Literature 1974, Part 2 S. Böhme, U. Esser, W. Fricke, U. Güntzel-Lingner, F. Henn, D. Krahn, H. Scholl, G. Zech, 2013-11-11 Astronomy and Astrophysics Abstracts which has appeared in semi annual volumes since 1969 is devoted to the recording summarizing and indexing of astronomical publications throughout the world It is prepared under the auspices of the International Astronomical Union according to a resolution adopted at the 14th General Assembly in 1970 Astronomy and Astrophysics Abstracts aims to present a comprehensive documentation of literature in all fields of astronomy and astrophysics Every effort will be made to ensure that the average time interval between the date of receipt of the original literature and publication of the abstracts will not exceed eight months This time interval is near to that achieved by monthly abstracting journals compared to which our system of accumulating abstracts for about six months offers the advantage of greater convenience for the user Volume 12 contains literature published in 1974 and received before March 15 1975 some older literature which was received late and which is not recorded in earlier volumes is also included Beginning with volume 11 some minor changes of our classification scheme have been made We acknowledge with thanks contributions to this volume by Dr J Bouska who surveyed journals and publications in the Czech language and supplied us with abstracts in English and by the Commonwealth Scientific and Industrial Research Organization CSIRO Sydney for providing titles and abstracts of papers on radio astronomy

Modifications of Einstein's Theory of Gravity at Large Distances Eleftherios Papantonopoulos, 2014-11-04 In the last few years modified gravity theories have been proposed as extensions of Einstein's theory of gravity Their main motivation is to explain the latest cosmological and astrophysical data on dark energy and dark matter The study of general relativity at small scales has already produced important results cf e g LNP 863 Quantum Gravity and Quantum Cosmology while its study at large scales is challenging because recent and upcoming observational results will provide important information on the validity of these modified theories In this volume various aspects of modified gravity at large scales will be discussed high curvature gravity theories general scalar tensor theories Galileon theories and their cosmological applications F(R) gravity theories massive new massive and topologically massive gravity Chern-Simons modifications of general relativity including holographic variants and higher spin gravity theories to name but a few of the most important recent developments Edited and authored by leading researchers in the field and cast into the form of a multi author textbook at postgraduate level this volume will be of benefit to all postgraduate students and newcomers from neighboring disciplines wishing to find a comprehensive guide for their future research

Crossing the Boundaries Misha Shifman, 2010 This volume contains the proceedings of the workshop Crossing the Boundaries Gauge Dynamics at Strong Coupling hosted by the William I Fine Theoretical Physics Institute at the University of Minnesota May 14-17 2009 The workshop honored the 60th birthday of Professor Misha Shifman and his outstanding achievements in the field of gauge dynamics The meeting attracted a fascinating group of researchers working on the cutting edge of dynamics of gauge

theories including supersymmetric and string theories Their talks covered a wide area of recent developments in the field

Energy Research Abstracts ,1988 **The Bulletin of the University of Minnesota [Announcements]**. University of Minnesota,1926 **Mathematical Reviews** ,2007 **Igneous and Metamorphic Petrology** Myron G. Best,2002-12-13

Igneous and metamorphic petrology has over the last twenty years expanded rapidly into a broad multifaceted and increasingly quantitative science Advances in geochemistry geochronology and geophysics as well as the appearance of new analytical tools have all contributed to new ways of thinking about the origin and evolution of magmas and the processes driving metamorphism This book is designed to give students a balanced and comprehensive coverage of these new advances as well as a firm grounding in the classical aspects of igneous and metamorphic petrology The emphasis throughout is on the processes controlling petrogenesis but care is taken to present the important descriptive information so crucial to interpretation One of the most up to date synthesis of igneous and metamorphic petrology available Emphasis throughout on latest experimental and field data Igneous and metamorphic sections can be used independently if necessary *Colloidal Foundations of Nanoscience* Debora Berti, Gerardo Palazzo, 2021-10-24 Colloidal Foundations of Nanoscience Second Edition explores the theory and concepts of colloid chemistry and its applications to nanoscience and nanotechnology The book provides the essential conceptual and methodological tools to approach nano research issues The authors expertise in colloid science will contribute to the understanding of basic issues involved in research Each chapter covers a classical subject of colloid science in simple and straightforward terms addressing its relevance to nanoscience before introducing case studies Sections cover colloids rheology electrokinetics nanoparticle tracking analysis NTA bio layer interferometry and the treatment of inter particle interactions and colloidal stability Gathers in a single volume information currently scattered across various sources Provides a straightforward introduction on theoretical concepts and in depth case studies to help readers understand molecular mechanisms and master advanced techniques Includes examples showing the applications of classical concepts to real world cutting edge research Edited and written by highly respected quality scientists High Energy Physics Index ,1994 Quantum Gravity Carlo Rovelli, 2004-11-15 Publisher Description **Reviews of Environmental Contamination and Toxicology Volume 232** David M. Whitacre, 2014-07-01 Reviews of Environmental Contamination and Toxicology attempts to provide concise critical reviews of timely advances philosophy and significant areas of accomplished or needed endeavor in the total field of xenobiotics in any segment of the environment as well as toxicological implications **The Anthropic Cosmological Principle** John D. Barrow, Frank J. Tipler, 1986 Investigates the history of philosophic thought concerning the question of design and mankind s place in the universe The modern collection of ideas known as the anthropic cosmological principle asserts that there is a deep connection between intelligent life and the physical universe *Control of Heavy Metals in the Environment, Volume 1* Lawrence K. Wang, Mu-Hao Sung Wang, Yung-Tse Hung, Jiaping Paul Chen, 2025-03-21 Offering broad coverage of both basic and advanced principles and

