Nation States as Schizophrenics Roberta N. Haar,2001-05-30 The demise of the Cold War continues to pose new challenges to the international system Central to these challenges is the extent of German and Japanese security commitments within their regions and to the global maintenance of peace and stability It is important to know whether two of the world s acknowledged economic powers will play significant stabilizing roles If they choose not to what are the reasons and what can be done to convince them that their military might and political leadership are critical Certainly in the first decade since the end of the Cold War Germany and Japan did not fulfill the roles that their allies and many realist scholars expected they would Haar seeks to explain German and Japanese reticence to assume their anticipated roles In order to undertake this task she evaluates various models of foreign policy In the future Haar asserts Japanese and German foreign policy are likely to remain torn with both practicing a have it all ways policy If their allies the United States in particular continue to insist that they bear more of the burdens of world security then their foreign policy must be better understood This is a provocative analysis that will be of particular interest to scholars researchers and policy makers involved with German and Japanese foreign policy analysis *Fighting for Rights* Tal Dingott Alkopher,2016-04-15 In the light of NATO s humanitarian war in Kosovo is it possible to understand or explain wars as an outcome of perceptions of rights How did rights be they divine rights in the Middle Ages territorial rights in the eighteenth century or human rights today become something that people are willing to fight and die for To answer these questions this book explores the linkage between concepts of rights and the practice of war in the international arena Alkopher describes how normative structures of rights have shaped different practices of war from medieval to modern times through the lens of social constructivism From the eleventh to the thirteenth century concepts of divine rights and institutionalized practices of the Crusades to the Holy Land fostered the prevailing ideas of international rights and war In the eighteenth century the institutionalization of states rights and territorial wars shaped international conflict This view held until the late twentieth century when the institutionalization of human rights coupled with the emerging practice of humanitarian war particularly NATO s war in Kosovo engendered new norms of international conduct The author concludes that rights have the power to constitute an international order that will

be either cooperative or conflictual and the choice of outcome is very much in our hands This book will be essential reading for international relations and political science scholars and students but also philosophers legal and sociological historians and international lawyers **SIPRI yearbook 1996; armaments, disarmament and international security** ,1996
