Olwig, 2013-10-18 The idea that the heritage of nature is fundamentally cultural is provocative to many but it is becoming increasingly accepted in the context of heritage preservation It is argued here that a person's perspective on natural vs cultural heritage as a contested patrimony is to some extent governed by one's intellectual and geographical position In discourses influenced by the natural sciences culture is a heritage of nature whereas in those deriving from the humanities and social sciences nature is defined socio culturally There is also however a geographical dimension to how one looks at the nature culture relation From at least the time of Aristotle the North has been identified with a cultural heritage thought to derive from the northern natural environment It was no longer culture as represented by the architectural monuments of the South but the natural landscape that provided the measure for both natural and cultural heritage as the natural landscape and its ecosystems were put in focus This essay provides a contemporary picture of the long standing contestation between natural and cultural heritage that provided the basis for the northern perspective taken in these essays This book was previously published as a special issue of The International Journal of Heritage Studies Russia's Foreign Trade and

Lindkvist, 2021-07-18 The V stg ta Laws contains the translation of the oldest of the Swedish provincial law codes and other texts of great relevance to the legal history The first version the Older V stg ta Law is from the first half of the thirteenth century and the earliest example of an indigenous vernacular literacy with the Latin script from Sweden A second and highly revised version of the law is preserved in a manuscript from the middle of the fourteenth century This volume also contains a translation of the annotations and proposals made during the complicated negotiations between representatives of the church the kingdom and the community of the province Together the two versions of the law and the annotations offer a unique possibility to understand the making and transformation of a medieval law The importance of the regional leaders the lawmen is evident from the earliest example of history writing in Sweden illustrating the legal and political history of V sterg

land With an Introduction that places the province of V sterg land and its law into its political setting this translation is invaluable for all students and scholars of medieval Swedish legal and political history **The Beginnings of English Overseas Enterprise** Sir Charles Prestwood Lucas,1917 *Roman Reflections* Klavs Randsborg,2015-01-29 Roman Reflections uses a series of detailed and deeply researched case studies to explore how Roman society connected with and influenced Northern Europe during the Iron and Viking Ages In an original way the book brings late prehistoric Denmark best known for its so called bog bodies into a world dominated by textual histories principally that of Tacitus The studies include a new examination of the bog bodies of the late first millennium BC a classical archaeological puzzle men women and children murdered yet respected in death and adorned with items of fine clothing A second essay challenges traditionally held ideas about the Cimbri by exploring the textual and archaeological evidence including the startling and famous European artefact the Gundestrup silver cauldron The other studies comprise an archaeologically founded modernist discussion of the ethnography of Tacitus Germania in particular considering the character of ancient Germanic Bronze and Iron Age societies a linguistic exploration of the Latin inheritance in northern European names and places much of which seems to have been invented by the Romans and an analysis of the origins of the Danes Throughout traditional sources and history are presented in conjunction with new archaeological observations and interpretations In an accessible way Roman Reflections assesses Denmark s part on a larger stage showing how foundations were laid for its zenith in Viking times