applications Control of Heavy Metals in the Environment series provides environmental and chemical engineers with the most complete resources available on the remediation of heavy metal contaminants with an emphasis on innovative approaches It investigates a variety of environmental pollution sources and waste characteristics that require a multitude of remediation methods It also details the latest in clean tech advances including flotation and filtration technologies and discusses the treatment of wastewater surface water groundwater and more It includes several case histories to illustrate the regional and global effects of key pollution control practices Features Provides technical information for industrial and hazardous waste treatment Explores the newest methods of clean production and waste minimization Includes numerous figures tables examples and case histories

Nurhaiza, Ahsanul Kaiser, 2012-02-25 **Nuclear Science Abstracts**, 1975 *Manganese in Soils and Plants* R.D. Graham, R.J. Hannam, N.C. Uren, 2012-12-06 Sixty years ago at the Waite Agricultural Research Institute G Samuel a plant pathologist and C S Piper a chemist published their conclusion that the cause of roadside take all a disease of oats was manganese deficiency This report together with the concurrent and independent studies of W M Carne in Western Australia were the first records of manganese deficiency in Australia and came only six years after McHargue s paper which is generally accepted as the final proof of the essentiality of this element There must have been a few doubts for some people at the time however as the CAB publication The Minor Elements of the Soil 1940 expressed the view that further evidence to this effect was provided by Samuel and Piper Their historic contributions are recognised by the International Symposium on Manganese in Soils and Plants as it meets on the site of their early labours to celebrate the 60th anniversary This year Australians also acknowledge 200 years of European settlement in this country and so the Symposium is both a Bicentennial and a diamond jubilee event which recognises the impact of trace elements on agricultural development in Australia In a broader sense a symposium such as this celebrates as it reviews the efforts of all who over the ages have contributed to our knowledge of manganese in soils and plants

Scientific and Technical Aerospace Reports, 1986 Blackbody Radiation Sean M. Stewart, R. Barry Johnson, 2016-09-19 Shelving Guide Electrical Engineering In 1900 the great German theoretical physicist Max Planck formulated a correct mathematical description of blackbody radiation Today understanding the behavior of a blackbody is of importance to many fields including thermal and infrared systems engineering pyrometry astronomy meteorology and illumination This book gives an account of the development of Planck s equation together with many of the other functions closely related to it Particular attention is paid to the computational aspects employed in the evaluation of these functions together with the various aids developed to facilitate such calculations The book is divided into three sections Section I Thermal radiation and the blackbody problem are introduced and discussed Early developments made by experimentalists and theoreticians are examined as they strove to understand the problem of the blackbody Section II The development of

Planck's equation is explained as are the all important fractional functions of the first and second kinds which result when Planck's equation is integrated between finite limits A number of theoretical developments are discussed that stem directly from Planck's law as are the various computational matters that arise when numerical evaluation is required Basic elements of radiometry that tie together and use many of the theoretical and computational ideas developed is also presented Section III A comprehensive account of the various computational aids such as tables nomograms graphs and radiation slide rules devised and used by generations of scientists and engineers when working with blackbody radiation are presented as are more recent aids utilizing computers and digital devices for real time computations Scientists and engineers working in fields utilizing blackbody sources will find this book to be a valuable guide in understanding many of the computational aspects and nuances associated with Planck's equation and its other closely related functions With over 700 references it provides an excellent research resource

Chemical Oceanography Frank J. Millero, 2016-04-19 Over the past ten years a number of new large scale oceanographic programs have been initiated These include the Climate Variability Program CLIVAR and the recent initiation of the Geochemical Trace Metal Program GEOTRACES These studies and future projects will produce a wealth of information on the biogeochemistry of the world's oceans Aut

Textile Wastewater Treatment Subramanian Senthilkannan Muthu, Ali Khadir, 2022-08-18 In this second volume various materials such as Magnetic based biocomposites wheat bran straw based biomaterials peel based biomaterials luffa Based Biomaterials composite polymeric membranes rice husk hydroxyapatite etc for treating textile waste water are highlighted One of the major pollutants in the textiles and fashion sector is textile waste water Textile wastewater can lead to serious environmental issues if discharged without proper and sufficient treatment The materials employed along with the technologies available to treat the waste water are the key There are a lot of advancements in terms materials technologies employed for textile waste water treatment Sustainable bio nano materials and macro molecules play a major role in the efficient textile waste treatment
