**The Cambridge Companion to Literature and Science** Steven Meyer, 2018-05-03

In 1959 C P Snow lamented the presence of what he called the two cultures the apparently unbridgeable chasm of understanding and knowledge between modern literature and modern science In recent decades scholars have worked diligently and often with great ingenuity to interrogate claims like Snow s that represent twentieth and twenty first century literature and science as radically alienated from each other The Cambridge Companion to Literature and Science offers a roadmap to developments that have contributed to the demonstration and emergence of reciprocal connections between the two domains of inquiry Weaving together theory and empiricism individual chapters explore major figures Shakespeare Bacon Emerson Darwin Henry James William James Whitehead Einstein Empson and McClintock major genres and modes of writing fiction science fiction non fiction prose poetry and dramatic works and major theories and movements pragmatism critical theory science studies cognitive science ecocriticism cultural studies affect theory digital humanities and expanded empiricisms This book will be a key resource for scholars graduate students and undergraduate students alike Climate Change Temporalities Kyrre Kverndokk, Marit Ruge Bjærke, Anne Eriksen, 2021-03-22 Climate Change Temporalities explores how various timescales timespans intervals rhythms cycles and changes in acceleration are at play in climate change discourses It argues that nuanced detailed and specific understandings and concepts are required to handle the challenges of a climatically changed world politically and socially as well as scientifically Rather than reflecting abstractly on theories of temporality this edited collection explores a variety of timescales and temporalities from narratives experience popular culture and everyday life in addition to science and history and the entanglements between them The chapters are clustered into three main sections exploring a range of genres such as questionnaires interviews magazines news media television series aquariums and popular science books to critically examine how and where climate change understandings are formed The book also includes chapters historicising notions of climate and temporality by exploring scientific debates and practices Climate Change Temporalities will be of great interest to students and scholars of humanistic climate change research environmental humanities studies of temporality and historicity cultural studies cultural history and popular culture **The X-Files and Literature** Sharon R. Yang, 2009-10-02 The X Files and Literature Unweaving the Story Unraveling the Lie to find the Truth provides an innovative and valuable exploration of the groundbreaking television program Although much academic work has been devoted to the social psychological and spiritual significance of The X Files until this collection none has fully addressed the series rich adaptation of literature to interrogate our perception definition or recounting of the truth This collection not only unveils new twists and insights into expected connections between The X Files and Gothic writers or with its modernist and post modernist slants on narrative plot and characterization The X Files and Literature also delves into some unexpected literary sources shaping the series such as the Arthurian quest Catholic and Biblical mythology folkloristics and James Fennimore Cooper and the vanishing American mythos This collection of essays covers both how The X Files works with literature s own constantly morphing definition and portrayal of truth through form and content as well as

how the television program may or may not subvert our own contradictory expectations and distrust of literature's providing us with enlightenment As television becomes more and more literary with shows like *Lost* and *Gilmore Girls* sending us off to the bookstore and the library so we might read them more carefully a book like *The X-Files and Literature* is welcome indeed Sharon R Yang's diverse collection on one of Nineties TV's richest texts finds the truth of the gothic and the Arthurian and the folkloric of the postmodern and the metafictional of Poe Pynchon Cooper Nabokov and Tennyson not just out there but in the perhaps too complicated narrative of the perpetually frustrated quests of Mulder and Scully Valuable in itself as an intellectual exercise its real worth may come when we put the book down and return smarter better readers to the primary text David Lavery Co Editor *Deny All Knowledge Investigating The X-Files* Sharon Yang's *X-Files* collection deals with an important subject addressed by thoughtful writers The idea that television can be seen as a branch of literature is certainly sustained by *The X-Files* and the contributors to this volume succeed in making the case Brian Hauser on Fenimore Cooper Cary Jones on Mary Shelley Tamy Burnett on Poe Thomas Argiro on Pynchon Matthew VanWinkle on Tennyson these and more explore the connections with *The X-Files* not only in terms of sources but also themes and techniques Both students of television and literature will want to own this book Rhonda V Wilcox Ph D Professor of English Gordon College Barnesville
