Soldering And Welding:

Soldering, Brazing, and Welding (Classic Reprint) Bernard E. Jones, 2017-09-15 Excerpt from Soldering Brazing and Welding Apart from the use of rivets screws etc metal is commonly joined by soldering brazing or welding three groups of processes that have one thing in common the use of heat to fuse either the metals themselves or an alloy which is interposed to consolidate the joint The word solder is derived through the French from a Latin word meaning solid Soldering may be soft or hard Soft soldering uses lead tin alloys which are easily melted in a bunsen gas flame or with a hot iron or bit while hard soldering employs a silver copper alloy to melt which a mouth blowpipe at least is necessary Brazing is hard soldering with spelter brass and a forge or a heavy blowlamp or a powerful blowpipe must be employed to provide the heat About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
