**Sociology, Morals and Mystery** Roy Harrod, 1971      Sociology Roy F. Harrod, 1971-04      Popular Morality in the Early Roman Empire Teresa Morgan, 2007-08-09 Morality is one of the fundamental structures of any society enabling complex groups to form negotiate their internal differences and persist through time In the first book length study of Roman popular morality Dr Morgan argues that we can recover much of the moral thinking of people across the Empire Her study draws on proverbs fables exemplary stories and gnomic quotations to explore how morality worked as a system for Roman society as a whole and in individual lives She examines the range of ideas and practices and their relative importance as well as questions of authority and the relationship with high philosophy and the ethical vocabulary of documents and inscriptions The Roman Empire incorporated numerous overlapping groups whose ideas varied according to social status geography gender and many other factors Nevertheless it could and did hold together as an ethical community which was a significant factor in its socio political success      Ethics of Consumption David A. Crocker, Toby Linden, 2000-01-01 Scholars in diverse fields now agree on the importance of investigating the impact of consumption practices on the global environment quality of life and international justice In this comprehensive collection of essays most of which appear for the first time eminent scholars from many disciplines philosophy economics sociology political science demography theology history and social psychology examine the causes nature and consequences of present day consumption patterns in the United States and throughout the world Specifically the essays evaluate the impact of consumption practices on our own lives our institutions other people and the environment The contributors give explicit attention to the principles relevant for a consumption ethic as well as to the policies and practices that such an ethic permits or requires These engaging jargon free essays frame the problem of consumption in a variety of ways challenging readers to see the issue from new perspectives For scholars and students from across the disciplines as well as for environmental and consumer activists this volume will serve as the touchstone for discussions of consumption and global stewardship      *After the End of History* Robert E. Lane, 2009-11-16 Robert E Lane is one of the most prominent and distinguished critics of both the human impact of market economies and economic theory arguing from much research that happiness is more likely to flow from companionship enjoyment of work contribution to society and the opportunity to develop as a person than from the pursuit of wealth and the accumulation of material goods in market economies This latest work playfully personalizes the contrast through a dialogue between a humanistic social scientist Dessi and a market economist Adam It is all too rare to have the two sides talking to each other Moreover in Lane s witty and literate hands it is an open minded and balanced conversation in which neither side has all the answers His unparalleled grasp of interdisciplinary social scientific knowledge is brought to bear on the largest questions of human life What genuinely makes people happy How should human society be organized to maximize the quality of human lives David O Sears Professor of Psychology and Political Science UCLA Lane s deep knowledge of the sources of human

happiness enables him to develop a powerful critique of economic theory Robert A Dahl Sterling Professor Emeritus of Political Science Yale University Robert E Lane is the Eugene Meyer Professor Emeritus of Political Science at Yale University His previous publications include *The Loss of Happiness in Market Democracies* 2000 and *The Market Experience* 1991

**Readings in the Philosophy of Social Science** Michael Martin, Lee C. McIntyre, 1994 the first comprehensive anthology in the philosophy of social science to appear since the late 1960s

**The New Blackwell Companion to Major Social Theorists** George Ritzer, Jeffrey Stepnisky, 2011-04-20

**Laws And Explanation In The Social Sciences** Lee C McIntyre, 2018-10-08 The first full length defense of social scientific laws to appear in the last twenty years this book upholds the prospect of the nomological explanation of human behavior against those who maintain that this approach is impossible impractical or irrelevant By pursuing an analogy with the natural sciences McIntyre shows that the barriers to nomological inquiry within the social sciences are not generated by factors unique to social inquiry but arise from a largely common set of problems that face any scientific endeavor All of the most widely supported arguments against social scientific laws have failed largely due to adherence to a highly idealized conception of nomologicality allegedly drawn from the natural sciences themselves and the limited doctrine of descriptivism Basing his arguments upon a more realistic view of scientific theorizing that emphasizes the pivotal role of redescription in aiding the search for scientific laws McIntyre is optimistic about attaining useful law like explanations of human behavior

**Respect and Rights** Seymour Michael Miller, Anthony J. Savoie, 2002 Group respect and group self respect are central issues today for class gender race and religious groups This book explores changing public attitudes the causes and consequences of group disrespect and proposes an agenda for action to expand group respect Visit our website for sample chapters

*The German Historical School* Yuichi Shionoya, 2000-10-12 This book clarifies the approach of the German Historical School by the reconstruction of their achievements in terms of rational and historical context

**Varieties of Scientific Experience** Lewis S. Feuer, Lewis S Feuer shows that the gestation of the hypotheses of

original minded scientists such as Darwin Einstein or Bohr is in large part a subconscious process Scientists try to project upon the world structural laws that beside fitting the given physical realities will also realize their own emotional longings among alternative worldviews Repeatedly too in examining the standpoints of philosophical figures ranging from Spinoza Descartes Kant and Mill to contemporary figures such as Einstein Lovejoy and Hook Feuer illumines how sociological antipathies project themselves into scientific divergences Feuer delves into the bearing of emotive beliefs such as pacifism socialism anti Semitism upon the formation of concurrent worldviews often fixations of scientific belief held with the same passion in science as in religion

*Naturalism and Social Science* David Thomas, 1980-01-24 This 1979 text addresses the ways in which the dominant theories in large areas of Western social science have been subject to strong criticisms particularly of their supposed philosophical deficiencies In the philosophy of science this resulted in empiricist views being replaced by an emphasis on the potential obstinacy of theory in the face of the empirical world After introducing this contemporary philosophy of science Dr Thomas uses it to argue that social study can both retain the natural scientific commitment to the constraint of the external world and assimilate the sorts of philosophical criticisms that were made of the old social scientific theories In particular he shows that social study understood in terms of the new philosophy of science can give an account of the former s distinctive concerns with issues of the meaning and value of social life Dr Thomas supports his abstract arguments by detailed case studies

Besomi, 1999-08-12 This book inquires into the origin and early development of Roy Harrod's notion of economic dynamics It examines how Harrod gathered the analytical methodological and epistemic components of his theory and how these are logically connected It shows that the organizing concept is the instability principle a premise rather than a result of Harrod's trade cycle theory The relationship of Harrod's dynamics with the orthodox theory and with the alternative approaches to dynamics is also examined *Aspects Of Ancient Indian Administration* D.K.
