Suicide Of American Churches:

Religion and Suicide in the African-American Community Kevin E. Early, 1992-10-26 Suicide among African Americans occurs at about half the rate with which it occurs among white Americans Why is the black rate of suicide so much lower particularly when one considers the effects of racism and other socio economic factors on African Americans One answer that has been offered is that churches within the African American community have a greater influence than among white Americans and that they provide amelioration of social forces that would otherwise lead to suicide To date no other book has provided an in depth ethnographic study of the buffering effect of the black church against suicide Findings from Early s study indicate that there is a consensus within the black community in terms of its attitudes and beliefs toward suicide Early concludes that suicide is alien to underlying African American belief systems and a complete denial of what it means to be black This important study will be invaluable to sociologists and others studying contemporary race relations and social problems

Religion, Death, and Dying Lucy Bregman, 2009-11-25 A wide ranging anthology for general readers covering many religious ethical and spiritual aspects of death dying and bereavement in American society What do various spiritual and ethical belief systems have to say about modern medicine s approach to the end of life Do all major religions characterize the afterlife in similar ways How do funeral rites and rituals vary across different faiths Now there is one resource that gathers leading scholars to address these questions and more about the many religious ethical and spiritual aspects of death dying and bereavement in America Religion Death and Dying compares and contrasts the ways different faiths and ethical schools contemplate the end of life The work is organized into three thematic volumes first an examination of the contemporary medicalized death from the perspective of different religious traditions and the professions involved second an exploration of complex often controversial issues including the death of children AIDS capital punishment and war and finally a survey of the funeral and bereavement rituals that have evolved under various religions

Leong,Mark M. Leach,2010-04-15 Suicide is increasingly understood and predicted as an intersection of biological psychological cognitive and sociocultural factors We have some basic knowledge of these factors and how they interact but presently we know very little about how culture can play a role as a variable that influences suicide *Suicide Among Racial and Ethnic Minority Groups* will go a long way towards filling that gap by pulling together cutting edge empirical research from general cultural diversity literature and applying it to suicide assessment treatment and prevention theory and practice By looking outside of the limited cross cultural studies done within suicidal populations the contributors all established experts in both multicultural counseling and suicidology expand the available empirical literature base in order to provide a deeper look into how culture can act as an important catalyst in suicidal intentions Following theoretical overviews the text focuses on six broad ethnic groups classified in the literature African American American Indian Asian American European American Hawaiian Pacific Islander and Hispanic with a main chapter devoted to each relating each culture to suicide research highlighting specific variables within the culture that can influence suicide and presenting appropriate treatment considerations A final section of the book consists of practical applications within specific settings therapy outreach schools psychiatric services and prevention and training issues **Suicide Among Diverse Youth** Andres J Pumariega,Neha Sharma,2017-11-13 This book provides a comprehensive review of the complex growing mental health challenges faced by culturally diverse populations of children and adolescents *Suicide Among Diverse Youth A Case Based Guidebook* is the first book of its kind and is designed specifically to bridge the knowledge and skills gap encountered by most clinicians dealing with youth from diverse cultural backgrounds particularly those different than that of the clinician The title begins with two introductory chapters which cover cultural aspects of suicidality among youth culturally informed treatment of suicidality with diverse youth and examples of preventative approaches These are followed by population specific chapters which cover a broad spectrum of diverse populations including underserved ethnic and racial populations in the United States LGBTQ youth as well as various immigrant populations from Eastern European and Middle Eastern countries These case based chapters are structured in a cohesive easy to read format that promotes ease of reference beginning with a clinical case report review of literature unique characteristics and risk factors associated with suicidality and evidence based practice provided by the authors from their considerable experience The authors are often from the same ethnic racial or cultural

group that they discuss in their writings providing experiential knowledge where scientific knowledge is lacking

Suicide Across Cultures Meryam Schouler-Ocak, Murad Moosa Khan, 2024-09-04 Over 700 000 people globally take their own lives every year which equates to one death by suicide every 40 seconds Among teenagers and young adults suicide is the second most common cause of death after road traffic accidents Overall almost three times as many men than women die by suicide There are however significant variations in the patterns of suicide across cultures gender age geographic locations and personal history due to the complex relationship of how these factors converge One thing that remains consistent is that every death is a tragedy for family friends and all colleagues Traditions of suicidal behaviour are deeply rooted in any given culture and so examining the cultural influences can be of paramount importance in the understanding and assessment of a suicidal crisis **Suicide Across Cultures** offers the opportunity to expand knowledge beyond majority groups and to look further than the dominant paradigm in suicide research treatment and prevention With the majority of global suicides taking place in non Western societies minority groups are an essential area in suicide research Written by experts from around the world this fascinating textbook includes topics and regions that are not usually covered in texts on suicide and self harm It provides a unique and important insight for academics and students in psychiatry as well as anyone from the wider public with an interest in the psychiatry of suicide across cultures

Cultural Diversity and Suicide Mark M Leach, 2014-02-25 This book adds a vital and overlooked dimension diversity to suicide assessments and interventions The literature on the relationship between culture and suicide has historically been widely scattered and often difficult to find **Cultural Diversity and Suicide** summarizes that widespread literature so that counselors can begin to include diversity issues as important variables that can help them become even more effective when conducting suicide assessments or interventions For ease of reading **Cultural Diversity and Suicide** is divided into chapters based on ethnicity The book avoids broad generalizations whenever possible thus each chapter specifically discusses critical within group variables issues relating to gender age religion and sexuality that should be considered when conducting suicide assessments and interventions Each chapter includes at least one case study and incorporates clear headings that make it simple to find specific information **Cultural Diversity and Suicide** is not a book of cookie cutter approaches to suicide prevention nor is it a primer for the novice Rather it has been carefully designed to help counselors and counselors in training gain a fuller understanding of the issues that may lead individuals from diverse backgrounds to consider suicide and the cultural aspects of an individual s heritage that can influence that person s decision Written for professionals who have a pre existing understanding of how to work with suicidal clients the book begins with a concise but essential overview of traditional suicide risk factors and a brief assessment model an excellent memory refresher

and then moves quickly into specific diversity issues relevant to European Americans African Americans Asian Americans Hispanic Americans Native Americans Cultural Diversity and Suicide explores ethnicity and its relationship to suicide for example suicide rate and reason differences based on ethnic group or ethnic identity plus meaningful within group variables such as lesbian gay bisexual issues and the increase in suicide rate based on sexual orientation and sexual identity religious differences suicide rates among various religious groups religious differences in views of suicide views of the afterlife burial practices and views of lesbian gay bisexual people cultural buffers such as extended family and religious practice suicide prevention interventions based on cultural differences essentially how traditional suicide prevention programs can be altered to include new variables This book is essential reading for everyone doing the vital work of conducting suicide assessments and interventions Please consider making it part of your professional teaching collection today
