*The Forest Garden Greenhouse* Jerome Osentowski, 2015 With a revolutionary new Climate Battery design for near net zero heating and cooling By the turn of the nineteenth century thousands of acres of glass houses surrounded large American cities becoming a commonplace symbol of the market garden and nursery trades But the possibilities of the indoor garden to transform our homes and our lives remain largely unrealized In this groundbreaking book Jerome Osentowski one of North America's most accomplished permaculture designers presents a wholly new approach to a very old horticultural subject In *The Forest Garden Greenhouse* he shows how bringing the forest garden indoors is not only possible but doable on unlikely terrain and in cold climates using near net zero technology Different from other books on greenhouse design and management this book advocates for an indoor agriculture using permaculture design concepts integration multi functions perennials and polycultures that take season extension into new and important territory Osentowski director and founder of Central Rocky Mountain Permaculture Institute CRMPI farms at 7 200 feet on a steep rocky hillside in Colorado incorporating deep holistic permaculture design with practical common sense It is at this site high on a mountaintop where Osentowski along with architect and design partner Michael Thompson has been designing and building revolutionary
