Sinister Barrier:

Sinister Barrier Eric Frank Russell, 1948 The scientist Bill Graham must face the challenge of stopping the Vitons who are intent on destroying the universe *Pseudoscience and Science Fiction* Andrew May, 2016-09-13 Aliens flying saucers ESP the Bermuda Triangle antigravity are we talking about science fiction or pseudoscience Sometimes it is difficult to tell the difference Both pseudoscience and science fiction SF are creative endeavours that have little in common with academic science beyond the superficial trappings of jargon and subject matter The most obvious difference between the two is that pseudoscience is presented as fact not fiction Yet like SF and unlike real science pseudoscience is driven by a desire to please an audience in this case people who want to believe This has led to significant cross fertilization between the two disciplines SF authors often draw on real pseudoscientific theories to add verisimilitude to their stories while on other occasions pseudoscience takes its cue from SF the symbiotic relationship between ufology and Hollywood being a prime example of this This engagingly written well researched and richly illustrated text explores a wide range of intriguing similarities and differences between pseudoscience and the fictional science found in SF Andrew May has a degree in Natural Sciences from Cambridge University and a PhD in astrophysics from Manchester University After many years in academia and the private sector he now works as a freelance writer and scientific consultant He has written pocket biographies of Newton and Einstein as well as contributing to a number of popular science books He has a lifelong interest in science fiction and has had several articles published in Fortean Times magazine **Random Graphs '85** M. Karonski, Z. Palka, 2011-09-22 Covering a wide range of Random Graphs subjects this volume examines series parallel networks properties of random subgraphs of the n cube random binary and recursive trees random digraphs induced subgraphs and spanning trees in random graphs as well as matchings hamiltonian cycles and closure in such structures Papers in this collection also illustrate various aspects of percolation theory and its applications properties of random lattices and random walks on such graphs random allocation schemes pseudo random graphs and reliability of planar networks Several open problems that were presented during a special session at the Seminar are also included at the end of the volume *Think to New Worlds* Joshua Blu Buhs, 2024-07-03 How a writer who investigated scientific anomalies inspired a factious movement and made a lasting impact on American culture Flying saucers Bigfoot Frogs raining from the sky Such phenomena fascinated Charles Fort the maverick writer who scanned newspapers journals and magazines for reports of bizarre occurrences dogs that talked vampires strange visions in the sky and paranormal activity His books of anomalies advanced a philosophy that saw science as a small part of a larger system in which truth and falsehood continually transformed into one another His work found a ragged following of skeptics who questioned not only science but the press medicine and politics Though their worldviews varied they shared compelling questions about genius reality and authority At the center of this community was adman writer and enfant terrible Tiffany Thayer who founded the Fortean Society and ran it for almost three

decades collecting and reporting on every manner of oddity and conspiracy In *Think to New Worlds* Joshua Blu Buhs argues that the Fortean effect on modern culture is deeper than you think Fort's descendants provided tools to expand the imagination explore the social order and demonstrate how power is exercised Science fiction writers put these ideas to work as they sought to uncover the hidden structures undergirding reality Avant garde modernists including the authors William Gaddis Henry Miller and Ezra Pound as well as Surrealist visual artists were inspired by Fort's writing about metaphysical and historical forces And in the years following World War II flying saucer enthusiasts convinced of alien life raised questions about who controlled the universe Buhs's meticulous and entertaining book takes a respectful look at a cast of oddballs and eccentrics plucking them from history's margins and spotlighting their mark on American modernism *Think to New Worlds* is a timely consideration of a group united not only by conspiracies and mistrust of science but by their place in an ever expanding universe rich with unexplained occurrences and visionary possibilities *The Fortean Influence on Science Fiction* Tanner F. Boyle, 2020-11-30

Charles Fort was an American researcher from the early twentieth century who cataloged reports of unexplained phenomena he found in newspapers and science journals A minor bestseller with a cult appeal Fort's work was posthumously republished in the pulp science fiction magazine *Astounding Stories* in 1934 His idiosyncratic books fascinated scared and entertained readers many of them authors and editors of science fiction Fort's work prophesied the paranormal mainstays of SF literature to come UFOs poltergeists strange disappearances cryptids ancient mysteries unexplained natural phenomena and everything in between Science fiction authors latched on to Fort's topics and hypotheses as perfect fodder for SF stories Writers like Arthur C Clarke Philip K Dick Robert Heinlein H P Lovecraft and others are examined in this exploration of Fortean science fiction a genre that borrows from the reports and ideas of Fort and others who saw the possible science fictional nature of our reality *Eighth Army's Greatest Victories* Adrian Turner, 1999-03-16 To read many accounts it would appear that the Eighth Army's victory at El Alamein was quickly followed by its triumphant arrival at Tunis Adrian Turner the experienced authority on the period redresses the imbalance by describing brilliantly the progress of this legendary fighting force and describing the ferocity of such battles as that for the Mareth Line The author deftly handles strategic level thinking the tactical battles and individual contributions Aviation readers will be thrilled by recognition of the Desert Air Force's contribution too often neglected **Victory in the Desert**

