy, R. Behrens, Andrew Blauvelt, Max Bruinsma, Chuck Byrne, Moira Cullen, Paula J. Curran, Louis Danziger, Liz Danzico, Meredith Davis, Sheila de Bretteville, Carla Diana, Johanna Drucker, Milton Glaser, Rob Giampietro, April Greiman, Sagi Haviv, Lorraine Justice, Jeffery Keedy, Julie Lasky, Warren Lehrer

been written about in one form or another While the wealth of information and resources available to the graphic designer is extensive it makes it hard to gain an overall perspective of graphic design and its practical applications in the field as the content and subject matter of most books is very specialized Design educators especially at the collegiate level have an increasingly difficult task of teaching a well rounded course in graphic design as they have to pull curriculum ideas from many sources and require the students to purchase numerous texts The Complete Graphic Designer is that well rounded course in graphic design It is not an instructional how to book nor will it feature a series of suggested curriculum or problems for designers or students to solve Rather this book will be a concise overview of the many facets of graphic design such as communication theory and why it is important various types of problems that designers confront on a daily basis and the considerations that must be made when trying to solve those visual problems In addition it features prominent designers and design firms that are renown for work in a certain type of design and frequent sidebars or articles that include useful information on graphic design This book provides a complete an comprehensive look at what graphic design is and what it means to be a graphic designer from an applied perspective with chapters including Design for Communication The Design Process Page Layout Visual Problems Corporate Identity and Branding **The Graphic Artist and His Design Problems; Creative Problems of the Graphic Designer [and] Design and Training in Comme** Josef Müller-Brockmann,1961
