The Great Orders Of Living Beings:

The Order of Things Michel Foucault, 2002 When one defines order as a sorting of priorities it becomes beautifully clear as to what Foucault is doing here With virtuoso showmanship he weaves an intensely complex history of thought He dips into literature art economics and even biology in *The Order of Things* possibly one of the most significant yet most overlooked works of the twentieth century Eclipsed by his later work on power and discourse nonetheless it was *The Order of Things* that established Foucault's reputation as an intellectual giant Pirouetting around the outer edge of language Foucault unsettles the surface of literary writing In describing the limitations of our usual taxonomies he opens the door onto a whole new system of thought one ripe with what he calls exotic charm Intellectual pyrotechnics from the master of critical thinking this book is crucial reading for those who wish to gain insight into that odd beast called Postmodernism and a must for any fan of Foucault

The Life of the Buddha and the Early History of His Order W. Woodhill Rockhill, 2013-11-05 First Published in 2000 The analysis of the Tibetan Bkash gyur by Alexander Csoma de Koros struck its readers with the wonderful patience and perseverance of this extraordinary scholar Csoma's premature death prevented him examining as fully as we could have desired the Tibetan Bstan gyur to elucidate the difficulties which so frequently beset the canonical works in the Bkash gyur Throughout this volume no attempt has been made to criticise the texts which have been studied they are only intended as materials for those who hereafter may undertake to write a history of the Buddha

CrossRoutes, the Meanings of "race" for the 21st Century Paola Boi, 2003 This collection reflects the still urgent project of historical recuperation as well as an examination of literary representations and other cultural manifestations of the Black Diaspora Disciplinary work within the boundaries of African American Studies has been enhanced by more general considerations of the history of race and racism in globalized contexts The articles assembled here reflect recent empirical research as well as challenging theoretical considerations Contributions address particular formations of racialized modernity owed to the impact of the Atlantic slave trade and slavery and thus broaden the approach to the Middle Passage to improve our understanding of it as a constitutive transatlantic phenomenon in the widest possible sense

Order and Life Joseph Needham, 2015-05-21 This book contains the text of the Terry Lectures for 1934-5 which discuss the nature deployment and hierarchical continuity of biological order

The Nature of Order, Book Two: The Process of Creating Life

Christopher Alexander, 2020-03-30 Scientifically this is perhaps the most exciting of the four books How do beautiful creations come into being Nature can make an infinite number of human faces each one unique each one beautiful The same is true for daffodils streams and stars But man made creations especially the towns and buildings of the 20th century have only occasionally been really good more often mediocre and in the last 50 years have most often been deadly What is the reason for the difference It hinges on the deep nature of the processes we use Merely understanding the geometry of beautiful and living form the topic of Book 1 is not enough to help us create such a living geometry In the 20th century our society was locked into deadly processes which created our current built environment process that most people were not really aware of and did not question Despite their best efforts and intentions architects and planners working within these processes could not achieve a living built environment Life and beauty in the built world arise only from processes which allow living structure to unfold The secret lies in knowing as nature does what must happen in what order what sequence of events allows a living form to unfold successfully Here in Book 2 Alexander puts forward a fully developed theory of living process He defines conditions for a process to be living that is capable of generating living structure He shows how such processes work and how they may be created At the core of the new theory is the theory of structure preserving transformations This concept new in scientific thinking is based on the concept of wholeness defined in Book 1 A structure preserving transformation is one which preserves extends and enhances the wholeness of a system Structure preserving transformations provide the means for any step by step process social biological architectural or technical to reach configurations which are most profound most capable of supporting life The process of creation whether in the formation of a single object or in the piecemeal aggregation of a town requires this sort of generative process a careful and deliberate sequence of steps in which each step creates the context for the next one and each next wholeness is derived from the previous wholeness Our billions of beautiful and unique human faces come from one class of sequences Driven by these sequences an initial cell differentiates again and again until beautiful and complex human beings emerge infinitely various always harmonious Making changes in society so that streets buildings rooms gardens and towns may be generated by hundreds of such sequences requires massive transformations This book is the first blueprint of those transformations

The Nature of Order, Book One: The Phenomenon of Life Christopher Alexander, 2020-03-30 Christopher Alexander's series of ground breaking books including A Pattern Language and The Timeless Way of Building have pointed to fundamental truths of the way we build revealing what gives life and beauty and true functionality to our buildings and towns Now in The Nature of Order Alexander explores the properties of life itself highlighting a set of well defined structures present in all order and in all life from micro organisms and mountain ranges to good houses and vibrant communities In The Phenomenon of Life the first volume in this four volume masterwork Alexander proposes a scientific view of the world in which all space matter has perceptible degrees of life and sets this understanding of order as an intellectual basis for a new

architecture With this view as a foundation we can ask precise questions about what must be done to create more life in our world whether in a room a humble doorknob a neighbourhood or even in a vast region He introduces the concept of living structure basing it upon his theories of centers and of wholeness and defines the fifteen properties from which according to his observations all wholeness is built Alexander argues that living structure is at once both personal and structural Taken as a whole the four books create a sweeping new conception of the nature of things which is both objective and structural hence part of science and also personal in that it shows how and why things have the power to touch the human heart A step has been taken through which these two domains the domain of geometrical structure and the feeling it creates kept separate during four centuries of scientific thought from 1600 to 2000 have finally been united

Making Monsters David Livingstone Smith, 2021-10-12 A leading scholar explores what it means to dehumanize others and how and why we do it I

wouldn't have accepted that they were human beings You would see an infant who's just learning to smile and it smiles at you but you still kill it So a Hutu man explained to an incredulous researcher when asked to recall how he felt slaughtering Tutsis in Rwanda in 1994 Such statements are shocking yet we recognize them we hear their echoes in accounts of genocides massacres and pogroms throughout history How do some people come to believe that their enemies are monsters and therefore easy to kill In *Making Monsters* David Livingstone Smith offers a poignant meditation on the philosophical and psychological roots of dehumanization Drawing on harrowing accounts of lynchings Smith establishes what dehumanization is and what it isn't When we dehumanize our enemy we hold two incongruous beliefs at the same time we believe our enemy is at once subhuman and fully human To call someone a monster then is not merely a resort to metaphor dehumanization really does happen in our minds Turning to an abundance of historical examples Smith explores the relationship between dehumanization and racism the psychology of hierarchy what it means to regard others as human beings and why dehumanizing others transforms them into something so terrifying that they must be destroyed Meticulous but highly readable *Making Monsters* suggests that the process of dehumanization is deeply seated in our psychology It is precisely because we are all human that we are vulnerable to the manipulations of those trading in the politics of demonization and violence
