The Great Dinosaur Extinction Controversy Charles Officer, Jake Page, 1996-06-30 In 1980 Nobel Laureate Luis Alvarez announced his theory of the dinosaurs final demise a gigantic meteorite crashed into the earth and raised a cloud of dust that caused darkness for years suppressing photosynthesis which impeded plant growth and eventually starved the dinosaurs This idea exploded into common awareness with almost unprecedented speed and was instantly embraced by the media and the public Almost without question it quickly became the hottest scientific fact Unfortunately for Alvarez many in the scientific community did to support this theory and in fact later research showed the impossibility of such an idea *The Great Dinosaur Extinction Controversy* chronicles the fantastic story of how this hypothesis

became so widespread the way it became common knowledge from the pages of Science to The New York Times to Parade Magazine the controversy it caused and the ample scientific research that proves the theory wrong Officer and Page also present an attractive and carefully investigated alternative explanation for the mass extinctions that occurred at the end of the Cretaceous period Through this account they show the ways that sound science should be performed and the findings transmitted
