Building Skins Christian Schittich,2012-12-17 The external facades of a building are more than a protective mantle or an intelligent skin regulating temperature and light they also determine its very appearance By unusual choices of materials and the use of complex technology facades have become increasingly significant in recent years External surfaces are being perceived as an integral part of the building and are therefore being designed as such This volume focuses on the wide ranging aspects of facade design from the selection and use of materials to the advanced technical possibilities now open to the architect A wide array of carefully selected international examples show the theory in the practice All plans details and large scale sections of the facades have been researched with the high degree of competence typical of the editorial staff from the review Detail Expert authors provide the essential information needed to plan and design facades and elucidate on the latest developments in technology and materials      The Architectural Review ,2005      *Original Resopal* Romana Schneider,2006 Original Resopal traces the history of a name and proves that even 75 years after its invention Resopal Formica provides innovative design and application opportunities      *Translucent Building Skins* Scott Murray,2013-05-07 Exploring the design of innovative building enclosure systems or skins in contemporary architecture and their precedents in earlier twentieth century modern architecture this book examines the tectonics the history and the influence of translucency as a defining characteristic in architecture Highly illustrated throughout with drawings and full colour photographs the book shows that translucency has been and continues to be a fertile ground for architectural experimentation Each chapter presents a comparative analysis of two primary buildings a recent project paired with a historical precedent highlighting how architects in different eras have realized the distinctive effects of translucency The included buildings span a variety of program types ranging from a single family residence to a factory to a synagogue Whether it is Pierre Chareau s glass lens

curtain wall at the Maison de Verre Frank Lloyd Wright's wall of stacked glass tubes at the Johnson Wax Research Tower or Peter Zumthor's use of acid etched glass in a double skin envelope at the Kunsthaus Bregenz the included projects each offer an exemplary case study of innovations in materiality and fabrication techniques Today among many contemporary architects there is an engagement with new technologies new material assemblies and new priorities such as sustainability and energy efficiency A resurgent interest in translucency as a defining quality in buildings has been an important part of this recent dialogue and this book makes essential reading for any architect looking to incorporate aspects of translucency into their buildings

Bio-based Building Skin Anna Sandak, Jakub Sandak, Marcin Brzezicki, Andreja Kutnar, 2019-03-04 This book provides a compendium of material properties demonstrates several successful examples of bio based materials application in building facades and offers ideas for new designs and novel solutions It features a state of the art review addresses the latest trends in material selection assembling systems and innovative functions of facades in detail Selected case studies on buildings from diverse locations are subsequently presented to demonstrate the successful implementation of various biomaterial solutions which defines unique architectural styles and building functions The structures morphologies and aesthetic impressions related to bio based building facades are discussed from the perspective of art and innovation essential factors influencing the performance of materials with respect to functionality and safety are also presented Special emphasis is placed on assessing the performance of a given facade throughout the service life of a building and after its end The book not only provides an excellent source of technical and scientific information but also contributes to public awareness by demonstrating the benefits to be gained from the proper use of bio based materials in facades As such it will appeal to a broad audience including architects engineers designers and building contractors

**Design-Tech: Building Science for Architects** Jason Alread, Thomas Leslie, Rob Whitehead, 2025-03-19 The third edition of Design Tech provides an indispensable holistic resource for integrating building technologies into critically designed performance based architectural projects The book's format follows the developmental stages of a typical architectural project it provides a step by step process for addressing and integrating building sciences from first principles of human comfort materials structures and environmental systems to advanced construction systems and measures of building performance Short chapters incorporate easy to understand information with hundreds of useful illustrations tables and references that explain the why as well as the how of building science The content focuses on what designers need to know in the studio to create sustainably designed integrated buildings and it prepares them for future discussions with engineers contractors and consultants The updated format builds a coherent framework for integrated project design studio development necessary for all contemporary accredited schools of architecture Chapters build upon critical project information from schematics toward technical integration New chapters emphasize performance based design strategies including sustainable design values critical schematic planning enhanced building envelope design strategies and advanced performance systems Enhanced visualization

of schematic design strategies helps explain sustainable design standards code compliance and structural schematics and throughout the third edition focuses on contemporary issues such as embodied carbon heavy timber construction life cycle costs and long term performance This will be a must read for all architecture students looking for an accessible guide to building science
