**Advanced Geriatric Education for Emergency Medical Services Course Workbook** National Association of Emergency Medical Technicians (U.S.), 2017-04-21 Older adults remain the largest single consumer of health care resources. For increasing numbers of older people in society, the emergency medical services practitioner is the only health care worker outside of the emergency department who is immediately available to assist the older person in crisis 24 hours a day, 7 days a week. Advanced geriatric education for emergency medical services expands on the Geriatric education for emergency medical services core course, delving into more complex scenarios and addressing the unique devices that emergency medical services practitioners are likely to encounter when assessing, treating, and transporting older adults. Back cover *Gems* French: *French Gems Manuscript with English Main Text* NAEMT, 2021-05-28 Les personnes âgées restent le plus grand consommateur de ressources de soins de santé. Pour un nombre croissant de personnes âgées, dans la société, le prestataire de services médicaux d'urgence est le seul travailleur de la santé en dehors du service des urgences qui est immédiatement disponible pour aider la personne âgée en crise 24 heures sur 24, 7 jours sur 7. Geriatric Education for Emergency Medical Services Deuxième édition aborde de manière approfondie tous les besoins de la population âgée afin de s'assurer que les personnes âgées reçoivent le traitement spécifique dont elles ont besoin de la part des praticiens des services d'urgence et des services de santé mobiles. Dans les moments où les compétences gériatriques sont les plus nécessaires, la deuxième édition couvre désormais de manière exhaustive toutes les compétences spécifiques, la gériatrie des Normes nationales d'enseignement SMU et constitue la source la plus crédible et la plus complète d'informations médicales pré-hospitalières pour la population âgée. Le texte comprend plus de contenu et de nouveaux sujets essentiels, notamment les soins de santé mobiles, les incendies et la réponse aux catastrophes. Reconnaissant que les appels gériatriques sont parmi les plus complexes, le contenu du cours adopte une approche haut de gamme et met les étudiants au défi avec des conférences approfondies, des études de cas et des scénarios réalistes et compliqués, des discussions animées et des formations pratiques. Add the GEMS Course Manual Third Edition to the cart. According to the Centers for Disease Control and Prevention, Americans aged 65 and over comprise 15 percent of the population but account for nearly 40 percent of ambulance transports. This is not surprising given that older adults experience more chronic conditions, multiple diseases, and polypharmacy issues than the rest of the population. Yet despite EMS practitioners' experience in the field, research shows that geriatric trauma patients are often undertriaged to trauma centers. High-quality geriatric-specific education can make a difference. With the right text, EMS practitioners can gain a deeper understanding of how the body ages, how multiple medications can create or exacerbate emergencies, how certain communication techniques can improve assessments, and more. Armed with new knowledge, EMS

professionals can learn how to give older patients in their community better emergency care and an improved quality of life The third edition of Geriatric Education for Emergency Medical Services is authored by experts in the field reviewed by the American Geriatrics Society AGS and endorsed by the National Association of Emergency Medical Technicians NAEMT Comprehensive and updated the new edition addresses the National EMS Education Standards in 15 chapters covering communication assessment trauma respiratory and cardiovascular emergencies medication toxicity elder abuse and much more The third edition provides even greater value New guidance on how to conduct a comprehensive geriatric assessment New education on how to correctly triage older patients and transport them to the appropriate level of care New updates to medications and dosages throughout the book updates to ILCOR guidelines the inclusion of COVID 19 considerations and more Unique in prehospital geriatric education Geriatric Education for Emergency Medical Services engages EMS personnel in the complexities of geriatric care and prepares them with the updated guidance they need to successfully assess and care for their older patients Chapter 1 Aging Chapter 2 Changes with Age Chapter 3 Communication Chapter 4 Assessment of the Older Patient Chapter 5 Psychosocial Aspects of Aging Chapter 6 Death and Dying Chapter 7 Trauma Chapter 8 Respiratory Emergencies Chapter 9 Cardiovascular Emergencies Chapter 10 Neurological Emergencies Chapter 11 Other Medical Emergencies Chapter 12 Pharmacology and Medication Toxicity Chapter 13 Elder Abuse Chapter 14 Mobile Integrated Healthcare Chapter 15 Elderly in Disasters 2024 300 pages      *Gems Italian Manuscript 2*
