The Great Cars:

The Great Cars Ralph Stein, 1967 Profusely illustrated text provides detailed descriptions of the appearance specifications and performance of twenty five of the greatest automobiles ever built **Great Cars of the Great Plains** Curt

McConnell, 1995-01-01 Chronicles the development of midwestern community automobile manufacture prior to the Great Depression and identifies five early car makers and their contributions to the automobile industry *Great Cars of All Time* Irving Robbin, 2015-12-29 For enthusiasts of every age here is a gallery of great cars from the beginning to the present day Each of these machines has its own claim to fame some for fabulous styling some for technical developments that changed the course of automotive history some for racing prowess and some for sheer personality For each chapter there is a beautiful full page color portrait of the car in its proper setting The text is no mere description of the machines With authority enthusiasm and wit the author traces the history of each make illuminating the characters of both cars and men with spine tingling racing adventures and inside anecdotes While the story of each make is complete in itself and may be read alone the book as a whole provides a panorama of automotive history The story of cars is of course also the story of men some of the most colorful figures of the modern world drivers such as Nuvolari Oldfield Fangio engineers such as Bugatti Ford and Porsche But cars are the real heroes of this book in these words and pictures they emerge not as mere collections of nuts and bolts and sheet metal but as creatures with a kind of life of their own A life that embodies the urge to freedom and adventure the pride and love of beauty of both their creators and their users New York 1960 **The Greatest Cars**
