The Journal of Critical Psychology Counselling and Psychotherapy Person-Centred Therapy Paul Wilkins, 2015-12-14

Person centred therapy rooted in the experience and ideas of the eminent psychotherapist Carl Rogers is widely practised in the UK and throughout the world. It has applications in health and social care, the voluntary sector and is relevant to work with people who are severely mentally and emotionally distressed. As well as being a valuable sourcebook and offering a comprehensive overview, this edition includes updated references and a new section on recent developments and advances. The book begins with a consideration of the principles and philosophy underpinning person centred therapy before moving to a comprehensive discussion of the classical theory upon which practice is based. Further areas of discussion include: The model of the person including the origins of mental and emotional distress; The process of constructive change; A review of revisions of and additions to person centred theory; Child development styles of processing and configurations of self; The quality of presence and working at relational depth; Criticisms of the approach are addressed and rebutted and the application of theory to practice is discussed. The new final section is concerned with advances and developments in theory and practice including: Counselling for Depression; The Social Dimension to Person Centred Therapy; Person Centred Practice with People experiencing Severe and Enduring Distress and at the Difficult Edge; A Review of Research. Throughout the book attention is drawn to the wider person centred literature to which it is a valuable key. Person Centred Therapy will be of particular use to students, scholars and practitioners of person centred therapy as well as to anyone who wants to know more about one of the major psychotherapeutic modalities.

Essential reading for trainee and practising counselling psychologists with an interest in the person centred approach and highly recommended for counsellors and psychotherapists of all orientations. Mick Cooper, Professor of Counselling, Counselling Unit, University of Strathclyde.

Person Centred Counselling Psychology: An Introduction is an introduction to the philosophy, theory and practice of the person centred approach. Focusing on the psychological

underpinnings of the approach Ewan Gillon describes the theory of personality on which it is based and the nature of the therapeutic which is characterised by unconditional positive regard, empathy, congruence. The book shows how the person-centred approach relates to others within counselling psychology and to contemporary practices in mental health generally. It also gives guidance to readers on the approach's research tradition as well as considering key issues for those wishing to train and work as a person-centred practitioner. As such it is designed to be an applied, accessible text providing a dialogue between the psychological basis of person-centred therapy and its application within the real world. As well as psychology students it will be of interest to those from other disciplines, counselling trainees, those within the caring professions and person-centred therapists from a non-psychological background. Person-Centred Therapy with Children and Young People

David Smyth, 2013-02-01 This engaging new book presents a child-centred model of therapy that is thoroughly person-centred in its values. Establishing the roots of child-centred therapy in both child development theories and the Rogerian model, David Smyth demonstrates that counselling the person-centred way is exceptionally relevant to young people. The book further develops child-centred therapy theory and practice, applying the model to real-life practice with children and young people, whether in play school organisations or with special needs groups. It also explores the complex professional issues so critical with this age group, including challenging boundaries, establishing an effective relationship with parents and other primary carers, legal and ethical considerations, and multi-professional practice. The author's warm, accessible style conveys his passionate conviction that the person-centred approach can provide a strong foundation for child therapy practice. His book introduces humanistic counselling and psychotherapy trainees as well as adult-trained therapists to the particular requirements of working with children and young people and also illustrates the value of using a child-centred approach for

those who might already be working with children in mental health settings Equally this volume can be used for professional development in many disciplines including adult trained therapists who want to extend their knowledge of people prior to reaching adulthood
