groups and who want to think about their work in more general terms it was not at the time widely realised how radically different and how potentially powerful are the implications of group procedures not only for therapy but in such fields as education industry and politics Freud recognised this when he pointed out the dilemma of having to procure for the group precisely those features which were characteristic of the individual and which are extinguished in him by the formation of the group Whilst the problem for the individual is the intrusion of unconscious factors for the group it is the group's equivalent of consciousness namely communication and organization which is in a quandary The group model differs crucially from the psychological but they may relate in the sense that as Freud indicated neurosis represents a recapitulation within the individual of mankind's group history The unconscious mind then is a group phenomenon In other words group theory turns psychoanalysis upside down and begins at the point where Freud left off relating neurosis to its social sources In the light of the group approach therefore neurosis and certain of the psychoses can be viewed as localized deposits of unresolved group experiences within the individual whether they be past current or an expectation of the future a feature which makes traumatic neuroses more understandable since they cannot be explained in terms of infantile neurosis The author suggested the possibility of a new development in group techniques namely that of large group therapy freed of community ties or training considerations in which attitudes and ideologies make themselves evident not as cloudy idealistic non sequiturs but as crucial and clearly definable climates which either impede or promote communication and the flow of information

Social Justice Counseling Rita Chi-Ying Chung, Frederic P. Bemak, 2012

Social Justice Counseling is the next step toward alleviating the injustices faced by individuals in society and it is a natural extension of multicultural counseling. Issues of social justice are dominating conferences across the mental health disciplines with a greater focus on alleviating broader social inequities such as equity access and fairness for each individual. At a micro level social justice issues play out in the form of gender discrimination sexual harassment equal access to education fair housing and more. Traditionally counselors have been focused on the individual however in recent years there has been a shift for all mental health professionals to address issues of social class race and ethnicity and more. This book offers a supplement to important issues regarding social justice and will highly enhance the content taught in multicultural courses. The authors are leading authorities on social justice counseling and have led the way to create a specialization in social justice counseling at their school at George Mason University. This book is the first to bring all these concepts together tie them to multiculturalism and offer personal applications and tools for mental health professionals. It is theoretical yet highly practical in offering concrete steps toward becoming more social justice oriented. Provided by publisher.

Social Justice Multicultural Psychology and Counseling Rita Chi-Ying Chung, 2023

We were excited with the prospect of writing the second edition of this book but as we embarked on this journey our hearts became heavy and deeply saddened as we witnessed multiple social injustices in our community the nation and the world. We have rewritten this Introductory Chapter a number of times as these injustices occurred aware that these events impacted ours and others personal and professional lives and subsequently our writing. Astoundingly each violation of human rights and social and racial justice was as profoundly devastating disturbing and shocking as the one that preceded the injustice one month one week one day or even one hour before.

Emotions in Rituals and Performances Axel Michaels, Christoph Wulf, 2020-11-29

Challenging the idea that rituals are static and emotions irrational the volume explores the manifold qualities of emotions in ritual practices. Focusing explicitly on the relationship between emotions and rituals it poses two central questions. First how and to what extent do emotions shape rituals. Second in what way are emotions ritualized in and beyond rituals. Strong emotions are generally considered to be more spontaneous and uncontrolled whereas ritual behaviour is regarded as planned formalized and

stereotyped and hence less emotional However as the volume demonstrates rituals often reveal strong emotions among participants are motivated by feelings or are intended to generate them The essays discuss the motivation for rituals the healing function of emotions the creation of new emotions through new media the aspect of mimesis in the generation of feelings individual collective and non human emotions the importance of trance and possession staged emotions and emotions on stage emotions in the context of martyrdom emotions in Indian and Western dance traditions emotions of love sorrow fear aggression and devotion Furthermore aesthetic and sensory dimensions as well as emic concepts of emotions in rituals are underscored as relevant in understanding social practice Medical Subject Headings National Library of Medicine (U.S.),1963 Cumulated List of New Medical Subject Headings, 1963-1973 National Library of Medicine (U.S.),1973 **Cumulated Index Medicus** ,1963
