Sixth International Workshop on Digital Image Processing and Computer Graphics, 1998 *6th International Workshop on Digital Image Processing and Computer Graphics (DIP-97)* Emanuel Wenger, Leonid Dimitrov, 1998 *Proceedings of the Sixth International Workshop on Software Specification and Design, October 25-26, 1991, Como, Italy*, 1991 *6th International Workshop on Digital Image Processing and Computer Graphics (DIP-97) : Applications in Humanities and Social Sciences : 20-22 October 1997, Vienna, Austria* International Workshop on Image Processing and Computer Optics, 1998

Proceedings of the Fourth International Conference on Signal and Image Processing 2012 (ICSIP 2012) Mohan S, Suresh Kumar, 2013-01-11 The proceedings includes cutting edge research articles from the Fourth International Conference on Signal and Image Processing ICSIP which is organised by Dr N G P Institute of Technology Kalapatti Coimbatore The Conference provides academia and industry to discuss and present the latest technological advances and research results in the fields of theoretical experimental and application of signal image and video processing The book provides latest and most informative content from engineers and scientists in signal image and video processing from around the world which will benefit the future research community to work in a more cohesive and collaborative way **Document Analysis Systems**

VI Simone Marinai, Andreas Dengel, 2004-12-10 This volume contains papers selected for presentation at the 6th IAPR Workshop on Document Analysis Systems DAS 2004 held during September 8-10 2004 at the University of Florence Italy Several papers represent the state of the art in a broad range of traditional topics such as layout analysis applications to graphics recognition and handwritten documents Other contributions address the description of complete working systems which is one of the strengths of this workshop Some papers extend the application domains to other media like the processing of Internet documents The peculiarity of this 6th workshop was the large number of papers related to digital libraries and to the processing of historical documents a task which frequently requires the analysis of color documents A total of 17 papers are associated with these topics whereas two years ago in DAS 2002 only a couple of papers dealt with these problems In our view there are three main reasons for this new wave in the DAS community From the scientific point of view several research fields reached a thorough knowledge of techniques and problems that can be effectively solved and this expertise can now be applied to new domains Another incentive has been provided by several research projects funded by the EC and the NSF on topics related to digital libraries *Handbook of Digital Forensics of Multimedia Data and Devices* Anthony T. S. Ho, Shujun Li, 2015-07-24 Digital forensics and multimedia forensics are rapidly growing disciplines whereby electronic information is extracted and interpreted for use in a court of law These two fields are finding increasing importance in law enforcement and the investigation of cybercrime as the ubiquity of personal computing and the internet becomes ever more apparent Digital forensics involves investigating computer systems and digital artefacts in general while multimedia forensics is a sub topic of digital forensics focusing on evidence extracted from both normal computer systems and special multimedia devices such as

digital cameras This book focuses on the interface between digital forensics and multimedia forensics bringing two closely related fields of forensic expertise together to identify and understand the current state of the art in digital forensic investigation Both fields are expertly attended to by contributions from researchers and forensic practitioners specializing in diverse topics such as forensic authentication forensic triage forensic photogrammetry biometric forensics multimedia device identification and image forgery detection among many others Key features Brings digital and multimedia forensics together with contributions from academia law enforcement and the digital forensics industry for extensive coverage of all the major aspects of digital forensics of multimedia data and devices Provides comprehensive and authoritative coverage of digital forensics of multimedia data and devices Offers not only explanations of techniques but also real world and simulated case studies to illustrate how digital and multimedia forensics techniques work Includes a companion website hosting continually updated supplementary materials ranging from extended and updated coverage of standards to best practice guides test datasets and more case studies

Design for Embedded Image Processing on FPGAs Donald G. Bailey, 2023-08-08 Design for Embedded Image Processing on FPGAs Bridge the gap between software and hardware with this foundational design reference Field programmable gate arrays FPGAs are integrated circuits designed so that configuration can take place Circuits of this kind play an integral role in processing images with FPGAs increasingly embedded in digital cameras and other devices that produce visual data outputs for subsequent realization and compression These uses of FPGAs require specific design processes designed to mediate smoothly between hardware and processing algorithm Design for Embedded Image Processing on FPGAs provides a comprehensive overview of these processes and their applications in embedded image processing Beginning with an overview of image processing and its core principles this book discusses specific design and computation techniques with a smooth progression from the foundations of the field to its advanced principles Readers of the second edition of Design for Embedded Image Processing on FPGAs will also find Detailed discussion of image processing techniques including point operations histogram operations linear transformations and more New chapters covering Deep Learning algorithms and Image and Video Coding Example applications throughout to ground principles and demonstrate techniques Design for Embedded Image Processing on FPGAs is ideal for engineers and academics working in the field of Image Processing as well as graduate students studying Embedded Systems Engineering Image Processing Digital Design and related fields
