Methods for Assessment of Soil Degradation Rattan Lal, Winfried E. H. Blum, C. Valentin, B.A. Stewart, 2020-11-26 Soil degradation has serious global impacts on agronomic economic and sociopolitical conditions however statistics regarding the degree of these impacts has been largely unreliable This book aims to standardize the methodology for obtaining reliable and objective data on soil degradation It will also identify and develop criteria for assessing the severity of soil degradation providing a realistic scenario of the problem *Soil Erosion, Conservation, and Rehabilitation* Menachem Agassi, 2023-05-31 Discusses the latest information regarding the processes and mechanisms responsible for runoff and erosion by water in arable lands detailing state of the art water and soil conservation methods Elucidates the rehabilitation of agricultural lands depleted by human activity Use of 137Cs for soil erosion assessment Food and Agriculture Organization of the United Nations, 2018-07-25 Soil erosion is the most destructive land degradation process causing removal of soil siltation of water reservoirs and pollution of water sources Combating erosion needs reliable data on soil erosion rates its dynamics and spatial distribution Collecting such data with conventional methods requires great investment and long period of time The 137Cs method for erosion assessment can address this problem The Joint FAO IAEA Division of Nuclear Techniques in Food and Agriculture of the IAEA has been working on this method for more than 20 years This publication provides a brief guidance on this method It covers major components of 137Cs method starting from its principles the sampling strategy gamma spectroscopic measurements estimation of erosion rates with conversion models data interpretation and the use of 137Cs method for erosion models validation The publication is suitable for a wide audience such as researchers agricultural and environmental experts decision makers farmers and students **Modelling Soil Erosion by Water** John Boardman, David Favis-Mortlock, 2013-06-29 TO THE MODEL EVALUATION 1 MODELLING SOIL EROSION BY WATER 1 2 John Boardman and David Favis Mortlock 1 School of Geography and Environmental Change Unit Mansfield Road University of Oxford Oxford OX1 3TB UK 2 Environmental Change Unit University of Oxford 5 South Parks Road Oxford OX1 3UB UK Introduction This volume is the Proceedings of the NATO Advanced Research Workshop Global Change Modelling Soil Erosion by Water which was held on 11-14th September 1995 at the University of Oxford UK The meeting was also one of a series organised by the IGBP 1 GCTE Soil Erosion Network which is a component of GCTE s Land Degradation Task 3 3 2 Ingram et al 1996 Valentin this volume One aim of the GCTE Soil Erosion Network is to evaluate the suitability of existing soil erosion models for predicting the possible impacts of global change upon soil erosion Due to the wide range of erosion models currently in use or under development it was decided to evaluate models in the following sequence Favis Mortlock et al 1996 field scale water erosion models catchment scale water erosion models wind erosion models models with a landscape scale and larger focus As part of this strategy the first stage of the GCTE validation of field scale erosion models was carried out at the Oxford NATO ARW I A list of Acronyms forms Appendix A **Handbook of Processes and Modeling in the Soil-Plant System**

Rolf Nieder, D. Benbi, 2024-11-01 Learn to create and use simulation models the most reliable and cost effective tools for predicting real world results The Handbook of Processes and Modeling in the Soil Plant System is the first book to present a holistic view of the processes within the soil plant atmosphere continuum Unlike other publications which tend to be more specialized this book covers nearly all of the processes in the soil plant system including the fundamental processes of soil formation degradation and the dynamics of water and matter It also illustrates how simulation modeling can be used to understand and forecast multiple interactions among various processes and predict their environmental impact This unique volume assembles information that until now was scattered among journals bulletins reports and symposia proceedings to present models that simulate almost all of the processes occurring in the soil plant system and explores the results that these models are capable of producing With chapters authored by experts with years of research and teaching experience the Handbook of Processes and Modeling in the Soil Plant System examines physical chemical and biological soil processes the soil formation and weathering process and its modeling the impact of radioactive fallout on the soil plant system soil degradation processes and ways to control them water and matter dynamics in the soil plant system growth and development of crops at various levels of production the potentials and limitations of using simulation models Students educators and professionals alike will find the Handbook of Processes and Modeling in the Soil Plant System an invaluable reference on the soil plant atmosphere system and an ideal tool to help develop an effective decision support system Soil Erosion, Land Degradation and Social Transition Rorke Bryan, 1994 **Principles of Soil Physics** Rattan Lal, Manoj K. Shukla, 2004-05-28 Principles of Soil Physics examines the impact of the physical mechanical and hydrological properties and processes of soil on agricultural production the environment and sustainable use of natural resources The text incorporates valuable assessment methods graphs problem sets and tables from recent studies performed around the globe and offers an abundance of tables photographs and easy to follow equations in every chapter The book discusses the consequences of soil degradation such as erosion inhibited root development and poor aeration It begins by defining soil physics soil mechanics textural properties and packing arrangements The text continues to discuss the theoretical and practical aspects of soil structure and explain the significance and measurement of bulk density porosity and compaction The authors proceed to clarify soil hydrology topics including hydrologic cycle water movement infiltration modeling soil evaporation and solute transport processes They address the impact of soil temperature on crop growth soil aeration and the processes that lead to the emission of greenhouse gases The final chapters examine the physical properties of gravelly soils and water movement in frozen saline and water repellent soils Reader friendly and up to date Principles of Soil Physics provides unparalleled coverage of issues related to soil physics structure hydrology aeration temperature and analysis and presents practical techniques for maintaining soil quality to ultimately preserve its sustainability Farm Land Erosion S. Wicherek, 2012-12-02 During the last twenty years mutations within agricultural systems in France and Europe have brought

on a spectacular worsening of soil erosion and degradation This volume contributed to by scientists from 25 countries discusses how this risk can be evaluated and which solutions should be adopted without radically disturbing the socio economic orientation of major agricultural regions It is an excellent starting point for the development of new research themes and will be of great value to soil and environmental scientists and to all those involved in land irrigation and drainage