Adrian Stewart, 2022-04-11 The end of the beginning An epic conflict North Africa was a turning point for the British in the Second World War a harsh landscape of sand and enemy tanks but ultimately a place of victory that Churchill famously called the end of the beginning When General Montgomery became commander of the Allied Eighth Army in 1942 he found the troops dispirited after a series of defeats by his nemesis General Rommel However under Monty's inspired leadership the army turned their fortunes around going on to win seven battles and driving the enemy out of North Africa However little credit has been attributed to the Eighth Army for its victories and even the legendary Battle of El Alamein has been

consistently underrated This highly informed and gripping account brings to light how the troops and their leaders won these decisive battles and helped to win the war Lucid and accessible this masterly account is vital reading for all enthusiasts of military history Perfect for readers of Jonathan Dimbleby and Max Hastings Congressional Record United States. Congress,1962 The Congressional Record is the official record of the proceedings and debates of the United States Congress It is published daily when Congress is in session The Congressional Record began publication in 1873 Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States 1789 1824 the Register of Debates in Congress 1824 1837 and the Congressional Globe 1833 1873 *812 HCA Comics Signature Auction Catalog* Ivy Press,2004-06 **Heritage Signature Auction #811** Ivy Press, **Psience Fiction** Damien Broderick,2018-05-12 Science fiction has often been considered the literature of futuristic technology fantastic warfare among the stars or ruinous apocalypses on Earth The last century however saw through John W Campbell the introduction of psience fiction which explores such themes of mental powers as telepathy precognition of the future teleportation etc and symbolic machines that react to such forces The author surveys this long ignored literary shift through a series of influential novels and short stories published between the 1930s and the present This discussion is framed by the sudden surge of interest in parapsychology and its absorption not only into the SF genre but also into the real world through military experiments such as the Star Gate Program **Paratexts** James Gunn,2013-04-18 In the mid 1980s Easton Press began publishing a series of leather bound collector editions called Masterpieces of Science Fiction and Masterpieces of Fantasy which featured some of the most important works in these genres James Gunn was commissioned to write introductions to these works which allowed him to pay tribute to many authors who inspired and influenced his own work In Paratexts Introductions to Science Fiction and Fantasy Gunn has collected the most significant essays produced for the Easton series along with prefaces he wrote for reprints of his own novels Cited here are some of the most significant works of 19th and 20th century science fiction and fantasy such as The Island of Dr Moreau 1984 Stranger in a Strange Land A Clockwork Orange Speaker for the Dead The Postman Do Androids Dream of Electric Sheep The Hitchhiker s Guide to the Universe The Dead Zone The Mists of Avalon Dragon s Eye Nine Princes in Amber Blue Mars The Last Unicorn and The Lord of the Rings Drawing upon Gunn s lifetime of work in the field these introductions include analyses of the individual works and the fields in which they were written Gunn also briefly discusses each novel s significance in the science fiction canon Collected here for the first time these prefaces and introductions provide readers with insight into more than seventy novels making Paratexts a must read for science fiction and fantasy aficionados **The Monster with a Thousand Faces** Brian J. Frost,1989 Brian Frost chronicles the history of the vampire in myth and literature providing a sumptuous repast for all devotees of the bizarre In a wide ranging survey including plot summaries of hundreds of novels and short stories the reader meets an amazing assortment of vampires from the pages of weird fiction ranging from the 10 000 year old femme fatale in Robert E Howard s Conan the Conqueror to

the malevolent fetus in Eddy C Bertin's *Something Small Something Hungry* Nostalgia buffs will enjoy a discussion of the vampire yarns in the pulp magazines of the interwar years while fans of contemporary vampire fiction will also be sated

The Rise and Fall of American Science Fiction, from the 1920s to the 1960s Gary Westfahl, 2019-10-14 By examining important aspects of science fiction in the twentieth century this book explains how the genre evolved to its current state Close critical attention is given to topics including the art that has accompanied science fiction the subgenres of space opera and hard science fiction the rise of SF anthologies and the burgeoning impact of the marketplace on authors Included are in depth studies of key texts that contributed to science fiction's growth including Philip Francis Nowlan's first Buck Rogers story the first published stories of A E van Vogt and the early juveniles of Isaac Asimov Arthur C Clarke and Robert Heinlein

Optimistic medicine, or, the early treatment of simple problems rather than the late treatment of serious problems Arthur George Crandall, 1921 [How to Live Forever](#) Stephen R L Clark, 2008-01-28 Immortality is a subject which has long been explored and imagined by science fiction writers In his intriguing new study Stephen R L Clark argues that the genre of science fiction writing allows investigation of philosophical questions about immortality without the constraints of academic philosophy He reveals how fantasy accounts of issues such as resurrection disembodied survival reincarnation and devices or drugs for preserving life can be used as an important resource for philosophical inquiry and examines how a society of immortals might function through a reading of the vampire myth *How to Live Forever* is a compelling study which introduces students and professional philosophers to the possibilities of using science fiction in their work It includes extensive suggestions for further reading both fictional and philosophical and examines the work of such major science fiction authors as Arthur C Clarke Frank Herbert Larry Niven William Gibson and Colin Wilson [Charles Fort](#) Jim Steinmeyer, 2008-05-01 The seminal biography of the twentieth century's premier chronicler of the paranormal Charles Fort a man whose very name gave rise to an adjective fortian to describe the unexplained By the early 1920s Americans were discovering that the world was a strange place Charles Fort could demonstrate that it was even stranger

than anyone suspected Frogs fell from the sky Blood rained from the heavens Mysterious airships visited the Earth Dogs talked People disappeared Fort asked why but even more vexing he also asked why we weren't paying attention Here is the first fully rendered literary biography of the man who more than any other figure would define our idea of the anomalous and paranormal In *Charles Fort The Man Who Invented the Supernatural* the acclaimed historian of stage magic Jim Steinmeyer goes deeply into the life of Charles Fort as he saw himself first and foremost a writer At the same time Steinmeyer tells the story of an era in which the certainties of religion and science were being turned on their heads And of how Fort significantly was the first man who challenged those orthodoxies not on the grounds of some counter fundamentalism of his own but simply for the plainest of reasons they didn't work In so doing Fort gave voice to a generation of doubters who would neither accept the straight story of scholastic science nor credulously embrace fantastical visions Instead Charles Fort demanded of his readers and admirers the most radical of human acts Thinking
