The Sociology of the City Sandor Halebsky, 1973 *Being Urban* David A. Karp, Gregory Prentice Stone, William C. Greer, The Emerging City was written at a time when the great transformation from urban to suburban lifestyle was under way It is a tribute to Scott Greer that his work understood the new contours of the city and also well appreciated that far from spelling the end of urban life the new developments in communication and transportation only served to change the social and political structure of modern societies Greer established the principle that in urban affairs public policy follows the market The task of this fine work was to chart just how this flow took place A careful researcher and writer Scott Greer herein poses the largest questions of urban existence What needs for fellowship and freedom are bedrock What is gained and what is lost as urbanization unfolds Can one speak of certain urban arrangements as good or bad for humans The Emerging City attempts a theory of society within which the changing city could be interpreted at the social political and symbolic levels The modern city is no longer an autonomous unit but very much a part of often at the center of

national and even international developments As Janet Abu Lughod points out in her sharp introduction most of the themes that are now in common usage owe their beginnings to Scott Greer What Greer has attempted to do is to attack the perennial problems of modern urban society traffic suburban sprawl the atomization of social relations political leadership and the decline of the central city from a fresh point of view He manages to make more sense out of the exasperating yet fascinating problems of modern urban life than any other book this reviewer has seen in some time E Digby Baltzell Administrative Science Quarterly Greer first destroys images of the city as conceived by political scientists urban sociologist and economists and produces a new and more complete one which has far more relevance to reality The Humanist The City Cultures Reader Malcolm Miles,Tim Hall,Iain Borden,2004 Cities are products of culture and sites where culture is made By presenting the best of classic and contemporary writing on the culture of cities this reader provides an overview of the diverse material on the interface between cities and culture The City American Sociological Association,1926 City and Region Robert E. Dickinson,Robert Eric Dickinson,1998 First Published in 1998 Routledge is an imprint of Taylor Francis an informa company The Second Generation of Italians in New York City John Horace Mariano,1921 The Promise of the City Kian Tajbakhsh,2000-12-03 The Promise of the City proposes a new theoretical framework for the study of cities and urban life Finding the contemporary urban scene too complex to be captured by radical or conventional approaches Kian Tajbakhsh offers a threefold interdisciplinary approach linking agency space and structure First he says urban identities cannot be understood through individualistic communitarian or class perspectives but rather through the shifting spectrum of cultural political and economic influences Second the layered unfinished city spaces we inhabit and within which we create meaning are best represented not by the image of bounded physical spaces but rather by overlapping and shifting boundaries And third the macro forces shaping urban society include bureaucratic and governmental interventions not captured by a purely economic paradigm Tajbakhsh examines these dimensions in the work of three major critical urban theorists of recent decades Manuel Castells David Harvey and Ira Katznelson He shows why the answers offered by Marxian urban theory to the questions of identity space and structure are unsatisfactory and why the perspectives of other intellectual traditions such as poststructuralism feminism Habermasian Critical Theory and pragmatism can help us better understand the challenges facing contemporary cities
